The Lewiston, Ill., Gazette gives the following for hog cholera: The best way is to make a pile of corn on the edge, effectively scorch it, and then give the affected hogs free access to it. This remedy was discovered by E. E. Locke, Esq., at the time his distillery was burned in this county, together with a lot of store corn, which was so much injured as to be unfit for use, and was hauled back and greedily devoured by the hogs, several of which were dying daily. After the second day not a hog was lost, and the disease entirely disappeared. The remedy has been tried in a number of cases since, and never failed.

Her rooms are strong every warm evening with ladies and gentlemen, and she spares no pains in having the best in the city and in pleasing all.

Some weeks ago we referred to the matter of Mr. John Barns going to the State of New York to counsel with an eminent doctor regarding what was thought by many physicians to be a cancer growing on top and about the center of the lower lip. Mr. B. returned home a few days ago, and informs us that he went to Rome, N. Y., to see Dr. Kingsley, who is eminent in his profession and constantly has in charge patients from all parts of the United States, treating them for similar diseases. After consulting the doctor who pronounced it cancer, he concluded to be treated, and for several days, while the medicines applied were destroying the roots of the malformation, suffered a most painful treatment. In the removal of the cancer there was no cutting, as the doctor operates solely by the application of medicines. When the lump, about the size of a quail's egg was removed, Mr. Barns was assured that his cancer was gone, that he need have no more torturing apprehensions regarding his frightful malady, and that he could return home. Mr. Barns feels easy, his health is good, his lip is healed without a scar more than a slight indentation. We hope our esteemed friend is cured.

Not surprised. When we consider the little attention paid to thins of health, we are not surprised at the indifference manifested in regard to purity of daily food. If all articles were like Dr. Price's Cream Baking Powder, this indifference might answer; their perfect wholesomeness would insure us against all evil consequences.

For thibest selected stock of goods and lowest prices go to Lowman's. The Jew West Illustrated. One of the latest claimants for favor in the literary line is a large and beautifully printed journal of the above title. It is a valuable compendium for far West resources and attractions, published quarterly, and hailing from Omaha, Neb. Robt. E. Strahorn, the well-known author and correspondent, is at the helm. Its field is the wide, the boundless West, and judging from the number before us, it will do much toward occupying it. The great mines, the vast stock and agricultural regions, and the glorious attractions of Rocky Mountain climbing, scenery and hunting and fishing resorts, are treated in a manner to our entire interest and instruction. The current number, elaborately illustrated with gems of far west scenery, contains 48 long columns devoted especially to the great advantages afforded by Colorado for the capitalist, homeseeker and tourist. A sample copy will be sent to any one free of cost, and any of our reader will be repaid many times over for the trouble of sending for it. Address Robert E. Strahorn, Omaha, Nebraska.

Invisible Hair Nets at Dolen's. New Goods of all descriptions, at Lowman's.

The blacksmith and wagon shop of Abbott & Emery, at the foot of College street, was burned down on Monday night last. The fire was discovered about one o'clock, and the cry of fire sounded from mouth to mouth all over town, and people hastened with buckets to the scene, but the fire had got under such headway that any attempt to save the building or much of its contents was useless; and the work of all was directed toward saving Mrs. Cook's millinery store, which stood within a few rods of the burning building. This was done and the spread of the fire prevented by the determined efforts put forth by the heroic fire fighters. Mrs. Cook's goods were all carried out of the building, piled in the street, which was quite muddy, and must have been more or less damaged.

The origin of the fire is unknown, but the occupants believe it the work of an incendiary, as the fire started in the second story, where there had been no fire during the day, and from the further fact that a part of a bottle of explosive fluid was found near the building. The building was a two story, and occupied by different parties. In the main part below was the blacksmith and wagon shops and lathes of Emery & Abbott, adjoining these on the south was the mill machinery and engine of Ed. Huddart who was just getting ready to operate. The upper story was occupied by Arnold & Bunet, the manufacturers of Arnold's patent bee hive. The loss of Abbott & Emery was near \$2,000; that of Bunet about \$1,000; that of Arnold & Bunet \$500. They had \$400000 worth of goods ready to deliver, and considerable stock, all of which they lost with all their tools. The building originally intended for a mill, was one of the first ever built in Brownville, but notwithstanding its age, was strong, the frame being of hewn oak timber, which, although dry, was well preserved. The solid old building burned splendidly and made a hooffe. We can scarcely believe the enflagration the work of an incendiary; but such is firmly believed by some. We can't imagine what motive anyone would have in such outrageous work.

Summer Patterns will soon arrive at Lowman's. HARRIS—Sunday May 18th in this city by Rev. S. P. Wilson, Mr. Wm. Lawer, formerly of England, and Miss Sarah A. Body, recently from the mother country.

The extraction caused by the fire Monday night was more than our city can afford to bear. The annihilation of such an industrial institution is a serious loss to the city. That the loss is realized by our people is evidenced by the fact that many of our citizens are able to do so, are donating and advancing liberal sums of money paid in setting those worthy mechanics on their feet again. It is a right and generous for our citizens to do what they can to replace this loss, and help him who deserves help.

Bain, Studebaker and Nebraska wagons. STEVENSON & CROSS. Satin and Double faced ribbon at DOLEN'S.

SHERIDAN ITEMS. The much needed rain fell Monday noon. Capt. W. Crandall has gone on a visit to Perora, Ill. Mr. Fred Mayers has lost two of his children—disease, scarlet fever.

Mr. Williams and Mr. Nickeson, of Burkshire, N. Y., are visiting in Sheridan. They own considerable land in this county. Some sympathetic soul who doubtless was thinking of the "Post talking out a hungry existence," was kind enough to forward by mail to the local editor, a large piece of bologna-sausage.

