All the roof thou knew'st, ere now, Was Afric's canopy of stars.

ESTABLISHED 1858.

Oldest Paper in the State.

There within thy native clime, Thou wert styled the forest king ; And to thee the grazing kind, Did their blood-warm tribute bring.

Often at the evening dim, By Dilolo's quiet flood, Thou hast lain in ambush grim-Walting for thy feast of blood.

There where Afric's thirsty flock, Unsuspecting, stopp to drink. Thou spring'st from thy hiding rock, Dragging them down to the brink.

Oft at Ethispe's decline, When the chieftalne fireburns, And he qualls his beaded wine-

From his heavy earthen urns .-When Zambezie's limpid waters Echo back the merry glee,-Which bold Afric's lith limbed daughter

Utter, all unheeding thee, There, close by the sparkling fountain,

Filling vessels and recounting Tales, while passing to and fro. There the silver osters slender

And the palm-trees wave in splendor-Couchant thou dost watch for blood.

Long and loud their chaunting rhyme, In regard to war and state, In regard to law and crime,

> There, when tropic odors rise, Mrs. Adams. When sweet reed-flute awake the dance said Larry. "No, not a word." Thou dost reap thy harvest sanguine, "Nor yet about the masther bein' From the hearts-blood bounding warm, nearly bitten by a rattlesnake?" Of those happy, dusky maidens, "Oh, Larry ?" exclaimed Mrs. Ad-Heedless of thy couching form. ams, agitatedly. Aud thus the poet of the East, "Bud he wasn't bitten at all," said Sadly and yet proudly sings, "The Lion is a royal beast. That dines upon the blood of kings." mile, ye know." "But the discovery ?" said Mary. "Oh, only some lumps ov silver, an' they don't want ye, I'm sure for

"I wondther where it comes from," ly explored, slways with satisfactory said Larry, as he trudged back toward results, and on the average they found way, Larry, how are the mules ?" "Not these trout, ma'am," said the tent, where he found Dawson and that the more they worked upward Larry. "These are fine big fellows, Adams breaking fragments off one of the more satisfactory became the find. that look as if they hadn't a bone in the pieces of silver ore, and placing This led to a determination to scale the their shkin. SOWED CORN FOR FORAGE.

The experience of the past year has In the latter place, Madame Estelle given rise to the question of the merits of corn sown in drills, for feedhad hired a mägnificent suite of rooms ing purposes during the drouths which frequently occur and which lessen the hay crop to such an extent as to render a substitute for it necesher boy. But, oh! how surpassingly sary. The practice of sowing corn as lovely she was! They say that the a reserve grop for feeding purposes walters of the Europe made quite a when needed, is too much neglected handsome thing out of her by allowby the majority of farmers. Few ing sundry "sparks" to peep at madcrops yield a greater return for the ame through the key-hole, as she sat labor of producing it, and in no way in her elegant mornging costume at can such wholesome and nutritious breakfast. She paid her bills regularfeed for the stock be produced, as by sowing corn. We have already alluded to Hungarlan grass as a reserve M. Degranti, junior (the jeweler,) crop, but for dairymen a crop of sowed corn is just the thing for mid-summer and winter use.

The corn crop may be sown from the first of June to the middle of July. The yield varies from five to ten tons per acre. The quantity of seed required is three and one-half bushels of the large Dent corn to the acre. This crop, like the Hungarian, requires that the land should be well enriched. It is a good plan ordinarily to plow the land twice-once very early, then early in June. Harrow well and mark out in furrows with a three feet apart. Cover with the har-With a deep sigh, she threw back her ture is needed. It will be well up in As soon as, the ears (nubbins) begin about him would satisfy his cravings. er and tie the tops well.
