Regarding the sale Of Thomas' Eclectric Oil we are gratified in being able to inform you that since we took the agency three mouths ago for the sale and introduction of Eclectric Oil, our very large sales proves conclusively to our minds; this remedy has extraordinary merits as witnessed by the unprecedented sale. We anticipate a large increase in the sale, as its virtues become more generally known.

Immortality.

Are they looking down upon us, Loved ones who have gone before? In a world of light and glory Do they love us as of yore? Are the bright eyes closed in slumber Oped and gazing from on high, Beaming with a clearer vision, Watching o'er us, yea, for aye? The Doctor's Testimony.

Do they know our thoughts and feelings Know our inmost hearts to read? Do they mourn when we are tempted? When we fall to sow good seed? Are they watching' are they waiting For the coming of our feet? While the same fond hearts receive us? Will the same fond voices greet?

Who shall say they are not with us? Men of science and of lore Can you tell us, with your wisdom, As you o'er your volumes pore. If the heavens are far beyond us-If those realms are high above? Or a region all around us, Where God's messengers of love.

Are uplifting human creatures, Helping them this day and hour. Better to sustain their burdens. Better yet to know His power? Or is it a world of glory, All divided from our own. Where no influence can mingle With the trials earth hath known?

Oh, for hope that comes to gladden Oh, for faith that doth assure That our loved ones have not left us. Though immortal now, and pure, They are still beside us walking, Though unseen by mortal eye: They are working in his vineyard, They are with the Father, nigh.

To Keep Food From Rats.

A plan which has worked admirably and is very simple, is to take a round tin pan, punch three holes at equal distance near the rim, and fasten a piece of wire or cord fifteen inches long in attach them to a simple cord, and suspend the pan from the ceiling of your poultry house, so that the bottom of it s about six inches from the ground. Your fowls can easily eat out of the pan; but the rats are unable to on account of the swinging motion-the pan moving away as soon as they touch it. It is of course necessary to suspend the food trough or pan clear of any boxes, or any thing from which the rats can
