

USEFUL AND SUGGESTIVE.

—Plants and trees which are not perfectly hardy will endure severe winters better if the subsoil has good drainage.

—Sugar Cookies.—Two cups of sugar, one cup of butter, half a cup of sweet milk, one teaspoonful of soda, two teaspoonfuls of extract of lemon; dip the cookies in sugar before baking.

Corn Bread Rusk.—Six cupsful of corn meal, four of wheat flour, two tablespoonfuls molasses, one teaspoonful salt; mix well together, knead into dough; make two cakes of it; put into well buttered tins or iron pans, and bake an hour.

—Black knot is caused by a fungus which grows in the bark and causes it to decay. The only remedy is to strengthen the tree by means of wood ashes and lime to overcome the disease and make new growth, and to cut out and burn the knotted limbs. Cherries are also affected by it more frequently than plums.

—Drop cakes are made in this way: One cup of molasses, one cup of sugar, one cup of lard, one teaspoonful of ginger and one each of cloves and of cinnamon, two teaspoonfuls of soda, dissolved in a cup of warm water; stir in flour enough to make a batter that will drop readily from a spoon; add a little salt and a cup of dried currants, or if you have not these, well-washed English currants are nice.

—Mr. W. D. Philbrick, of Massachusetts, does not regard the crow as entitled to the least consideration as a destroyer of insects. He is, Mr. Philbrick says, a merciless robber of birds' nests, eating indiscriminately eggs and young birds in the breeding season, and he thinks it arrant nonsense to defend the crow as useful to the farmer. The song birds, frogs and toads he destroys would, if suffered to live, probably destroy twice as many insects as the crow himself.

—A correspondent of the New York Tribune gives her method of washing silk handkerchiefs so that they will look almost as well as new ones: "Put an iron on to get hot, and when ready to use, wash the handkerchiefs through a very warm soap suds. If they are much soiled pass them through a second suds. Do not rub the soap directly on the handkerchief. Then wash through another warm water without soap, and thoroughly rinse, squeeze dry and iron immediately to prevent the colors from running."

—The pear blight is now said to be the effect of a microscopic organism that, when sufficiently numerous, causes a fermentation in the pores of the wood by devouring the starch in the grain or fiber. This disease can be easily communicated from one tree to another by transferring even a minute fragment of the bark from a diseased to a healthy tree, and therefore may probably often be communicated by accident. Cutting down and burning the affected trees is the only sure cure.

—The secret of an omelet is the knowing how. Bordeaux fashion is to tilt the pan, allow the eggs to run to the lower side and scrape down from the upper half of the pan perfectly clean, pushing all the egg to the lower half. When set, turn over backward, brown and serve. Take hold of the pan with the palm of the hand uppermost, place your dish over the pan and turn quickly. If you do not put a tablespoonful of water to each egg in making an omelet it will be leathery. If you put milk or flour it is not an omelet, but pancake.

—Green Tomato Pickle.—Cut the tomatoes in slices; sprinkle with salt, and let stand twelve hours; drain and put them in a saucepan over the fire with fresh water, changing it until all the salt is washed out. When thoroughly scalded and partially cooked, drain and put them into a boiling hot sirup made with one pint of vinegar, three pounds of sugar, one-half ounce of cinnamon, and one-quarter ounce of cloves; simmer them in this until tender, then carefully lift them out, and put them in jars; boil down the sirup some, and pour it over them. After a day or two boil the sirup again, pour it over them again, and when cold tie them down carefully.

—Dr. Leidy, of Philadelphia, in a recent number of the *Pennsylvanian Monthly*, states that the parasite in pork known as trichina was first discovered by an English surgeon in 1833, but its presence in pork was first detected by Dr. Leidy himself in 1840. He reminds the public that all food animals are liable to have parasites, and that the tape worm is sometimes conveyed in rare beef; that only one hog in about 10,000 is infected with trichina; and that thorough cooking will kill all such parasites, while none of them are poisonous after a good cooking. He believes that the Mosaic prohibition of pork was due to the danger of trichinosis in a country where fuel was scanty, and therefore their food seldom well cooked. He also thinks that millions may have died of trichinosis in centuries before the source of the danger was discovered, and that many of the deaths which occurred in the army during our civil war were due to the frequent use of raw and badly cooked pork, although ascribed to typhoid, rheumatic or malarial fevers.

