Jim Smiley and his Jumping Frog.

BY MARK TWAIN.

MR. A. WARD: Dear Sir: Well, I called on a good natured, garrulous old Simon Wheeler, and I inquired after your friend Leonidas W. Smiley.

I found Simon Wheeler dozing comfortably by the bar room stove of the little old dilapidated tavern in the ancient mining camp of No. 36.

Simon Wheeler looked me into a corner, and blocked me there with a chair—and then sat down and reeled off the monotonous narrative which follows this paragraph.

There was a feller here once by the name of Jim Smiley, in the winter of '49—or may be it was in the spring of '50—I don't recollect exactly.

Well, this year Smiley had got terriers and chicken cox, and ten cats, and all them kind of things till you couldn't rest.

By your leave, I did not think that a continuation of the history of the enterprising vagabond, Jim Smiley, would be likely to afford me much information concerning the Rev. Leonidas W. Smiley.

Great Decline in Prices.

The grain market in this city during last week was subject to most violent fluctuations.

During the same period the wheat market was also unsettled, and we have to denote a decline in prices of 20c per bushel on No. 1 spring, and 20c to 21c per bushel on No. 2.

CONGRESS. The present Senate stands 38 Radicals and 13 Democrats and Conservatives.

CHICAGO. According to the books of our architects and builders, the value of the new building improvements in Chicago the present year amounts to nearly \$7,000,000.

Chicago is growing with amazing rapidity. We doubt not that during 1866 there has been an increase of at least 20,000 in our population.

Among the passengers in the City of Paris, arrived at New York the other day, were five Japanese, who have come to this country.

Salt and coal have been discovered in extensive quantities in Colorado. They have a coal vein eleven feet thick only thirteen miles from Denver.