Our scribbling was interrupted by a call from Hon. Geo. Crow and ex-Superintendent Pierson. These gentlemen were attending the trustees meeting of the M. E. Church. Mrs. Parish and her sister, Miss Linsley, have gone to Table Rock to attend the funeral of their nephew.

Ed. Jule is now in the employ of F. P. Tenney. The carpenters were busy putting in a valley gutter between the roofs of the printing office and the millinery store, and had about half the shingles off of each when the rain storm of Monday came up. We will not report what the boys said about them.

You can buy carpets just as cheap, (freight only added), of Orshard & Bean, Omaha's leading carpet house, as if you lived in Omaha. Largest stock in the West. Perfect satisfaction guaranteed. In ordering by mail, state color, quality, material and price, and free samples will be furnished.

LONDON ITEMS.

"And his deacles asked him, saying, why then say the scribes that Elias must first come?" And Jesus answered and said unto them, Elias truly shall first come and restore all things. But I say unto you, that Elias is come already, and they knew him not, but have done unto him whatsoever they listed, like shall also the son of man suffer of them. Then the deacles understood that he spoke of John the Baptist."

Five showers of rain Monday afternoon. Widow Dowling is visiting friends in London. Always glad to see 'Aunt.' Mrs. Josiah Winters is visiting friends in Iowa.

Dr. Mathews, although he has an arm broken and otherwise injured, by being thrown out of a buggy, yet was able to be at church last Sunday, and able to see his patients. Monthly concert at the Methodist Church next Sunday at 3 o'clock p. m.

Mrs. Dr. Thurman, of Brownville, is visiting London, the guest of Mrs. Kesterson. The Methodist and Christian Sunday schools will hold a picnic on the 31st at Mr. James Ely's grove. Other schools perhaps will join with them.

Red Ribbon Club every Friday night at the Methodist church. Hope all the friends of temperance will try and attend these meetings, and work for the cause of temperance, and sobriety. No friend of temperance should be idle now. Work on, work on; victory will come after awhile. Every one saved from becoming a drunkard is a great work. Every one saved from drunkenness is a blessed work. Drunkenness is a fearful state to be in. There can be no greater benefactor of his race than the temperance reformer. There is no use talking philosophy, morals, or religion to a drunken man; first get him sober. Temperance ranks first among the virtues. Those who say present religion to men—we read of temperance societies—are strangely blinded. Men must be sober before they can be treated as rational, responsible beings. Work for temperance, friends.

According to announcement Marsh Opera House was opened on Tuesday evening by the Blake Dramatic Association in the presentation of "Lady Audley's Secret." The cast of character was excellent and the Blake's fully sustained the enviable reputation they have gained. We would be pleased to criticize in detail the different characters, but the pressure of matter on the morning of publication admonishes us to "cut it short," but we can not refrain a special compliment and congratulation to Miss Fannie Arnold, for the splendid manner in which she carried the leading character, that of Lady Audley. Miss Fannie's splendid physique, graceful and natural acting, so distinct from the ranting actress, must give her favor with any intelligent audience. And when it comes to a song she is the superior of all. As an amateur Miss Fannie is a star, and naturally steps to the front with the free accord of her associates. When the curtain went down in the last act, Ex-Gov. Furnas stepped from the audience onto the stage, at request of the Association, and made a short speech in honor of the splendid opening of the Marsh Opera House. Among other cheering things, the Gov. said there was only one better opera house in the State (applause) than this. The Governor's little delectatory address was received by hearty applause. After the play many remained for a dance, but we did not stay to see it out. The opening of Marsh Opera House was a success, and may the Blakes soon be ready for another announcement.

We incidentally learn that a drug store was burglarized in Phelps on Monday night this week.

There is more of the Confederate army in Congress than there ever was of the United States army at the polls. The people are not so uneasy about the latter as about the former, and they like the veto, and like it the better the more they think about it. A writer in London Garden finds that the cracking of pears is prevented by grafting more than one variety on the same stock. He is very positive about it.

If this persecution is continued, and is followed by any considerable exodus, the people of the South will have an opportunity, as they look upon their untilled fields and decaying industry, to reflect that they have extinguished the very source of their prosperity.

The proposed university for the education of colored young men in New York will start with \$200,000 endowment. The curriculum will be broad and liberal. Women will not be admitted.

The Democrats in Congress say that there is a late well-defined league between the parties, and that the President has drawn the line. On this issue the people are ready to vote now. They will be none the less ready next year. Are the Democrats ready for the question?

A new industry in the United States is the production of fruit syrups. Its success has brought these syrups into competition with French manufactures, which have heretofore had the markets of the world. The New Orleans Times has a great grief in the Louisiana Constitutional Convention. Of speeches delivered in the convention on Saturday the Times says: "They disclose an amount of cheap demagoguery and wild-cat statesmanship which ought to make and, we have no doubt, will make decent citizens blush." The convention is controlled by the Democratic caucus.

Birmingham, Eng., is importing hay forks, clocks, apple parers and clothes pins from Philadelphia. Commissioner Le Duc is more hopeful of corn and sorghum than of best roots as the plants which are to aid the success of our sugar producing industry.

Cyclopedia of Literature. It will be welcome news to all lovers of good literature that the new, beautiful and marvellously cheap American edition of Chambers's Cyclopedia of English Literature is completed on June 1. Volume IV is just issued, and the remaining four volumes are to be issued and delivered at one time on the date stated. The work richly deserves the sale it has obtained of nearly 100,000 volumes already, and ought to attain, as it probably will, to a round million. The price, which has varied at different times, increasing as the publication has progressed, has now been permanently fixed at \$2.00 for the paper (8 vols. complete, nearly 3,500 pages), \$3.00 for cloth, \$4.75 for half morocco, gilt top, and \$5.7