—Miss Winslow, living ten miles from Boston, now in her ninety-second year, possesses the original certificate of membership, belonging to her father, General John Winslow, as one of the founders of the Society of the Cincinnati, dated May 5, 1783, and signed by George Washington, President, and H. Knox, Secretary.

—The picture of Columbus just found in the Spanish Colonial Office represents him as about forty, without a wrinkle on his broad forehead, with dark, thick hair, a brilliant eye and beaked nose.

Corn-Fodder.

Corn is not only our largest and most important grain crop, but it is our largest fodder crop. The agricultural report for 1878, which is the latest to which we have present access, but which will serve for comparison, gives the area under hay and corn in that year as 26,000,000 acres of hay and 51,000,000 acres of corn. It is a moderate estimate that an acre of corn-fodder is thrice as heavy as an acre of hay, and if the average of hay is one and one-half tons per acre, that of corn-fodder can very easily be three tons; so that the corn crop yields 150,000,000 tons yearly of the best of fodder, in every way equal to hay—if it is only properly cured.

But, as we have said, if it is only properly cured. The chief value of the fodder depends upon this. Otherwise its nutritive value is considerably reduced.

When corn has been cut in good season, before it has been frozen and when the grain is glazed and hard, some portion of the nutritive constituents certainly goes into the corn, but there can be very little of it, because the grain does not increase in size, but, in fact, shrinks as it becomes hard and solid. Nevertheless, we must believe that some portion of the starch and sugar of the corn is derived from the stalk at this stage of its growth. The most considerable change, however, in the stalk consists in the conversion of its sugar and starch into woody fiber, during the process of ripening. This is clearly evident because the disappearance of these substances can be noticed as conspicuously in corn-stalks from which the ears have been pulled for table use as in those upon which the ears have been left to ripen. And the loss which occurs from this change is very considerable. We have no special information derived from actual analysis of corn-stalks in the two stages referred to, but we know very well from experience in feeding stalks to dairy cows that there is a very great difference in value in favor of the stalks cut before they have ripened and died. But the time of cutting the crop is not the only matter for consideration. The manner of curing and storing is equally important, and it is in this that loss and damage often occur through careless handling. The fodder requires to be perfectly well dried and in the shade. Sunlight has a remarkable chemical effect upon drying vegetable substances. Druggists who use herbs for extracts dry them in the shade to preserve all the juices without loss, and if we would preserve the corn-fodder in its best condition, we must put it up in such a manner as to shade it as much as possible from the sun, and yet furnish air to circulate among the stalks. This may be done by putting up the fodder in large stacks and binding these at the top to protect them from rain and keep the interior in the shade. The larger the stack the less the fodder is exposed. We have had sweet corn fodder put up in this manner and left in the field until required for use without any injury or loss whatever, the stalks and leaves coming out fresh-looking and green as when put up. A convenient way is to bind the fodder in convenient sheaves or bundles with rye straw or other bands, and set them in large shocks, binding the tops securely.

Fodder corn, which is corn grown especially for fodder and not for grain, is becoming a very frequent crop. The late excitement in regard to ensilage has drawn much attention to this crop, which is doubtless the most valuable one that can be grown for feeding purposes. A well-grown crop can easily make forty tons green, or ten tons cured, fodder per acre, and larger yields have been reported. But the broadcast method of growing this crop has been found a mistake, producing thin, weak, watery stalks of very little value. When planted closely in rows and cultivated, as if for grain, the stalks become perfectly developed and produce a considerable quantity of ears and many small nubbins. To dry these requires great care, and the management of fodder corn is therefore more particular than that of corn-fodder. For the safe preservation of it, the putting up and keeping it in stacks or large shocks out of doors is necessary, and when sweet corn is grown the stalks should be comparatively small to prevent molding and souring of the fodder. A very convenient device for ventilating large fodder stacks is to use a number of frames made of three posts one and a half inches square and four feet long, and having three cross-bars on each of the three sides, making the frame three inches narrower at the top than at the bottom. One frame is slipped on the top of another, and a continuous open tube or chimney is thus made and put in the center of the stack, the fodder being ranged around it. The stack being raised from the ground upon a frame of rails or logs, there will be an ample circulation of air through the stack to remove moisture and heat, which would produce fermentation and mildew.

