Mexico-Filibustering

A Washington telegram to the Chlrago Post says: The truth about the reported filibustering expeditions to Mexico is as follows: The administration is determined to put an end to the raids on our border which have been going on since the war to the great damage of many of our citizens. 2,000 of whom have claims against Mexico, presented through our Goverument, aggregating many millions. The largest claim for cattle stolen is near \$400,000, and they range down to \$50. The late administration did nothing in the matter, but it is now determined that our territory, flag, and the property of our citizens must and shall be respected. This being the case there will be no need of fillbustering expeditions whatever the confidence that Diaz has, in an unussame effect. The firmness of the administration in demanding redress, has brought about this state of things and it is now believed the whole difficulty will be settled satisfactorfly to American claimants. The annexation of the Northern Provinces of Mexico, exceedingly rich in precious metals, is a probable result in the settlement of this vexatious question.
