Paris, where 'there are from 5,000 to 6,000 inhabitants, all the working people are engaged in making the agate button, which, even with thirty per cent. duty added to the cost, sell, when imported into this country, at the extraduely low figure of thirty-one cents per great gross. The material alone, it is reported, could not be procured here for double that amount. While American manufacturers make

no attempt, and probably have no desire, to compete with European producers employing hand processes, they excel in making bone, composition, brass, ivory and gold buttons by machinery, and are able to export consid-erable quantities of these styles. Gossip and Curiosity.

Gossip is a patent sign of vulgarity in heart and mind. Intellect that never rises beyond the small mean facts of pesonal history, fluidity which cannot keep to itself what has been told even in confidence, and that goes about swelling molehills into mountains, can claim no respect, make out no case for itself against the gross, vile, stupid vulgarity recorded against it. If is as thoroughly vulgar as curiosity; and be-tween prying into things with which we have no concern and retailing gossip which is no business of ours to hundle at all there is not a hair's breadth to choose. Each is equally the sign of ntter and entire vulgarity; and, if one is the bull's-eye, the other is the gold. But both are faults to be found growing as rank weeds by the wayside; and it would be hard to count upon one's finzer seman on the subject, though, from baying been Gossip is a patent sign of vulgarity

# A Free Press Interview Sustained and Its

(Detroit Free Press.)

(Detroit Free Press.) A few mouths ago an interview with a prom-inent and well known physician, formerly a resident of Detroit, but now living in New York, appeared in the columns of this paper. The statements made by the doctor and the facts he divulged were of so unusual a nature as to cause no little commotion among those who read them, and many inquiries were raised as to the genuineness of the interview and the validity of the statements it contained. The mame of the physician was at that time sup-pressed at his own request. The seal of se-important and interesting letter which ap-pears below will abundantly show. In order, however, that the reader may better under-stand this letter, a few extracts are herewith given from the interview in question.