The culture of corn for fodder will surely be greatly increased in the future. The two successive dry years have ruined the meadows, and there have been few new seedlings which have escaped destruction. A substitute for hay will be required for several years until the meadows have been reseeded and the pastures restored. There is no other crop that can be so well substituted as fodder corn, and now that farmers have found the right method to grow it and have generally abandoned the broadcast method of planting for the drill plan with regular cultivation, there should be a great increase in its production.—*Henry Stewart, in N. Y. Times.*

—The Queen presented a milk-white goat to one of the regiments at Aldershot, England. It is led by a gold chain, and is a great pet with the soldiers. It is so fond of music that it joins in the march with as much spirit as the soldiers.

—A poor young man remarks that the only advice he gets from capitalists is "to live within his income," whereas the difficulty he experiences is to live without an income.

AN Indianapolis exchange mentions that St. Jacobs Oil cured Mr. J. H. Mattern, a letter-carrier of that city, of a severe sprain, contracted in the war.—*Detroit (Mich.) Western Home Journal.*

A DETROITER dreamed that he had died and was banished to Satan's sultry kingdom, and says that he found many earthly customs in vogue there. About every man he met asked: "Is it not hot enough for you?"—*Detroit Free Press.*

FROM the Wilmington (Del.) *Republican*: Mr. J. M. Scott, corner Third and Madison streets, had a remarkably fine horse cured of the scratches by St. Jacobs Oil.

NEW MEXICO will send a delegate to the next session of Congress, named Tranquilla Luna, which probably means tranquil lunatic. Aside from his tranquillity, he will not differ very materially from his fellow-members.—*Detroit Free Press.*

Poverty and Distress.
That poverty which produces the greatest distress is not of the purse but of the blood. Deprived of its richness it becomes scant and watery, a condition termed *anemia* in medical writings. Given this condition, and serfless swellings and sores, general and nervous debility, loss of flesh and appetite, weak lungs, throat disease, splitting of blood and consumption, are among the common results. If you are a sufferer from thin, poor blood employ Dr. Pierce's "Golden Medical Discovery," which enriches the blood and cures these grave affections. Is more nutritive than cod liver oil, and is harmless in any condition of the system, yet powerful to cure. By druggists.

CHILDREN are caricatures of their elders. Which is the reason that their elders have so little patience with them.

AS a tonic and nerve for debilitated women nothing surpasses Dr. Pierce's "Favorite Prescription." By druggists.

It is estimated that a \$30 horse will eat about \$75 worth of hay between this and next May.

DR. PIERCE'S "Pleasant Purgative Pellets" are sugar-coated and inclosed in glass bottles, their virtues being thereby preserved unimpaired for any length of time, in any climate, so that they are always fresh and reliable. No cheap wooden or pasteboard boxes. By druggists.

WHEN Fogg heard that Rev. Mr. Proof-text was made a doctor of divinity, he said divinity must be pretty badly off for doctors.

Set Back 42 Years.
"I was troubled for many years with Kidney Complaint, Gravel, &c.; my blood became thin; I was dull and inactive; could hardly crawl about; was an old worn out man all over; could get nothing to help me, until I got Hop Bitters, and now I am a boy again. My blood and kidneys are all right, and I am as active as a man of 20, although I am 72, and I have no doubt it will do as well for others of my age. It is worth a trial."—(Father).—*Sunday Mercury.*

"Signs of an early fall," Fogg remarked as he saw the banana skins on the sidewalk.

How to Secure Health.
It seems strange any one will suffer from derangements brought on by impure blood, when SCOTT'S SERRAPILLOLA AND STILLEGIA, or BLOOD AND LIVER SYRUP, will restore health to the physical organization. It is pleasant to take, and the Best Blood Purifier ever discovered, curing Scrofula, Weakness of the Kidneys, Erysipelas, Malaria; all Nervous disorders, Debility, Bilious complaints and all diseases of the Blood, Liver, Kidneys, Stomach, Skin, etc. As a health renewer, IT ACTS LIKE A CHARM.

