## THE SCHOOL HOUSE ON THE HILL. his larder empty, and his wife and A NARROW ESCAPE FROM DEATH. AN EXCITING RACE-THE STORY would be no easy matter to maintain rein, they rode together to the house WHISTLE AND HOE.

Oh, I love to turn and wander Backward to the days of yore, With its years of guiless childhood, Days of peace I ll know no more, But one spot where fancy lingers, Making all my pulses thrill With its cherished recollections, Is the school house on the hill.

Off we tread the pathway gladly ; Leading to the sunny spot, Pulling roses by the wayside, With the blue forget-me-not, For the one who gently taught us Our duties all to fulfill. Like an angel she seemed to me In the school house on the hill.

Then at noon, we lads and lasses, Knowing naught of early care, Went to find our swings of grape vines; Spending joyous moments there; Walking through the grand old forests By the clearly flowing rill, Till the shadow hied us homeward To the school house on the hill.

And at sunset, how we lingered, Ere we said the word "good-night." Though we knew the morrow's coming Would us surely all unite. Oh! the old worn oaken benches How they are before me still, With their rows of happy children.

Now there comes a youthful vision Of a maid with locks of gold, Though 'twas but a dream of boyhood, Yet its depth can ne'er be told : For life's sweetest hopes were blighted By the death of fair Lucille, My sad heart with her is buried, Near the school house on the hill.

In the school house on the hill.

had some experience; namely, STREET MUSICIANS AND BEGGARS.

The streets of New York are filled with ragged boys and equally ragged girls, who play the most doleful music upon the most wretched harps and violins, and live by what may be called forced contributions, which is to say, people give them coppers and nickels, partly out of pity and partly that they may move out of ear-shot with their it fernal noise. These children are, as a rule, sold by their parents in the Italian cities to men called padrones, who bring them over and operate them. The little waifs are completely in the power of the padrone, who compels them to bring him each night so much money, the penalty being starvation and most unmerciful beating. The authorities determined to break it up, and the Italian consul in this city gave the authorities the most cordial co-operation. On Friday of last week, all these children on the street were arrested and declared vagrants, and Were treated as such. The padrones protested, but the authorities were firm. The children will be placed in the best positions to make useful men and women of them, and the government will take steps to prevent a continuance of the business of bringing them here. Speaking of
