The Kearney Press, speaking of the fine stock accumulating in Western Nebraska, suggests the idea that the State could be turned into calf pasture, and there would be money in it.

On Sunday last the river bank caved rapidly near the transfer barn, endangering its safety. A number of hands worked all Sunday night removing it. It is located for the present across the street from where it formerly stood, at the foot of the bluff. H. C. LETT Has BOSTON BAKED BEANS in cans, and pure Malt Vinegar in bottles. Some weeks ago we mentioned the fact that Capt. Beals, of Richardson county had a fine horse stolen. Well, the Captain at once started some men, at his own expense, after the thief, or thieves, who succeeded in overhauling a fellow who gives his name as John Allen. Allen confessed to being one of the parties who stole Beal's horse, and gave the names of others as his partners. Allen was tried last week at Falls City, and sentenced to three years in the penitentiary.

Tax Payers, I have for sale at a discount Brownville precinct railroad coupons. 4w2 W. T. ROGERS. Wyman Kent, of Glen Rock, was in town Monday. He has recently returned from the Black Hills, where he went early in the spring with several teams loaded with flour, bacon, lard, &c. He tells us he did well with his freight, selling his flour at \$20.00 a sack, and other articles in proportion. Mr. Kent is an old miner, and speaks in high praise of the richness of the hills, but thinks that it will require considerable capital to fully and successfully test it. He says there are a great many persons in and about Deadwood who are out of employment, and that in consequence of this enforced idleness there is a great deal of pilfering and thieving going on. A Mr. Smith, of Humboldt, who was in company with Mr. Kent's train, and who had two 4-mule teams, had four of his mules stolen on the return trip just after they had left Deadwood.

Business in the city has been quite brisk during the past week. Several days our streets were crowded with teams, and a great deal of old wheat and corn has been brought in. Brownville is a better grain or produce market than any competing point. This is a fact the people are beginning once more to realize.

I Must Remember That Dr. RICHEY, the popular dentist from Chicago, for next Monday, July 23d, for he must have my teeth attended to—some filled with gold, and some extracted with the gas, without pain.

Go to the Regulator For Hard ware and Farm Implements, at No. 27 Main street, Brownville. THOMAS RICHARDS.

Chas. Neidhart ships this morning to Cass county, this State, a fine monument, to be erected in Mt. Pleasant Cemetery, in that county, to the memory of Joel Sheldon. The base of this monument is 24 by 8 inches, the die 20 by 23 inches, the cap 18 by 6 inches, and the spire 7 feet high by 14 inches at the base. It is needless for us to say that the workmanship of the highest class, as everyone who has ever seen any of Mr. Neidhart's work is aware that he turns out none but first-class work. And this is proven by the fact that he draws trade from north of Nebraska City, and north and west of Lincoln, and has received several orders from St. Joseph, Mo., at all of which points there are marble yards, but none of which can compete with Mr. Neidhart in style and finish of work. He also has in his shop and ready for shipment, work for Tecumseh, Humboldt, Falls City, and other points. Citizens of Brownville should surely feel proud of Mr. Neidhart and his first-class marble yard.

"Very, Very Many." Think a tooth cannot be saved after it has ached. This is a fatal mistake, says Dr. Richey, now and always, and save teeth after they ache. He will be at the Union Hotel from July 23d to the 28th.

Mr. Judd, one of the publishers of the New York Agriculturist, recently visited Nebraska. On seeing our beautiful and fertile prairie lands he writes his impressions. The following is an extract from his letter: At 10 o'clock we crossed the swollen, roaring river into Nebraska, and two hours later reached this city of eight years' growth and 8,000 inhabitants—Lincoln, the capital of the State. From the river to this point, a distance of sixty miles or more, the prairie land on both sides of the railroad is very beautiful, here and there broken by the settlers who are coming in in considerable numbers. The fears of the grasshoppers, I find, are about dispelled, and the crops promise to be very large.

We have driven about the city today, and made a circuit of fifteen or twenty miles over the prairies. In another letter I will give you my impressions of the country. My first thought now is, how can people toil and struggle for existence on the rough lands of the eastern states, when they can here secure lands cleared by nature at such cheap rates, and soon become independent.

"Just Think of It." Going to sleep and waking up with your old teeth out, without pain. Dr. Richey and the Laughing Gas can do it. Will be at the Union House from July 21st to 28th.

The following are Prof. Tieg's prognostications for July and August: July. 18 to 21—Generally clear. 21 to 25—Heavy rains. 25 to 26—Clear. 26 to 29—Threatening rain and wind storms. 29 to 31—Clear. The warmest days will be the 2d, 9th, 15th, 20th, 25th, and 30th; the coldest, the 4th, 11th, 16th and 23d.

Rare Bargains in Philadelphia Hand-Made Shoes, for ladies and children. Just arrived. L. LOWMAN.

NEIGHBORHOOD NEWS.

