Consisting mostly of Norway Spruce, Austrian. Scotch and White Pines. Balsam Fir, Arbor Vite, Earopean Larch, European an and American Mountain Ash. &c. Transplant-ed Evergreens, one to two feet high. Duchees of of the most desirable varieties for transplant of-

ason with a bountcous crop of fruit. | winter pruned trees presented black, riety of seed. 3-1-As a rule we may say that the ory of our oldest growers, has the wounds, the trees are less injured than best soil for Indian corn is also best for broom corn. It should be loose, rich and most thoroughly pulverized berries, been so favorable at this sea-thave had a great deal of summer before receiving the seed. 5—The time for planting depends upon the season. We would say, as soon as the danger of frost is passed, the danger of frost is passed, son of the year, as at this time." The Jonesboro (III) Gazette says: "We are informed by some of our most reliable fruit growers that the pruning done; one vineyard nearly ruined by having the ends of the vines twisted off to stop rapid growth. It is true that very light summer and the ground sufficiently dry to prospect for a good crop of fruit is very encouraging. In some orchards early harm, but if done in early spring be-6-7-If planted in hills, they should budded peaches are injured ; in others fore the sap starts, it will do less harm. be three feet apart, or a little less, each they promise good crop. Strawbery In fact I cannot say that I have ever be three feet apart, or a little less, each way, and five or six stalks left in each, but a better crop will probably be ob-tained by planting in drills, three and a half feet apart, leaving the stalks five or six inches apart in the row. If theseed is properly cleaned—the stems all removed—it may be planted by a seed planter, and should be covered about an inch deep. S—We think the best brooms are made of brush on which the seed had

not entirely ripened out. 9-If the corn is tabled (broken down) the brush will retain its shape till the seed is ripe enough to grow, though it may not preserve the bright green appearance which it would have if cut when the seed is in the milk. We have not had experience in the different methods of covering broom

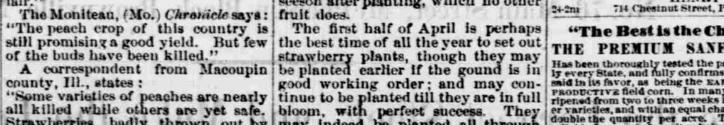

different methods of covering broom corn, or of sorting it for different mar-kets, and we would thank any of our readers to renly to the querrier on best for grapes is considerably. The pros-best for grapes is considered only following only following the most productive, seldomest whelesale catalogue for productive seldomest set of the sector seldomest set of the sector set of the sect readers to reply to the querries on pects for grapes is considered only fails, and bears a full crop the first mailed on applicatiod. CHTHANKS.

# IS IT A PROFITABLE CROP?

Wheat, wool and some other leading still promising a good yield. But few the best time of all the year to set out THE PREMIUM SANFORD wheat, wool and some other leading farm products, command so small prices at present, that farmers are quite generally enquiring for some crop that will be more renumerative, and there is danger that some one erop will be extensively cultivated as to overstock the market. Broom corn has, for the last few years, been a very state of Red Raspberrice, except

made of brush on which the seed had the late frosts will almost totally de- this spring, if you have not got one on stroy the fruit crop in this section of the place already. They are the first

seeson after planting, which no other The Moniteau, (Mo.) Chronicle says : fruit does.
