Spelling for Advanced Pupils. As the exercise for advanced pupils is now conducted, in many of our schools, it is defisient in two very important particulars; Spelling is not frequent enough and pupils do not spell a sufficient nums ber of words. Pupils of all agen ought to spell every day, even in the high schools and Academies, and first class Grammar schools, where in many cases it is much less frequent. A weekly, semi-weekly, or any other "occasional" spelling exercise, is not often enough. Such is the

neral rules for spelling can be given.

speller must become so mainly

y distroc memory and continued drill. For want of time, the exercise, if an and one, is generally too short. But few words can be actually spelled by each pupil. Listening to the spelling of others may be, and is, beneficial; but to a far less extent than spelling for ourselves. This want of time can be in a words written instead of being spelled orally. But little ingenuity is necessary on the part of the teacher, to conduct the exercise so as to make it a time-saving one. Let the words be written on a let the words be read aloud and corrected, or, which seems preferable to us, let them be written on paper, with the pupil's name at the head of the slip; and then let a pupil, called up at random, read the words, while others check on their respective lists those words they have missed, and write them out correctly on the back of the paper. The slips should then be collected and passed to the teacher, that it may be known if the work is done neatly, honestly, etc. In this way fifty, or even seventy-five, pupils in a Grammar or High School, may spell from fifteen to forty words each, daily, and never occupy more than ten minutes at a time. This accustoms one to the kind of spelling that must be practiced in after life. Many children will spell well exally, from a habit of associating the orhography of a word with the sound of it in spelling aloud. Such, however, are not always correct or ready spellers when called upon to write. It is only in writing, of course, that proficiency in spelling can be considered of any real or
