gestion, Jaundice, Dropsy, Rheumatism, Fevers. Gout, Humors, Nervousness, Irritability, Inflavamations, Hendache, Pains in the Breast, Side, Hack, and Leabs, Female Complaints, &c. &c. Indeed, very few are the diseases in which a Purpative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive hatit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements: They all tend to become or produce the deep seated and formidable distempers which load the hearses all ever the land. Hence a seliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. Anextensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Oures liave been effected beyond belief, were they not substantiated by persons of such exalted position and character as to fertial the suspicion of untruth. their effects upon trial. These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical process in a state of purity, and combined together in such a manner as to insure the best results. This in the Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of nerimonious and injurious qualities, by this each individual virtue only that is desired for the carative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove, as they have roved, more purely remed more powerful antidote to disease than any other

As it is frequently expedient that my readicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formula by which both my Pectoral and Pills are made to the whole body of Practitioners in the United States and British American Provinces. If, however, there should be any one who has not received them, they will be romptly forwarded by mail to his request.

Of all the Patent Medicines that are offered, hore few would be taken if their composition was known! Their life consists in their mystery. I have no The composition of my preparations is haid open-

their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many aminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects mon trial. They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action - remove the obstructions of the stomach, bowels, liver, and other engines of the body, restoring their irregular action to health, and
