THE AUTOMATIC ORGANS. In presenting the Automatic Organ, we boldly announce the greatest triumph in musical instrumof the age. During the past helf century, the French and Germans have manufactured reed instruments Eor a Variety of Diseases. with double bellows, and two pedals for the feet to operate, but the want of the reversed or Exhaustion Bellows, (which is the only bellows used in our instituments), made it impossible for them to produce the mellow, rich and musical tone for which our instru-

ments are celebrated.
Inother objection to this method of blowing was that, both feet being occupied, no opportunity was of-fered for the management of the swell. Within the past two years, instruments constructed on this Euro pean pian of "double blowors," bave been manufact ured in this country, and to counteract this difficulty (want of a swell) a lever has been projected from the centre of the instrument, to act upon the swell, and operated by the knee. The inconvenience and contor tion necessar to effect this object are disagreeable canugh to a gentleman, but to a lady the use of such an appendage is nearly impossible. Our Automatic device obviates this difficulty entirely, the simple act of blowing with more or less force giving the desired increase or decrease in the volume

For seventeen years the superior excellence of our Melodeons has not been questioned, and for two years past the enormous demand has made it impossible for us to meet our orders promptly. With our increased facilities, we feel warranted in assuring our patrons that their orders will be promptly met, and solicit a Gravel, Chronic Catarrh of the continuance of their patronage.

SALESROOM, 536 BROADWAY, N Y. 252 WASHINGTON, St. BOSTON

THIS MACHINE is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be Simplicity and Perfection Combined. It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will neither RIP or RAVEL, and is alike on both sides; performs perfect sewing on every descri, tion of material, from Leather to the finest Nansook Muslin, with cotton, linen or silk thread, from the parest to the finest number.

Having neither CAM nor COG WHEEL, and the

least possible friction, it runs as smooth as glass, This is the only Machine in existence which combines Emphatically a Noiseless Machine. It requires FIFTY PER GENT less power to wheel and crank (geared to run three turns of the drive it than any other Machine in the market.