BAKER'S PAIN EXPELLER cures pain in Man and Beast. Use externally and internally. DR. ROGER'S VEGETABLE WORM SYRUP instantly destroys worms and removes all the Secretions which cause them.

Don't Die in the House.
Ask Druggists for "Rough on Rats." It clears out rats, mice, roaches, flies, bed-bugs, &c.

EARLY to bed and early to rise, is good for the sleeper, but rough on the flies.

Said he: "And you love me better than all the world besides?" "Yes," said she. "And you love me better than anybody else?" "Yes, dear," said he. "And you wouldn't think any more of me if I was worth a million dollars?" "No," said she. "No; and if I was a rich heiress, you wouldn't want to marry me any more than you do now?" "No, darling." They were not lying, gentle readers; they were simply courting; that was all.

It took melons, plums, pears, grapes, butter-milk, beer, peanouts, cocoanut and ice-cream to give an Indiana boy cholera-morbus, and even then he was out next day.—*Detroit Free Press.*

THE restaurants have had such a run of customers that some of the waiters are a little inattentive. A stranger called for a plate of oysters, and, after smelling them, he said: "Waiter, are these oysters fresh?" "We are not running an intelligence office," "I would like to know if they are fresh." "Well, then, eat them, then you will know for yourself. You don't expect me to eat them for you, do you? Do I look like I was here to try old oysters on?"—*Galesburg News.*

THE "utterly utter" kind of talk has infected the street gamins, one of whom, after picking up a more than usually fragrant cigar stump, exclaimed to his friend: "Jack, this is quite too positively bulky."

"Oh, Charlie," exclaimed the elderly Miss Prim, "I've learned lots of things this summer—been studying botany and geology and—"
"Charlie," said the more new wrinkles, Miss Prim? "Charlie meant no harm, but Miss Prim was heard to remark, as she gazed into her mirror that evening: "The idea! More new wrinkles, indeed! The saucebox!"

SOME parts of New England still cling to the hotel gong, but most landlords are aware that the public do not judge the bill of fare by the following of a sheet-iron drum.—*Free Press.*

THE man with an impediment in his speech never speaks well of anybody.

Special Dispatch from Detroit.

The demand of the people for an easier method of preparing Kidney-Wort has induced the proprietors, the well-known wholesale Druggists, Wells, Richardson & Co., of Burlington, Vt., to prepare it for sale in liquid form as well as in dry form.—*East and Tribune.*

REDDING'S RUSSIA SALVE, the most wonderful healing medium in the world. Price 25c.

The best in the world—National Yeast.

KIDNEY-WORT
THE ONLY MEDICINE
IN EITHER LIQUID OR DRY FORM
That Acts at the same time on
**THE LIVER, THE BOWELS,
AND THE KIDNEYS.**
WHY ARE WE SICK?
Because we allow these great organs to become clogged or torpid, and poisonous humors are therefore forced into the blood that should be expelled naturally.

KIDNEY-WORT
WILL SURELY CURE
KIDNEY DISEASES,
LIVER COMPLAINTS,
PILES, CONSTIPATION, URINARY
DISEASES, FEMALE WEAKNESSES,
AND NERVOUS DISORDERS.
by causing free action of these organs and restoring their power to throw off disease.

Why suffer Bilious pains and aches?
Why tormented with Piles, Constipation?
Why frightened over disordered Kidneys?
Why endure nervous or sick headaches?
Use **KIDNEY-WORT** and rejoice in health.

It is put up in Dry Vegetable Form, in tin cans one package of which makes six quarts of medicine. All in Liquid Form, very Convenient, for those that cannot readily prepare it.

Get facts with equal efficiency in either form. GET IT OF YOUR DRUGGIST. PRICE, \$1.00.
WELLS, RICHARDSON & Co., Prop'rs.
(Will send the dry post paid.) BURLINGTON, VT.

JUDGE'S FOOD
Judge's Food is one of the best, cheapest and most reliable Foods in the world, and thousands of children are saved every year by its use. It is the **"NEW LADY'S DIET."** RIDGE'S FOOD receives the endorsement of physicians of all schools the world over. In cases of biliousness, 60 cents; \$1.25 and \$1.75 bearing the signature of **WOOLRICH & CO.** on every label.

