Kissing on the Sly.

His manly whiskers swept her cheek— She uttered no reply— How could she part her lips to speak, While kissing on the sly?

THE RIGHT RIGID RULE DECLARE THE DOG To be a crime so high, No lover dare deny the deed

While leading thus a single life, What happier lack than I, When opportunity without strife.

My mode of treatment is as follows and whoever tries it will affect a cure in nine cases out of ten.

Condemed colonies should now be disposed of. When the bees are to be killed with the fumes of the sulphur pit, it is much the best way to drive out the bees first.

Shepherd Dogs. In some remarks upon the Dogs of which the Shepherds use to assist them in tending their flocks upon the mountains, the Ohio Farmer says the reason why shepherd dogs do not have the attention in this country that they do in Europe, is owing to a misunderstanding of their uses, and a different system of sheep husbandry.

Trust In God. "I could write down twenty cases," says a pious man, "when I wished God had done otherwise than he did; but which I now see, had I my own way, would have led to extensive mischief."

MELVIN MILL, NEMAHA CITY, NEBRASKA. Cash for Wheat. The public are informed that at Melvin's Mills that \$900,000 worth of wheat is being paid for each merchantable wheat.

THE LEWIS WALDRUP, HOUSE SIGN AND ORNAMENTAL PAINTER, GLAZIER AND PAPER HANGER, BROWNVILLE, N. T.

The New and Best Music Both Vocal and Instrumental.—by the best American and European composers, arranged regularly every week in the HOUSEHOLD JOURNAL.

J. SCHUTZ. Would you like to have the most beautiful of Brownville? Schut's Jewelry is the answer. We have on hand well-seasoned Black Walnut lumber for that purpose.

FAIRBANKS' GREENLEAF, 172 LAKE ST., CHICAGO.

Aplary in October.

Prepared by M. Quimby—by request. It is now time to decide on what colonies to winter.

The surplus honey for market is usually forwarded this month and next. It is small glass boxes, it should be packed in cases holding what may be easily handled—fifty or a hundred pounds.

Plant Small Trees. Young America is in such haste to realize results, he can't wait for trees to transport huge sons of the forest into his new places by some sort of patent machinery.

Now, watch these trees, from year to year. How healthful they look, in every limb and twig and leaf!

Verdeil's method is to separate the meat from the bones, and as far as possible from the fat; then cut it into slices from one-third to one and a half inches in thickness.

It is now nearly in the condition of boiled meat but it has retained all its ingredients from the coagulation of the albumen, and its taste is like that of roasted meat.

Being removed from the steam-chamber, the flesh is placed on trays or hung on hooks, in another chamber which is warmed to a temperature not exceeding 120°.

Cleaning a Miller's Bolt—Another Method. To the Editor of the American Agriculturist Five years ago I cleaned a miller's bolt that was wasted with flour, by applying alcohol with a brush, and then rubbing the bolt with dry woolen cloths.

Five years ago I cleaned a miller's bolt that was wasted with flour, by applying alcohol with a brush, and then rubbing the bolt with dry woolen cloths.

The best thing that I have used to clean the bolt from beards, that will work in and hang in the cloth, is to take a piece of common cotton sheeting over the reel so that it will drag on the bolting cloth.

It should be of the same length with the reel. I have used it for four or five years. It is not necessary that it should drag on the reel all the time; it should be tacked on so that it will hang down by the side of the reel when not wanted.

It is much better than spending a day occasionally with a razor in shaving the beards from the bolt cloth.
