## is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the con-

stitution, descending "from parents to children unto the third and fourth generation ; " indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous com-plaints, but they have far less power to withstand the attacks of other disenses; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous ; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate, the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

immigrants and persons travelling or temporarily

residing in the malarious districts. If taken occa-

sionally or daily while exposed to the infection,

that will be excreted from the system, and cannot

accumulate in sufficient quantity to ripen into dis-

ease. Hence it is even more valuable for protec-

tion than cure, and few will ever suffer from Inter-

mittents if they avail themselves of the protection

of the Discase.

This is a remedy so universally known to surpass any other for the cure of threat and long complaints, that it is useless here to publish the evidence of its virtues. Its unrivalled excellence for coughs and colds, and its truly wonderful cures of pulmonary lisease, have made it known throughout the civilized nations of the earth. Few are the communities, or even families, among them who have not some personal experience of its effects - some living trophy in their midst of its victory over the sable and dangerous disorders of the throat and lungs. As all know the dreadful fatality of these disorders, and as they know, foo, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.