NO FEE UNTIL CURED.
DEAFNESS, Catarrh, Asthma, Consumption, Hay Fever, Bronchitis, Coughs, Colds, Nervousness, Loss of Sleep, Diseases of the Blood, Rheumatism, Neuralgia, Headache, Dyspepsia, Diseases of the Liver, Kidneys, Lungs and Air Passages, of long standing, cured by **DR. JUDGE'S Oxy-Hydro-Geniated Air.** All diseases treated.

Send stamp for pamphlet with home references and questions to answer. No charge for consultation by mail or in person. Patients treated at a distance. DR. J. D. JUDGE & CO., 79 Beach St., Boston, Mass.

6,000 AGENTS WANTED, TO SELL THE LIFE OF

PRESIDENT GARFIELD
Complete, including his Death and Burial. Profusely Illustrated. New Steel Portrait of GARFIELD, the finest ever made. Portraits of his Wife and Mother, Grant, the Surgeon, the Cabinet, Scene of the Shooting; the Sick Chamber, the Funeral, &c. The only complete and authentic work. There is a Fortune for Agents first in the field with this Book. Turn 50c. Speak quick. **HURBARD BEON,** Chicago, Ill.

FRAZER AXLE GREASE.
Best in the World. Get the genuine. Every package has our Trade Mark, and is marked **FRAZER'S, SOLD EVERYWHERE.**

DR. METTAUR'S
DR. METTAUR'S HEADACHE PILLS cure most wonderfully in a very short time both SICK and NERVOUS HEADACHE; and while acting on the nervous system, cleanse the stomach of excess of bile, producing a regular healthy action of the bowels.

HEADACHE PILLS
A full size box of these valuable PILLS, with full directions for a complete cure, mailed to any address on receipt of nine three-cent postage stamps. For sale by all druggists at 25c. Sole Proprietors, **BROWN CHEMICAL COMPANY, Baltimore, Md.**

WISCONSIN LANDS
500,000 Acres
On the line of the
WISCONSIN CENTRAL R. R.
For full particulars, which will be sent free, address **CHARLES L. COLBY,** Land Commissioner, Milwaukee, Wis.

NEW RICH BLOOD!
PARSONS' PURGATIVE PILLS New Rich Blood, and will completely change the blood in the entire system in three months. Any person who will take 1 pill each night from 1 to 12 weeks may be restored to sound health, if such a thing be possible. Sold everywhere, or sent by mail for \$1.00 per box, and 5c. per pill. **JOHNSON & Co., Boston, Mass.,** formerly Bangor, Me.

WOMAN'S TRIUMPH!

MRS. LYDIA E. PINKHAM, OF LYNN, MASS.

DISCOVERER OF
LYDIA E. PINKHAM'S
VEGETABLE COMPOUND.

The Positive Cure

For all those Painful Complaints and Weaknesses so common to our best female population. It will cure entirely the worst form of Female Complaints, all ovarian troubles, inflammation and Ulceration, Falling and Displacement, and the consequent Spinal Weakness, and is particularly adapted to the Change of Life.

It will dissolve and expel tumors from the uterus in an early stage of development. The tendency to cancerous humors there is checked very speedily by its use. It removes faintness, dizziness, destroys all craving for stimulants, and relieves weakness of the stomach. It cures bloating, flatulencies, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion.

That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times and under all circumstances act in harmony with the laws that govern the female system. For the cure of Kidney Complaints of either sex this Compound is unsurpassed.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND is prepared at 233 and 235 Western Avenue, Lynn, Mass. Price \$1. Six bottles for \$5. Sent by mail in the form of pills, also in the form of lozenges, on receipt of price. \$1 per box for either. Mrs. Pinkham freely answers all letters of inquiry. Send for pamphlet. Address as above. Mention this Paper. No family should be without **LYDIA E. PINKHAM'S LIVER PILLS.** They cure constipation, biliousness and torpidity of the liver. 25 cents per box.

Sold by **MORRISON, PLUMMER & CO., Chicago, Ill.**
FOR SALE BY DRUGGISTS.

NEBRASKA LAND
