LOOK TO YOUR INTERESTS! STEAM FERRY BOAT

Brownville, rest Nebraska.

To those in the States contemplating going to the Nebraska and Kansas GOLD MINES,

The undersigned desire to say, and in so doing will not practice deception; that there are advantages to be secured in Crossing the Missouri river at Brownville, ing. Good layers of Anna, Rogers' Hybrid, 12 kinds also Clara, Cassidy, To Kalon, Rebecca, Miller's Louisa, Logan, Emily, Canby's August, Hudson, H. Prolific, Cuyaboga, &c. cord, grown with especial care for immediate bear- and outfitting at, and starting from that point, not is much more abundant, being mexhaustible the ntire season. Here, then, is a desirable place to recruit stock before starting on the Plains. Stock can also be purchased here on very favorable terms The Brownville Steam Ferry boat, being the best n the River, offers peculiar inducements for cross-Wholesale descriptive list sent to those who wish | ing at this point. It is large and commodious; with

We undertake to say that the business men of Brownville areas well prepared to serve those wishing supplies, with a superior quality and on as favorable terms as can be found elsewhere. Everything desirable can be purchased in Brownville, such as Provisions, Clothing, Mining Imple-

ments, &c., &c. The Route from Brownville to the Mines is universally admitted by those who have traveled it and others, to be superior in every respect. Brownville is about midway between St. Je. and Omaha. As o distance, an examination of the map is all that s necessary to prove to any one that it is nearer from here to the mines than from any other point on the Missouri. On this route wood and water abound the entire distance, while on many others, wood has to be hauled for many days. Garden, Field and Flower Seeds, The foregoing facts are fully and satisfactorily esablished by the immense travel of last year, and those who adopt it the present season will have no

cause to regret having done so. Therefore Cross the Missouri River at and start from Brownville. JOHN CODDINGTON & CO.,

Proprietors Steam Ferry Boat.

AN asperient and Stomachic preparation of IRON Purified of Oxygen and Carbon by combustion in Hydro-Sen. Sanctioned by the highest Medical Authorities both in Europe and the United States, and prescribed in their practice. The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and herwise slokly complexion indicate its necessity in most every conceivable case.

Impxious in all maladies in which it has been tried, has proved absolutely curative in each of the following In Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Scrofulus Tuberculosis, Salt Rheum, Mismenstruction. Whites, Chlorosis, Liver Complaints, Rheumatism, Chronic Headaches, Intermittent Fevers, Pimples on the Face, &c.

In cases of GENERAL DEBILITY, whether the remi of acute dicease, or of continued diminution of nervos and muscular energy from chromic compilation, one tria of this restorative has proved successful to an extent become forgotten in their own neighborhoods, have said denly re-appeared in the busy world as if just returned from pretracted travel in a distant land. Some very signal instances of this kind are attested of femule sufferers, emaciated victims of apparent marasus sanguineous exhaustion, critical changes, and that on plication of nervous and dyspeptic aversion to air nucexercise for which the physician has no name, IR NEEVOUS AFFECTIONS of all kinds, and fo reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for unlike the old exides, it is vigorously tonic, without being exciting and overheating; and gently, recularly aperient, even in the most ob-tinate cases of costivers without ever being a gastric purgative, or indicting a It is this latter property, among others, which makes it so remarkably effectual and perwanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them. In DVSPEPSIA, innumerable as are its causes, a signle

box of these Chalybeate Pitts has often suffeed for the most habitual cases, including the attendant Confinence In unchecked DIABRHEA, even when advanced to DYSENTARY, confirmed, emeciating, and apparently malignant, the effects have been equally declaive ann In the local pains, loss of fiesh and strength, debild fating cough, and resultient beetle, which generally is dicate INCIPIENT CONSUMPTION, this remedy by allayed the slarm of friends and physicians, in sovera very gratifying and interesting instances. In SCROFULOUS TUBERCULOSIS, this medicate iron has had far more than the goods effects of the most cautiously balanced preparations of todine, without any of their well known liabilities. The attention of females cannot be too confidently in-vited to this remedy and restorative, in the cases pecu-In RHEUMATISM, both chronic and inflammatory-in the latter, however, more decidedly-it has been invaribly well reported, both as alleviating pain and resideing the swellings and stiffness of the joints and muscles. In INTERMITTENT FEVERS it must necessarily be a great remedy and energetic restoralize, and its pro-gress in the new settlements of the West, will probably be one of high renown and usefulness No remedy has ever been discovered in the whole his tory of medicine, which exerts such prompt, happy, and fully restorative effects Good appets a complete discition, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise. Put up in flat metal boxes containing 50 pilts, price 50 cauts per box; for sale by druggists and dealers. Will be sent free to any address on receipt of the price. Att

etters, orders, etc., should be addressed to R. B. LOCKE & CO., GEN. AGENTS, 20 Cedar of ., N. Y.

McCORMICK'S

Mower. Reaper Manufactured by C. H. MCCORMICH & BROS.,

CHICAGO, ILLS. Twenty-five Thousand Sold During the last six years. An Average of over 4,000 each Year. Sales have

increased from 1600 in '54 to 5,000 in '60. As a Reaper, the "McCormick" has been before te American public for the last twenty years, and uring that time has gained a reputation which is "World-Wide." Notwithstanding the yearly increasing competition, and the host of inventors engaged in the development of Reaping Machines, the McCormick" leads the van-the acknowledged superior of all in the march for practical icuprove-

The representations made by other manufacturthat the McCormick was "once" a noted Reaper, but is now antiquated, is simply ridiculous, as the in-creasing demand will prove. No single establish-ment in the WORLD, manufactures so largely of these implements, and none expends equal money time or talent in reliable improvements.

Many changes have been effected during the past season, and for 1861, the "McCormick" is presented greater attractions than ever before. As a Reaper

SIMPLICITY, STRENGTH AND DU-RABILITY commend it to the farmer, while its espacity for work, with economy of power, give it the preference over all others.

The compacting the frame, thus securing a more erfect balance to the machine: the position of the raker, in the rear of the driver, thus placing the weight where it should be, and relieving the weaker parts of the machine; the decreased weight and light indentation of the sickle, the Caster wheel, and other improvements added, have materially lessened the direct draught, and so obvinted the side draught that many assure us that it does not now vxist. The draught of the Reaper is so light that in numerous instances the large four-horse machine is worked with but two horses.

As A Mower, The machine of 1861 will be found fully equal o vny test that it may be submitted to. The slight indentation of the Sickle, its lightness and combination with the beam and fingers, allows an increase of motion not practscable in other machines, thus

enabling us to do good work, with a a slow team, ex-en, even, working well. Our Improved Guard and Patent Cleaner, effectually prevents choking, no matter what the condition of the grass, while our new divider point also added largely thereto, separates badly ludged and tangled clover or grass, where other machines fail

There is also a great advantage in our serrated sickle edge over the smooth, as it does not require ening so often, thus saving time. Our Sickle will frequently run through an entire harvest withcut once grinding, while the smooth edge must be ground once each day, if not oftener. With a smoth edge the draught increrses as the knife become dull. Our draught is uniform, and in repeated trials during the season of 1860, proved far lighter than single Mowers, cutting at the same time from twelve to eighteen inches wider. Our Mower can be used with or without the reel

ers who may desire it, are at liberty to work our nachine through the harvest, with any other, and keep, and pay for, the one preferred.

Pamphlets with full description of improvements estimonials, &c., can be had by application to THEODORE HILL, Agent. Brownville, Nebraska,

out 670 pounds.
