

The State Journal vs. the Nebraska Advertiser.

Some weeks ago, in reply to our article on the subject of State University, and other matters, connected with the doings of the State Commissioners of Public Buildings, the Lincoln Journal "rested its case," and proposed to "wait until the discoveries and developments of future ages. Recently new light burst in on the hitherto obstructed vision of the Editor, and again he rushes into print, in defense of the stout comings of his own, and again "rests his case," this time "upon the res gesta." That heavy "weight newspaper" under the displayed heading "That Short Turn"—A Statement of Some Facts about the University Building—Some Documentary Evidence Added, publishes letters from Joseph Ward, a bidder for a contract on some of the State Buildings, R. D. Silver, contractor for the erection of the State University, and a few garbled extracts from the proceedings of the Regents of the State University. Mr. Ward says he was called upon to make "such suggestions as I considered necessary or essential." No one will deny this. He says further, "I was given to understand, that at least, \$150,000 was to be expended." Who gave him this to "understand," he does not state. We assert that the Regents did not. He further says that "I considered the change worth at least \$50,000, and the building as cheap at \$150,000 as it would have been at \$100,000 if the first plan." This may all be true, for we know, this is all Mr. Ward says, and is, in no wise, to the point at issue.

Mr. Silver says in his letter that he, on being called upon, "suggested" several principal changes to the "original plan" of McBird, which was the one adopted, "and I would rather build the original one for \$100,000 than the present for \$150,000." Mr. Silver did make the suggestions referred to, and we presume he knows which building he would rather erect at the prices, the "original" or the "present." This is the entire substance of Mr. Silver's letter, with the exceptions of the paragraph hereafter quoted, and is also foreign to the question under discussion. Mr. Silver further says; "I never stated to the Board, or Commissioners, that the proposed change could be made without additional cost." In reply to this we would say that the changes he "suggested," and to which he refers in this letter, were not adopted by the Board at the meeting referred to. The "changes" agreed by the Board, at that meeting, were simply in the matter of window and air ducts. These changes, Mr. Silver did say, in reply to our inquiry, could be made without additional expense.

Now as to the Board of Regents. We were Secretary of the first meeting, and have an accurate copy of the proceedings; and also copied from the books of the Board the proceedings of its second meeting, and here assert that there is not the scratch of a pen in the proceedings of either meeting authorizing or advising, the expenditure of \$150,000 in the erection of a State University Building!

When the business for which the board had been convened was presented, the following is the record.

"The Commissioners of the Public Buildings informed the Board that they had adopted for the University Building the design presented by M. J. McBird, Esq., of Loganport, Indiana."

The design referred to above, was the "original" plan, and adopted by the Commissioners before the suggestions by Mr. Silver, or the "changes" agreed upon by the Board, which, it was stated, could be erected within the bounds of the appropriation of \$100,000.

Then follows the resolution of Mr. Elliott, as follows:

"Resolved, that the Board of Regents approve the general plan for the University Building as presented by the Commissioners, and that they require the architect to make such modifications of the design as may to them seem desirable; but if there should be other plans received by the Commissioners which present any peculiar advantages over that now adopted, the Governor be requested to call another session of the Board of Regents, to further consider the subject."

The foregoing is all the proceedings of the first meeting of the Board touching the point at issue.

At the following meeting in September, the following resolutions were passed by the Board.

Mr. Chase offered the following which was adopted.

"Resolved, That the Commissioners of Public Buildings be authorized to make such alterations in the original plans and Specifications for the University Building in regard to the location of the building, as they may see fit, with the consent of the Architect."

These are additional facts in regard to the question at issue, as the Journal is pleased to argue it. We here re-assert, however, that it matters not if the Board of Regents did authorize the erection of a Building involving expenditures exceeding appropriations made by law; or if all the "prominent citizens" in the State and "public meetings" did the same thing, it was still no legal authority for sworn and bonded officers to violate both the Constitution and laws of the State! This in the real question involved, and at issue, and if the Journal desires further discussion, let him confine himself to the true question.

The M. E. College.

