The celebrated author, in this admirable essay, clearly demonstrates from a thirty years successful practice, that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine or the application of the knife; pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be may pie, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheapif, privately, and realizally.
