

Hear the Edison Diamond Amberola— The Perfect Phonograph

THOMAS A. EDISON has accomplished what heretofore had only been approached; the reproduction of the human voice so exactly the same as the original that there is not an iota of difference between the actual voice and the reproduction.

Edison invented the phonograph and has now brought it to perfection. The

EDISON DIAMOND AMBEROLA

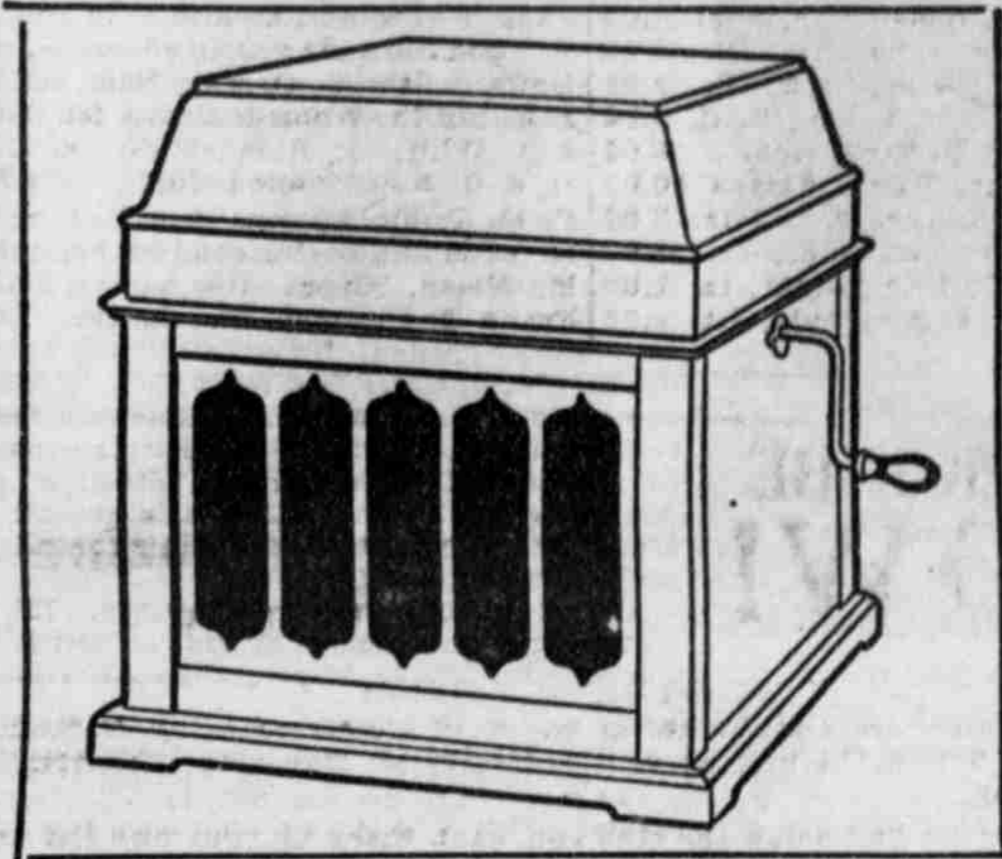

is a *real* musical instrument in the highest sense of the term. Amberola reproduction is pure, unadulterated music, without the slightest mechanical tinge.

This greatest of all musical inventions in your living room would make it just the brightest and cheeriest spot in your home. No matter how delightful it may now be a Diamond Amberola could not fail to make it more so, a spot where your family and friends would delight to gather and enjoy with you the gems of the world of opera, concert, musical comedy and vaudeville.

For the young folks who love to work off the exuberance of youth in the mazes of the dance, you could have selections specially arranged by expert dancing instructors.

And for the children, inspiring military band selections, Riley recitations and lots of good, clean fun, with "Uncle Josh" or "Mr. Cohen."

How else could you get so much out of life at the moderate expenditure of \$30, \$50 or \$75 for the Diamond Amberola and 50 or 75c for EDISON BLUE AMBEROL RECORDS, with a few special selections at \$1.00? Each Amberola model is a superb, artistically designed instrument that anyone

would be proud to have in their home. The price is no indication of the superb quality of the Amberola or Blue Amberol Records. Both are made in accordance with Mr. Edison's laboratory standards, no higher standards exist. The permanent reproducer stylus of the Amberola is a genuine diamond which will outlast the instrument itself. There are no needles to change. Blue Amberol Records are practically unbreakable and unwearable.

We can not give you an adequate idea of the merits of the Diamond Amberola in words. Therefore, we urge you to visit the nearest Edison dealer who will be delighted to demonstrate to you the wonders of "the perfect phonograph." He will consider himself under an obligation, not you.

If you do not know how to readily find an Edison dealer, drop us a line and we will send you the address of the one nearest you, also our Diamond Amberola and Blue Amberol Record catalogs, the latter a veritable library of all kinds and classes of music, over a thousand selections in all.
