PODUNK, NEB., Aug. 2, 1881.

Mr. Editor:—Feeling that perhaps your readers would like to hear something about our lively little town, I will endeavor to give you a few facts. You may ask what it is that pleases the people so? Why, it is the railroad coming right through here. The contractors are here ready and waiting to commence work on the M. P. road.

Weather hot and dry, and sickness the result of it.

Sabbath school and preaching every sabbath, splendid singing at the parsonage at 4 o'clock every sabbath.

July 28th, Dr. A. S. Holladay, this city, sold to Hon. Wm. Daily a mare colt that was foaled on the 12th day of the same month. Mr. Daily, at whose farm the mare and colt was, fell in love with the fine little animal and tendered the Dr. one hundred dollars for it. The lineage of the colt being a grand one the Dr. hesitated for a day or two to part with it, but finally concluded to do so, though he thinks it worth double the money received.

The Dr. furnishes us the following pedigree of the precious piece of horse flesh: Dark bay mare colt foaled July 12th, 1881, sired by McMahon, Son of Administrator, he by Rysdyk's Hambletonian, sire of Dexter, and grand sire of Goldsmith Maid, and Maud S. Dam of this colt, Mint, by Roosa's Black Hawk, son of Vernal Black Hawk; second dam by Seely's American Star; third dam by Selah T. Jordan's Wild Air; fourth dam by Lister Duroc.

No Good Prescribing. No man can do a good job of work, preach a good sermon, try a law suit well, doctor a patient, or write a good article when he feels miserable and dull, with sluggish brain and unsteady nerves, and none should make the attempt in such a condition when it can be so easily and cheaply removed by a little Hop Bitters. At Muir, Michigan, recently, the house of Alonzo Derrick took fire, and three of his children, who were sleeping in an upper chamber, perished.

A man named Epps was killed at Des Moines by another named George. They fought about a prostitute.

A tornado swept through the county of Troy, N. Y., 25th ult., doing much damage to buildings and timber.

An old man of 70 years, named Marvel, and his wife, near Indianapolis, were recently gagged in their own house and robbed of \$620 in money.

David Bennett, at Elkhart, Ind., was caught in the machinery of Erwin, Lane & Co's pepper mill and killed.

John Patton and John Kutz were killed while blasting in the iron ore quarries, at Reading, Pa., by pieces of stone thrown out.

It has leaked out through the Cincinnati papers that it was not the hot sun but whiskey, which killed several hundred people at that city.

Maud Lovejoy, 9 years old, died of hydrophobia, at Manchester, N. H. She had been bitten by a dog some weeks before.

Catharine Behler, Brooklyn, also kindled the fire with kerosene, and was killed. Next.

Ex-Gov. Bagley, of Michigan, died on the 28th ult.

Mrs. F. Gastel was run over by the cars, at Milwaukee and killed.

New smelting works at Kansas City have begun operations.

A young lady of Johnstown, N. Y., while bathing at Chautauqua Lake, had a novel experience. A snapping turtle caught by the ear. Her screams brought friends to her assistance, or she would certainly have been drowned; but the turtle's grip was like a bulldog's and after his head had been cut off it took ten minutes to pry the jaws apart. It will take a good deal of the poetry out of bathing in Chautauqua Lake.

The results of the inquiries of the tenth census, which have been conducted this year by experts and scientists who have devoted, in many cases, years to the subjects upon which the Superintendent has called upon them to report, have so far turned out to be, in all industries, far greater than the most sanguine expectations. The Inter Ocean has already shown that the total cereal product of the country has increased more than 100 per cent; that our iron and steel industries, under a wise protective tariff, have nearly doubled; and now comes Special Agent Hilgard, who has had charge of the cotton statistics, and informs us that under the influence of free labor the cotton product of the Southern States has increased nearly 90 per cent. In 1870 the cotton product of the country was 3,011,357 bales. The census shows the crop of 1879 to have been 5,730,968, an increase of 2,702,611 bales.—Inter Ocean.

When the Bee political sheet grasps for a city printing contract at a price nearly two hundred per cent above what a more reputable and more flourishing evening contemporary proposed to do the same work for, and at least equally well, the Bee is guilty of an act which the tax-payers will regard as no better than highway robbery. To call it swindling would be language utterly inadequate to the occasion.—Omaha Republican.

This is decidedly hard on a paper that howls so persistently about monopolies and oppression of the people. Hard because undoubtedly true.

Now that Conkling is fallen, many newspapers and politicians of New York, who, while a shadow of victory hovered around his standard, either supported him or were neutral, through fear of his immense power, are execrating him and making merry over his downfall.—Exchange.

Mr. Conkling has more friends in New York than he ever had before, and he is the only Republican that could carry that State in a Presidential race.
