structor, and Prof. Schreber's Pangymnastikon.

No recent Managine-paper has excited more genera interest than the arricle in the analyst Atlantic, on "The New Gyphastics." The present work is a complete exposition of the system of which that article

The amber of this work has been for many years engaged in teathing Gymnastics. The book describes and Hinstrates his New System of Physical Training. This system has had the proctical test of long and varied use. It comprises exercises with Dumb Bells, Rings Wands, Cinbs, etc., all of which are made perfectly clear by full explanations, while many are illustrated by pictorial representations of the position of the body

required to perform them. The Dumb Bell Instructor, connected with this work is of the highest interest and importance. It is designed for home use, and gives a great variety of Dumb Bell Exercises, together with a carefully-selected progressive series for every-day practice.

The Pangymnastikon is a very simple, useful, and cheap piece of gymnastic apparatus, upon which all gymmastic exercises may be performed, and which can be introduced, at small cost, into any private house .-It is fully described and illustrated in this volume. The "New, Gymnastics" should be read in every femily in the land where exercise is valued as a means of health. Ladies, especially, will find in it a great variety of Easy, Simple and Invigarating Exercises, all of which may be practised in the r own bimes.
