THE AUTOMATIC ORGANS. In presenting the Automatic Organ, we boldly announce the greatest triumph in musical instrument of the age. During the past half century, the French and Germans have manufactured reed instrument with double bellows, and two pedals for the feet to operate, but the want of the reversed or Exhaustion bellows, (which is the only bellows used in our instruments), made it impossible for them to produce the

mellow, rich and musical tone for which our instru ments are celebrated. I nother objection to this method of blowing was that, both feet being occupied, no opportunity was offered for the management of the swell. Within the past two years, instruments constructed on this European pian of "double blo wors," have been manuf actured in this country, and to conneract this difficulty (want of a swell) a lever has been projected from the centre of the instrument, to act upon the swell, and operated by the knee. The inconvenience and contortion necessar" to effect this object are disagreeable ennugh to a gentleman, but to a lady the use of such an appendage is nearly impossible.

Our Automatic device obviates this difficulty entire-ly, the simple act of blowing with more or less force giving the desired increase or decrease in the volume For seventeen years the superior excellence of our Melodeons has not been questioned, and for two years past the enormous demand has made it impossible for us to meet our orders promptly. With our increased facilities, we feel warranted in assuring our patrons that their orders will be promptly met, and solicit a continuance of their patronage.

GEO. A. PRINCE & CO.

Caution to Purchasers. All our instruments have upon the name board, in full. "GEO, A. PRINCE & CO." When a dealer represents any other instruments as "the same as ours," it is usually a mere attempt to sell an inferior instrument, on which he can make a large profit. P. SALESROOM, 536 BROADWAY, N Y. 252 WASHINGTON, St. BOSTON

THIS MACHINE is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be Simplicity and Perfection Combined. It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will neither RIP or RAVEL, and is alike on both sides; performs perfect sewing on every descrition of material, from Leather to the finest Nansook Muslin, with cotton, linen or silk thread, from the coarest to the finest number. Having neither CAM nor COG WHEEL, and the least possible friction, it runs as smooth as glass,

Emphatically a Noiseless Machine. It requires FIFTY PER CENT less power to drive it than any other Machine in the market. A girl twelve years of age can work it steadily, without fatigue or injury to health.
Its strength and Wondorfel Simplicity of construction renders it almost impossible to get out of order, and is GUARANTEED by the cempany to give entire satisfaction. We respectfully invite all those who may desire

to supply themselves with a superior a ticle, to ome and examine this Unrivalled Machine. But in a more especial manner do we solicit the natronage of Merchant Tailors, Coset Make Gaiter Fitters,
