THINK OVER IT "UNCLE JOE"

Even the Milwaukee Sentinel sees a light. While admitting that "a consensus of republican opinion stands firm for the protective principle," the Sentinel adds: "The consensus of republican opinion also is that some of the present rates are too high, and that it is time to think seriously about revision and readjustment, as a measure not only of good business but of good politics. The dual tariff will remain in the cloudland of academic discussion for a long time to come. The old American system revised and brought up to date would probably suit every occasion and aspiration of our business world. Standing pat on protection is all-right. Standing pat on superannuated and dubious schedules is not all right. It is not the republican revisionists, but the bigots and bourbons, who endanger the integrity of the American protective system." The Milwaukee Sentinel is a stalwart republican organ, and by some it is called a "machine organ." Its frank statement has given Speaker Cannon something to think about.
