DISTRICT NO. 33.  
The shell of this house is good; roomy and ample for the number of pupils in the district, but seats are very uncomfortable; apparatus poor, but future prospects are encouraging. The books used were the National Series, but there is a talk of a change to the State Superintendent's List. Whole number of pupils present, 15; number of males 6, females 9. Order was just middle, owing probably to the inefficiency of the house. They have the material for a good school. G. E. FRABODY, Teacher.  
DISTRICT NO. 15.  
This house is comfortable in every respect, with good blackboard, playgrounds, roomy location, high and healthy; water privilege very poor; books used, National throughout. Whole number of pupils on the roll, 44; males 28, females 16. Whole number present, 33; males 21, females 12; average attendance, 30; interest and good order number one. The teachers' labors will be effectual. District alive to the cause of education. SAMUEL HART, Teacher.  
DISTRICT NO. 14.  
Arab school house, rather out of repair and uncomfortable in point of room; no water near by; no blackboard worthy of note; comfortable seats for this country; books used, State Superintendent's List in full. Whole number of pupils on the roll, 28; males 13, females 15. Whole number present, 20; males 11, females 9. I think the house will be repaired this season. LEROY MARSON, Teacher.  
PERU SCHOOL, NO. 3.  
House roomy but none too large to accommodate the large amount of children in Peru; seated comfortably; ventilation good; blackboard privileges rather insufficient. Whole number of pupils on the roll, 115; males 45, females 70. Whole number of pupils present 73; males 32, females 40. Average attendance of males 30, of females 40; books, State Superintendent's list; order good with a manifest interest in recitation, both on part of pupils and teacher. It is our candid opinion that the School Board made a wise choice in hiring Mr. Black, for we deem him every way qualified. We would conclude by saying that the interior of the house is good, although we do not like the structure. The people of Peru are interested in the future welfare of their offspring. ISAAC BLACK, Teacher.

I must commend this people for their lively interest in school affairs. Their house would do credit to a large town. They seem to be all absorbed in educational matters. M. W. COOK, Teacher.

It is a fine little house, well seated, playground rather cramped, location healthy, water rather out of the way, ground fenced on two sides and posts set for the remainder. Number on roll, 23; males 26, females 12; present, 24; males 14, females 10; books, McGuffey's readers and spellers, Ray's arithmetic, Mitchell's geography. This school appeared to be highly interested in education, and manifested a great desire to learn. DR. A. OPPERMAN, Teacher.  
I am sorry that I cannot give account of all the schools in this report, but trust that I shall be able to do so at an early period. The cause of common schools I believe to be advancing. Interest on the part of parents I believe to be augmenting, and we have every reason to believe that our country will be second to none in point of educational resources. There are some ten or twelve new school houses to be erected this summer, some of fine quality; and I believe that one year will find a good school house in every district in the county. We rejoice to see such a lively interest manifested on the part of all this section. It speaks well for the early settlement of the land now lying untilled. Nowhere have I seen parents manifest more interest in this direction. These benignant blessings which are being bestowed, are unequalled anywhere, even in the older States. I have visited the majority of the districts in the county, and have reports from the residue, and I find the same feeling existing in profusion everywhere. Our county now numbers sixty-three districts in all, and

and the pupils, with but perhaps a single exception, have yielded a cheerful and ready compliance with all the requirements of the school. A vigilant supervision has been exercised over them all, and they have been required to observe regular temperate habits, and to keep their rooms in a neat and proper condition. They have been compelled to labor diligently and earnestly to the end of the term, and we saw no indications of idleness resulting from overwork. Indeed, we have seldom seen a class of pupils so vigorous, healthy and obedient. Manifestly, it has been the aim and effort of the teachers to inculcate the principles and lead the pupils to the formation of such habits, as must render them virtuous and happy, and highly useful men and women. The examination was conducted in a manner highly satisfactory to the visitors.
