Brownville Steam Ferry!
BEST CROSSING
ON THE
MISSOURI RIVER.
The Route from Brownville to Ft. Kearney, and from thence to California, is the nearest and most practicable.

BAKER & CODINGTON
ANNOUNCE to the Traveling Public that they are now running a Ferry across the Missouri river at
An entirely new, substantial and commodious
STEAM FERRY BOAT,
Which arrangement will secure a certain and safe passage at all times and in all kinds of weather. The proprietors do not assert boastingly, or for the purpose of gaining custom merely, but are governed by facts, when they say this is the best crossing of the Missouri river in Nebraska, and when they say the road from Brownville to Fort Kearney and from thence to California is the nearest for evidence they refer the reader to the map of the Country; and are warranted in saying it is the most practicable route by personal experience, as well as that of hundreds of others who have traveled it.—We claim therefor that this crossing and route holds out peculiarly favorable inducements, to persons going to California, and solicit their patronage. Notwithstanding our superior arrangements for a safe and speedy crossing, our charges are the same as other Ferries in Nebraska, all being regulated by Legislative enactment.
☞ Recollect that with our facilities of Power, no kinds of weather will prevent our Boats from making regular trips at all hours.
☞ A skiff and hand will be in readiness to cross foot passengers at all times of night.

"COMBINATION PATENT."
UPRIGHT STEAM SAW MILL.
This mill commands the universal admiration of sawmill men everywhere. As its merits become known, the demand for it increases. Orders are coming from every section of this country, Canada, Cuba, and South America. It is suited for every section of the country, and wherever there is timber to be sawed, no matter of what character how hard, how large or how small. Two extensive manufactories are now engaged in building these mills, yet it is almost impossible to turn them out as fast as they are wanted. They embrace several valuable patents and improvements, and contain all of the following advantages:
Simplicity—Both the mill and power are so simple in their construction that any one of ordinary mechanical ability can comprehend them, put them up and run them without danger or difficulty.
Portability—The whole establishment can be very quickly taken apart and put together, thus rendering it easy to be moved from place to place as desired, and saving the necessity of drawing the logs a long distance to it.
Durability—It is constructed in the most solid and substantial manner, runs perfectly still, is not liable to get out of order, and will last for years without repair.
Rapidity—It will saw faster than any other upright upright mill. The speed of the saw is about three hundred strokes per minute, and the feed from one-eighth to three-quarters of an inch per stroke. Thus, at a medium speed the saw will cut through a log twenty-four inches long in about three minutes. From this data any one knowing the character of the timber can calculate how much it will do.
Efficiency—It does its work well, cuts smooth and straighter than the ordinary mills, and the arrangement of the saw is such as to render it utterly impossible for it to run out of line.
Cheapness—The entire cost of the mill, with fifteen horse power and everything all complete and ready for running, boxed and ready for shipment to St. Louis, is only $1,750.
This mill requires less power to drive than any other mill, and the power furnished is sufficient to drive custom machinery.
A circular containing full particulars will be sent to any one desiring it. All orders should be addressed to BRAGG & BURROWES,
Corner Third and Market streets, St. Louis, Mo., sole agents for the Western and Southern States.
