

Governor's Message.

On our first page will be found Gov. Butler's Message to the special session | they commenced the work of destruction, Davis. of the Legislature now convened at Omwha. The Message is an able one both for the brevity and force with which it caped uninjured. As soon as their wings treats the many points made in the call, grew out they left-about the 15th of and its earnest, zealous tone with which it urges action for the general welfare. It is a document which will stand comparison with any, and is well calculated to give Nebraska a good start on the path of prosperity and greatness.

Rockport and the Railroad.

As we have been heretofore somewhat puzzled to ascertain the views of the Alchison County Journal on the railroad prospect east and west, we are even chison county. It sums up the situation

Air Line Railroad company, H. Davis, bability migrate before the crops could in President-the other, the Alexandria & any degree be affected by them. Nebraska City Railroad company, E. ference there can possibly be between appear without doing much damage. In Senator Doom read for the information the two roads is the terminus at this end -the former crossing the Missouri river Kearney; the latter, to cross at Nebras- in Jackson county, Mo., who, last fall, row morning. ka city and thence west to form a junction with the Pacific railroad. In either instance Rockport will be made a point on around his field last fall, the grasshopthe line so that we have but little interest pers would gather in it at night when he as to who builds the road."

manifested by the author of the above is plainly indicated by the article. Is it a matter of "little interest" to Rockport to be upon the most direct line between the Atlantic and Pacific, so "little" that it would favor-as it has done-the line proposing a detour of thirty miles north spring the young the young ones were of an air line connection with the Paci- hatched, and more than 'cl aned us out,' fic? Is it a matter of "little interest" leaving after their wings had grown. to Atchison county whether a railroad bridge shall eventually cross the Miswhether it shall cross in Iowa? Is it a whether it cross through the most densely populated district of Nebraska which is untouched by any grant of lands for railroad purposes or whether the road a more thinly populated section already stripped of its odd sections for the benefit of another road?

These questions seem to us of sufficient "interest" even to cause an effort east of us to push the road in this direction, and we feel easy so far as that is concerned, and only mention these points to enlighten our friends across the way.

The Journal orges united action; this can only be secured by working on the line whose aim is direct for its object and which is stricking for the natural advantages which offer along its route. The most direct line from San Francisco to Philadelphia and New York will, within twenty years, be the great and leading railrood between the two oceans, and railroad companies know this too well to miss the chance, or circle around over the country to take a momentary advantage

Served 'em Right.

The most singular contest which ever occurred in Nebraska came up before the present extra session of our Legislature. The Democracy of the Dakota district, acting under direction of their leaders, made no nominations for the State Leg-No. of neat cattle islature and refused to vote for State Legislators; the Republicans, on the con- No. of mules and asses 168. trary, nominated and elected their State ticket. The Democracy finding State a No. of sheep fixed fact, cast about them to regain the No. of swine lost ground. The Commissioners being Value of the same "square-toed," order an election, which, No of carriages & vehicls 845 being "out of time" and without authority. Republicans did not attend, and the "unterrified" had it all ther own way. Value of other property not Their ticket went through a "skootin," enumerated and came to the Legislature on a contest with as much success "as a king of Total valuation France, who, with twenty thousand men, WM. H. HOOVER, Co. C'k. Attest: marched up the hill and then marched down again,"

ion that there would be no meeting of the Missouri side below Rule, started for the Judiciary Committee inquire what Liquors, Wines, Ale, Bear, Congress in July, and further that this is the latter place, with a sum of money to legislation is necessary to transfer from Williams, and others of the House.

The Grasshopper.

From our exchanges we make the following selections of this lively little in-

The Liberty (Mo.) Union publishes a pect to record another. correspondence from an old settler who

"The grasshoppers made their appearance on the 12th and 13th of September. 1820. They fell as thick as had, darkening the sky as if the sun was eclipsed; | S. Reeves. the earth was completely alive with them. They stripped and devoured every green President pro tem; L L Holbrook, of thing, and deposited their eggs in the Cass, Secretary pro tem. ground by bushels. What would be the result the people knew not; they were were appointed a committee on credenhopeful that the freeze would kill them tials, who reported the following Senators during the winter, but not so. Next entitled to seats :___ spring, about the 15th of May, they hatched out by the billions, and the earth | court-H Baird. was again literally alive with them, and entirely devastating the cotton, flax, Cass Lancaster, Saunders, Seward wheat, hemp and tobacco crops, but to and Saline-J E Doom. the great joy of all, the young corn es-June. They came from a southwest di- O. Holden. rection and went off in a northeast

The Weston (Mo.) Border Times says they are hatching out in that vicinity by the million but predicts they will leave without doing much damage.

The Kansas City Advertiser, 15th,

The grasshoppers are said to be disappearing in some localities. They hatch and grow to about balf their usual size when from some cause they suddenly disappear. They are confined to localities. pleased to read its last week's issue, al- In one field they will be found on large Robinson; Sergeant at-arms, D W Mc though Rockport seems in it to be At- numbers, while in others not one can be seen. They have done no harm as yet, Pages, Alvin Kennard and Albert Par nor is it probable that they will, for even should they appear in as great numbers "The Mississippi & Missouri River as they did last fall, they will in all pro-

The St. Joseph Herald speaks of them Pratt Boell, President. The only dif- in that vicinity, but looks for them to disthat vicinity they seem to have hatched of the Senate a resolution relative to tion with the Pacific railroad at Fort localities. The Herald tells of a farmer saved his winter wheat by scattering hay would set fire to it and burn them up .-It seems to us that the "little interest" This, repeated several times, saved his wheat which is now doing fine.

A writer in a Colorado paper says: myriads of these insects invaded this section, pretty thoroughly 'cleaned out' sentatives : our farmers, deposited their eggs, and left for parts unknown. The following J W Dewesse and - Collins.

In this vicinity they have hatched in patches only, and are doing comparativesouri river at some point in its bounds or ly no damage save on new ground broken up last year, where they are feeding to matter of "little interest" to the people a considerable extent. In some instance along the proposed road, or the company, they are preying upon wheat on new ground while within forty rods wheat upon old ground is untouched. Another circumstance which coincides with the Kansas city article is that although they shall run out of its course to pass through have been hatching in this vicinity for the past four weeks we have heard of not over a dozen, and have reen none, that were half or even quarter grown, J T Griffin. the largest being about the size of a common house fly, at this point they either stop growing or disappear, and we are inclined to the latter idea as their number seemed about the same up to the late heavy rains, since which they seem to be

lessened by at least one-half. In this connection it may not be amiss to give the result of an experiment made by Col. Fornas in his garden in this city. W. Baltzley. He saturated saw dust in coal oil and sprinkled it around his plants, and avers that since that they have damaged nothing in the vicinity of the coal oil and
