J. B. & W. BENNET, Contractors.

THERE has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills — one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been anfortunate for the period hitherto, that almost again. the patient hitherto that almost every purgative medicine is acrimonious and irritating to the how-els. This is not. Many of them produce so much

and impurity of the blood, Irregularities; in short, any and every case where a purgative is required. They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Erysipelas, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of the year, to purify the blood and prepare the system for the change of seasons. An occasional dose stimulates the stomach and bowels into healthy action, and restores the appe-tite and vigor. They purify the blood, and, by their stimulant action on the circulatory system, renovate the strength of the body, and restore the Hence an occasional dose is advantageous, even though no serious derangement exists; but un necessary dosing should never be carried too far, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their

MOFFITT

UBSCRIBER is now prepared to turnish Farmers and others with his

"GRAIN SEPARATOR," for the present season. It is unnecessary to speak particularly of the merits of these Machines, as they are too well known throughout the country to need extelling; but the fact that they have heretofore and are continuing to receive the premiums at the State and County Pairs where they have been exhibited is sufficient to induce all those in want of such a Machine, to purchase one of these. At a practical test of this Separator in competition with the best of those made in England, in 1853, it

received the highest commendations of the press, and of the leading grigulturalists of that country.

I have a large number of them on hand, ready for the coming crop, made of the best material, and warranted to do good work.

I have made many valuable improvements in these machines within the last year, and have no hesitation

I am also preparing a large number of Crawford's Improved Clover Hullers, patented in 1854, which are greatly superior to his patent of 1844, being in itself feeder, and greatly ahead of it in other respects. They will be manufactured under the immediate supervision of the patentee, who has permanently located in this place.

The above cut represents my four horse "Separator," and is designed especially for the farmer's own Im also agent for McCormick's eclebrated REAP-ER and MOWING MACHINE, combined. J. R. MOFFITT, Piqua, Miami couniy, Ohio,
