DR. J. M. EMERY'S FAMILY PHYSIC.

There has long existed a public demand for an
effective purgative pill which could be relied on as
sure and perfect in its operation. This has
been prepared to meet that demand, and an extensive
trial of its virtues has conclusively shown
that it is easy to make a purgative pill to
make the best of all pills—one which should have
none of the objections, but all the advantages,
of every other. This has been attempted here, and
with what success would respectfully submit to
the public decision. It would be unfortunate for
the patient, however, that almost every purgative
medicine is accompanied, and in many cases
caused, by the most distressing and dangerous
effects. This is not. Many of them produce so much
gripping pain and revulsion in the system as to more
than counteract the good to be derived from
them. These pills produce no irritation or pain,
unless it arise from a previously existing obstruc-
tion or derangement in the bowels. Being purely
vegetable, no harm can arise from their use in any
quantity; but it is better that any medicine should
be taken judiciously. Minute directions for their
use in the several diseases to which they are ap-
plicable are given on the box. Among the complaints
which have been speedily cured by them, we may
mention Fever, Cholera, in its various forms
of Jaundice, Indigestion, and Loss of Appetite,
Lithemesis, Irritability, Bilious Headache,
Bilious Fever, Fever and Ague, Pain in the Side
and Loins, and the various forms of Constipation,
and all the sequelae of deranged action in the liver. As
an aperient they afford prompt and relief in
Constipation, Piles, Cholera, Dysentery, Hemorrhoids,
Sciatica and Neuralgia, and all the various
affections of the bowels, and in all cases, without
impairing the strength, or producing any
injurious effects. It is a safe and reliable
purgative, and is well adapted for the use of
