It is a book that will be found in every school, and is a most valuable acquisition to the library of every parent. It is a book that will be found in every school, and is a most valuable acquisition to the library of every parent. weather—This Spring, in Nebraska, at least, has had no parallel since the territory was settled. To-day, the grass is but just beginning to show through the ground, and the look almost as gloomy as in midwinter. The States, in 1843, the season was not so late as the present, the following summer was remarkably wet. If this year is similar we may look for excellent crops of Corn, on the upland prairie, from want of cultivation, it should be watered with weeds.

THE ATLANTIC MONTHLY.—The May number of this periodical is on our table. Its contents of this number are: Man and the sea; My garden; Lyell and the street; The south breaker; The study in natural history; The titmouse; Saltpetre as a source of power; Weather in war; Written under a portrait of Theodor W. H. Hindrance; The stateship of Richelieu; Under the snow; In its principles, development, incidents; The volunteer; Speech memorable Preserved Doe in secret; The Atlantic has the most able of writers of any periodical in the States. The tales in the Atlantic are found very interesting to those who admire the New England style of writing.

Articles on "Methods of study in natural history," are from Prof. Agassiz, and in the country who are circulations in the U. S. Senate, praying for the diversion of the money appropriated for the War Tax, should immediately forward them to our Delegate in Washington, or return them to this office. There is a number yet in this issue that have not been sent. They should be delayed another day. The people of this county, so far as we are informed, are, to a man, in favor of the proposed diversion.

—One day last week while S. L. of this county was absent from his garner, crib and stable took from the burning prairie, and confined them with their contents. His was some 14 by 65 feet, and corral with hay, being on and about it some 40 tons. His grain was recently threshed, and is almost an entire loss; as the shingle was so badly smoked he could not be saved for bread. The loss was every ear burned. A good lot of wheat, rye, corn, and nearly all his live stock were also consumed. It is supposed that he had taken all the necessary precaution, having some time ago moved the prairie for 25 or 30 rods and plowed a number of furrows. A whirl wind carried the fire from the prairie into the hay. Loss about \$2000.

THE MISSOURI.—The Missouri is higher than it has been since Nebraska was settled. At this point, the banks being so high, it has not yet overflowed; but the water in the bottoms, both above and below, are now covered. Entire fields, in some places are destroyed. At Nebraska City, we learn from news, they have not been able to get the mail from the Iowa side several days. At all other places up to Council Bluffs, we understand, it is impossible to cross in the Ferry boats account of the high water on the bottom. Below here, at several places, some difficulty is complained of. In some places the people are taking their houses, to prevent them from falling into the river. Near Nebraska City the river has washed the bridge away to the distance of 20 or 30 rods.

H. H. ELBERT, of Plattsmouth, has been appointed Secretary of Colorado Territory. If good looks were a requisite qualification for that office, the President would have found but few that were equal to him.