The late annual report of the M. E. Church, of this State, raised a Standing Committee on Colleges and instructed them to consider the propriety of locating and establishing one or two Colleges within the bounds of this State, to be maintained under the management and control of the Conference. They have power to call a State Convention consisting of the Clergy and Laity of the Church, in June next, to which they are to submit their report for its consideration. This Convention will determine from the evidence sent in from various localities desiring the location of such an enterprise in their locality, whether it be wise and expedient for the Conference to maintain a College in this State now, or whether they will recommend their patronage to some outside institution for the present. In membership and material wealth, this branch of the Church perhaps leads all others in the State; but in educational enterprise, the Episcopalians and Presbyterians have several years been the leaders. These important facts are being kept in the leading minds, and influential capitalists of the M. E. Church to duty and vigorous action. It is now a conceded fact that the College every consideration of self respect, interest, the good of the State and the wants of their children, for home instruction, will urge them in this direction. It remains for the brethren and property holders of this city, to take into consideration the propriety of holding out inducements for the location of the School in the vicinity of Brownville. In view of the great strength such a school would bring to the Church in this city, it behooves the members here to be up and doing. The Rev. W. B. Colt, their pious, educated active energetic and business like pastor, should receive proper encouragement in organizing the material and moral forces, necessary to command the attention of the Convention. In view of the additional business the location of a College would create in our city, the inducements it would hold out to intelligent and enterprising immigrants seeking western homes, surrounded by the comforts and advantages of eastern cities, the refinement, morality and intelligence resulting to our own families therefrom, and the consequent rise in Real Estate, which is sure to follow, a well maintained institution of learning, it is a matter of no little interest to every property owner in the city of Brownville, whether he is interested in the property of the M. E. Church or in some other. "By our careless indifference we have lost the chances of two opportunities to secure enterprises of this character, and shall we add still another. We sincerely hope that there may be sufficient interest shown to secure this one in or near Brownville."

"We have nothing to gain by the continuation of the 'discussion' between the Advertiser and Democrat."—Democrat.

Sensible at last. We are glad to know that "truth has impressed itself" on our contemporary, even at a late hour. The readers of both papers will bear witness that the Advertiser's repeated and continued solicitations as to the part of the Democrat, and when both our self and friends thought forbearance had ceased to be a virtue. We are truly sorry if our part of the discussion has had a tendency to "crash out," or weaken the "infit" one, or curtail the "circulation" of the Democrat, and have only to say, if that paper has "enough," we join him in his "good-bye."

The Republicans and Democrats have laid a ticket in the field for the Nebraska City Municipal Election, to be held on the 2nd day of May, next. The News publishes a call signed by some seventy of the best men in Nebraska city, for a Mass Convention to put a third ticket into the field, independent of party machinery. This call is worked as follows, and sounds just a little anti-Democratic:

"There will be a Mass Meeting of the citizens of Nebraska City, at the Court House, on Saturday, 30th inst., at the hour of ten o'clock, a. m., for the purpose of nominating candidates to fill the different offices. Resolutions of the design as to the mode of nomination, and if there should be other plans received by the commissioners which present any peculiar advantages over that now adopted, the Governor be requested to call another session of the Board of Regents, to further consider the subject."

The foregoing is all the proceedings of the first meeting of the Board touching the point at issue.

At the following meeting in September, the following resolutions were passed by the Board.

Mr. Chase offered the following which was adopted.

"Resolved, That the Commissioners of Public Buildings be authorized to make such alterations in the original plans and Specifications for the University Building in regard to the location of the building, as they may see fit, with the consent of the Architect."

These are additional facts in regard to the question at issue, as the Journal is pleased to argue it. We here re-assert, however, that it matters not if the Board of Regents did authorize the erection of a Building involving expenditures exceeding appropriations made by law; or if all the "prominent citizens" in the State and "public meetings" did the same thing, it was still no legal authority for sworn and bonded officers to violate both the Constitution and laws of the State! This in the real question involved, and at issue, and if the Journal desires further discussion, let him confine himself to the true question.

The many residents of this county, formerly of Miami county, Ohio, will regret to hear of the death of WM. H. GARAGAN, one of the old citizens of that county. Also, Mrs. CHAS. BURNS daughter of Geo. D. Burgess.

Programme for the M. E. S. Convention.

to be held in Peru on the 28th, 29th and 30th of June.

WEDNESDAY EVENING SESSION. 1st—Music. Anthem by Normal Class. 2nd—Prayer by Rev. T. B. Lomax. 3rd—Singing by the choir. 4th—Address by W. B. Colt, D. D. 5th—President's Address by M. Pritchard, twenty minutes.

THURSDAY MORNING SESSION. 1st—Religious Exercises, thirty minutes. 2nd—Reading the Minutes. 3rd—Music by the choir. 4th—Election of officers and miscellaneous business ten minutes.

FRIDAY MORNING SESSION. 1st—Religious exercises, thirty minutes. 2nd—Reading the Minutes. 3rd—Music. 4th—Secretary's Report. 5th—Miscellaneous business. 7th—Music.
