MOORE'S FIRST PREMIUM.

Wheat Drill: Sixty-Eight Premiums Awarded!

R.640 DRILLS IN USE.

THIS machine was Patented April 18th, 1843, and July 2d, 1850, and reissued Oct. 12, 1852, and awarded the Highest Premium at 68 Agricultural Society Exhibition, including 6 State Societies, namely: Delaware State Fair, held at New Castle 1850 and 1857; Michigan State Fair, 1851 and 1855 and Ohio, 1854. It also received 6 First Class Diplomas where no Premiums were swarded to any

erfected, and will drill Wheat, Rye, Bariey, Oats, slitting the cuticle longitudinally, the cold of the hills is conservative. The establishment is soon broken up, for it bud is so exquisitely folded and pre-Ac., with a Plax, Millet, Clover and Timothy Seud is seldom four inches in length; and then we discover a white grub three quarters of an inch long, which is readily extracted. When it is removed, the seeds of the melon, or a grain of the tree speedily recovers.

The pared for a severe season, that unless it is safe from the pared for a severe season, that unless it is disturbed by the sap, it is safe from the grub three discover a white grub three discovers a white grub three discovers. Indeed, "Putman" the principal of drilling over broadcast the greatest cold of our latitude. Like the greatest cold of our latitude is an easy to cold the greatest cold of our latitude. Like the greatest cold of our latitude is an easy to cold the greatest cold of our latitude. Like corn, it appears to be too dry to freeze.

Some persons remove the soil to the depth of two or three inches, and apply hot water, hot soap suds, or warm brine, to moulder down and nourish the roots of the plant, instead of being washed bare or heaved out, as is often the case in broadcast sowing; on this account the stocks are stronger and less liable to rust or mildew, and not so apt to be injured by the fly, as it starts much earlier in the Spring, and we stand ready to give them the names and residence of hundreds of Farmers, who will sistain us in saying, that there has been many instances of a gain of from three to five, and sometimes ten bushels per acra obtained on a fair test over broadenst, by the use of a drill; and the Moore Drill is now distributed over the country, and is used by more than

8,640 Of Our Best Farmers! In twenty of the Grain-growing States, who can and will testify to its superiority, which is considered a sufficient recommendation. Some of the many adantages we can claim over other Drills are, it has a surveyor that measures the ground as it passes over it, and measuring the Grain into the box, we know exactly the amount we are putting to the acre, which is very important; and whenever it is necessary to change the quantity it can be done in an instant, always making the change precisely the same to each Hoe, which is a decided advantage over many others. Different soils require a different amount of seeda change is often necessary in the same field, hence the necessity of making the change without a mo-ment's delay. This Drill is warranted to perform equal to any other, and is superior to any other in its simplicity of construction, having no COG GEARING, or other complicated Machinery to get out of repair. TERMS

Of selling the above Machines delivered at Brown-ville: Price \$85, \$40 of which is to be paid when the Machine is taken away. If the machine operates as above described, then the purchaser gives his note, payable in 6 months for the remainder, and if it does not operate as above named, the the money paid, is to be refunded and the machine brought back. THE SUBSCRIBER is now prepared to fur

for the present season. It is unnecessary to speak particularly of the merits of these Machines, as they are tee well known throughout the country to need extelling; but the fact that they have heretofore and are continuing to receive the premiums at the State Dayton, Columbus, Zanesville, Wheeling, Lexingle, Ky. and County Fairs where they have hour exhibited is sufficient to induce all those in want of such a Machine; to purchase one of these. At a practical test of this Separator in competi with the best of those made in England, in 1853, it

of the leading a grigulturalists of that country. I have a large number of them on hand, ready for the coming crop, made of the best material, and war-I have made many valuable improvements in these machines within the last year, and have no hesitation R. R., direct through, making this the shortest machines within the last year, and have no hesitation most reliable route to the Northern points also mated to do good werk. in warranting them superior to any in use. I am also preparing a large number of Crawford's named.

Improved Clover Hullers, patented in 1854, which are greatly superior to his patent of 1844, being in itself feeder, and greatly ahead of it in other respects. They will be manufactured under the immediate supervision of the patentee, who has permanently located in this place.

The above out represents my four burse "Separa-The above out represents my four horse "Separator," and is designed especially for the farmer's own Im also agent for McCormick's celebrated REAP-ER and MOWING MACHINE, combined. J. R. MOFFITT, Piqua, Mlami county, Ohio.
