

AGRICULTURAL.

R. W. Furnas, Editor.

Meeting Nemaha County Agricultural Society.

There will be a meeting of the Nemaha County Agricultural and Mechanical Association at the Reading Rooms of the *Nebraska Advertiser*, on Saturday afternoon at 2 o'clock, October 17th, 1893. It is not only important but essential that every officer of the Society be present at that time, as business of the utmost importance will be transacted.

By order of the President,
H. O. MINICK, Secy.

List of Premiums Awarded by the Nemaha County Agricultural and Mechanical Association, at its Third Annual Fair.

Owing to some omissions and errors we this week republish the premium list—Extra copies for mailing can be had at this office.

THE FLORENCE
LOCK-STITCH

Sewing Machine

It has again carried off the highest prize at the principal Fair of the present season, commencing with the New England Agricultural Society, in September where it was awarded

THE FLORENCE!
and that too in fair competition with other First Class Machines

For five consecutive years when it has been examined by the best mechanics in the country and pronounced the best constructed and most reliable machine, simple than, on account of its simplicity was given

THE FLORENCE!
and that too in fair competition with other First Class Machines

At the Fair of the Maryland Institute, which closed a few weeks since at Baltimore on the 27th of September, the superiority of the

had the satisfaction of seeing their favorite again triumphant and for the second time bearing off the highest honors of the American Institute.

Below we give an extract from the Report of the committee on Sewing Machines read at the close of the Fair:

The whole number of Sewing Machines on exhibition is thirteen, of these twelve are entered in competition. The article bearing the number 22 (FLORENCE) has the highest number of medals secured.

It is stated that this is better than any of its class shown at this fair.

IT'S MERITS ARE:

1st. Good Material and Thorough Workmanship.
2d. More absolute Novelty than marks the usual Improvements in Sewing Machines.

It is the ingenious arrangement of a positive motion for adjusting the thread during the passage of the shuttle and gathering up of it in the finish of the stitch.
3d. The reversible feed.
4th. The variety of work that it can do upon it.
5th. The force of the work that it receives as well as it.

We therefore decide that it receive the award of first class.

W. PRATT,
L. J. KNOWLES,
St. Joseph, Mo.
J. W. GILBERT,
St. Joseph, Mo.

This is to certify that the foregoing is a true extract from the Report of the Committee on Sewing Machines at the 77th Annual Fair 1897.
New York, Nov. 17th, 1897.

It would seem as though this successful of trophies should be sufficient to convince any unprejudiced person of the great superiority of the