Local news is very scarce. Nemaha can beat the world for fatlers, slanderers and scandal-mongers. And those who talk the most are those whose characters can least afford the test of close scrutiny.

Mrs. W. S. Clark was quite sick last week but is rapidly recovering her usual health. Mrs. J. B. Hoover's health has recently improved very much, so that there are great hopes of her perfect recovery.

We noticed the other day a bridge on the "bottom road," in front of the residence of Mr. Plasters, that needs repairing. A horse might easily break a leg in it, the way it is, or was.

If the river keeps on cutting the banks on this side, it looks as if communication between Brownville and Nemaha and the south will be cut off.

Is grass-wheat a winter wheat as well as a spring wheat? This question has been discussed some by our farmers, but no one has had sufficient experience to speak positively, and if you or any of your subscribers can give the required information, we would be pleased to see it in THE ADVERTISER. And if it would do well as winter wheat, when is the best time to sow? etc.

The store of J. B. Hoover perhaps never had a larger trade than it is having this season. It is well stocked with dry goods and groceries, and is daily crowded with good customers. Birr says he is determined that the people shall understand that if they want cheap goods they need not pass his store and go to Brownville to get them.

At this date—Sunday 15th—our gardens are perishing for rain. Corn is doing well, but rain would help it. Many fields of spring wheat are about ready for the reaper.

Titus Bros. are well stocked up with goods and all kinds of family groceries, and are receiving fresh supplies from time to time. They sell right down to bed rock prices, and consequently get an extensive trade. They are accommodating gentlemen and pleasant to trade with.

We are hoping for the railroad by which to ship our fall crops. We hear farmers saying, "Had I known the hopper scare would terminate thus I would have had more harvest." They will know next year and with the experience of the present season they should never let the hopper scare them again.

The 4th at "Hickley's" was well enjoyed by all who went from here. The drive to the grove being about the right distance to satisfy without tiring, and the grove was cool and pleasant.

The fall at the Tempers' tract night was well attended but failed in some respects to strike our fancy. Mr. Minick has made arrangements to move his family to Brownville soon. Aspinwall will be both to part with those who have been foremost in the work of her regeneration.

Jas. Glader moved to Detroit on the 10th. The few that remain will move out to the railroad as soon as the coal shaft is completed.

London ought to be blessed with a noble revival next fall, for where the young chickens are, there will be the preachers gathered together.

Our people are thankful for past favors, but think it about time for another shower. Corn is not suffering materially yet, but threatens to unless it rains.

Mr. Sayer, of the firm of Weisburger & Co., starts for Wisconsin this week. He takes a stock of goods with him.

The meetings of Bros. Killman and Coryelle, held here last Saturday, were well attended and considerable interest was manifested. There is enough difference in their theories to give variety.

Mr. Harry Trowbridge is conducting a singing class at the Larkin school house. Notwithstanding the disadvantages of the season the effort gives fair promise of success. Mr. T. is a fine singer and an able instructor.

Several hogs have died in this locality lately with what appeared to be cholera, but it is to be hoped that the deaths resulted from over heat.

The meeting of the Nemaha Coal Company on the 14th was attended by a few of the members, who appear to be in real earnest about the matter; but the attendance was too light to warrant the transaction of any business. The president postponed the meeting until after harvest, when another call will be made. The work of drilling is progressing slowly, but we have reason to believe that Mr. Frost will push it vigorously until completed. The hole was over fifty feet deep last Saturday. The character of the stratum at that depth is a hard soapstone. Mr. Fisher is taking pains to have specimens of the strata saved in order.

London. Fine shower of rain Monday morning last, which was much needed. Some days deliciously cool and delightful.

The sound of the reaper is heard in the land, and the bountiful harvest is being gathered in, to make both man and beast rejoice.

Mr. Geo. Hodgkinson has purchased a very fine organ for his daughter.

If any one wishes to see a fine prospect for apples this year, let him call at the Loveless place and look at the twenty-two hundred bearing apple trees.

Father Conner calls to see us occasionally, always bringing sunshine with him. But few persons have so beautiful a religion and so profound a philosophy as Mr. Conner—perfectly

recollected to life as it now is, and "rejoicing with joy unfeignable and full of glory" in the hopes of the "life to come."

"This passing struggle" that some people cannot use more discriminating power. Because the policy of Grant and Hayes may differ, and a person approves of both, then there must be contradiction somewhere. Now, see here. Suppose a patient is receiving medical treatment, and it becomes necessary to change the physician, and he prescribes differently, does it follow the systems are different and their judgments not equal? Symptoms take a change and require different remedies. Sometimes it will do to give sedatives, and sometimes it will not. The political upsets President Hayes is now administering, four years ago would have been fatal to the nation; but now symptoms are different, and it is hoped they will keep down excitement and fever until remedial agents may act to heal the national wound caused by slavery.

It is well to keep the fingers on the political pulse before giving a diagnosis of the case, or finding fault with remedies.
