- Found, swimming in the Missouri river, from the Missouri side opposice Brownville, a light bay horse, left hind foot white, collar marks, small white spot in forehead, about 14 or 15 hands high, and about 10 or 11 years old. The owner can get the horse by calling on Luther Robinson, proving property and paying charges.

- Our readers will find this number so crowded with matters of local interest-official reports, Normal School history, etc., etc.,-as to leave very little room for news from abroad. Our alm, in which we labor most earnestly, is to make the ADVERTISER a perfect medium for home news, and foreign news will always be held subordinate thereto.

-Elsewhere in our paper, this week, we print a historical sketch of our State Normal School. This account was prepared for publication in a Centennial volume to be issued by the National Bureau of Education, designed to give a comprehensive sketch of the history, and present condition of all the Normal Schools in this country. The peculiar make up, of some parts of the sketch, is due to the fact that it is written in accordance with a sketch plan furnished by the Bureau.

As the sketch contains matter of general interest we are please to lay it before our readers.

- Week after next we will com mence the publication of a thrillingly interesting serial story, entitled: "Rachel: the Miser's Daughter." This story abounds in scenes and incidents so well described, and portrayed in to last. We anticipate, that long be- idan. fore its conclusion, our readers will appreciate still more our constant effort, in this, as in all else, to give them one delegate to the County Convena paper fully up to the standard of the tion for each 15 votes cast for Regents best weeklies, and worthy not only of the University.
