Consistent.—One of our citizens, while opposing the grading, has dug a celler and deposited the dirt, 30 or 40 yards, upon 4th street, on a spot which is now under contract to be graded down. The City has already enough on its hands. If there is not already there should be an ordinance prohibiting the depositing of dirt upon any street without permission from the Council.

Success Upon Merit.—If there is an instance upon the records of our country where an article of American manufactory has made its way to universal favor soly upon its own merits and without extreneous aid it is that of the *Best Chemical Saleratus.* It has only to be sold in one place, and it is demanded in in another, and so it has gone on increasing in favor until the products of the extensive Chemical Works of D. B. Deland & Co., at Freeport, Monroe County, N. Y. are now immense.

This article is made only at theseworks by a process known only to the proprietors, and is better for all purposes than Soda. Try it.

Statement of City Engineer.

The following statement of the grading now under contract has been furnished us by the City Engineer:

Main Street, McGowan has 2500 yds,			$ 750

do do Dryden has 1000 "		bet 9 a 11	300

Third St., McGowan & Co. 1500 "			450
Fourth St., M F Boyd, 1500 "			450
do do O B Howett 1200 "			360
Total			$12,110

In addition to the above a small contract of 166 yards on Water Street near School House. And one of 1500 on Second Street, between Main and Atlantic, which were paid for with City Orders.

The above contracts have all been commenced except three, two of which wil be under operation next week.

Several Bridges and Culverts are necessary, the cost of which is not included in the above. They will not cost more than one or two thousand dollars.

The contracts are all taken that the Council has so far decided to let, unless it is First Street. A bid for which has been received, but the contract has not been closed.

The grade of Atlantic Street from a point on the levee to where First Street crosses the same rises one foot in twenty. Thence west to near top of hill by Dr. Crane's is a very steep rising grade of one foot in ten. Thence west to 3rd street a falling grade of one foot in twenty. From thence west to 6th street a falling grade of one foot in ninety,

On Main street the grading is nearly finished to 5th street which is as far as the grade is established.

On Water Street the grade was established to 5th street several years ago.

The petition of the citizens asking that $20,000 be expended on the streets only asked that the same be made practicable for travel; and the Council has directed the City Engineer to have the work so performed. For this reason the Council did not think best to establish the grade of the streets farther than already indicated. The grade of the cross streets, between Main and Atlantic is of course dependant on that of Atlantic, Main and Water.

The contrrcts let where the grade is not established will only be sufficient to make the streets practical for travel, and the excavations are certainly above any grade that will ever be established.

The number of men now at work on the streets is fifty-one, which number will be nearly doubled within two weeks. Nearly all of these are strangers who would not have come but for this employment. Several of them, having families, have erected houses to live in, and others contemplate doing so immediately.
