Gents: I feel it my daty to ac snowledge what your Sarsaparilla has done for me Having inherited a Scronlous infection, I have infleted from it in various ways for years. Some times t burst out in Ulicers on my lands and arrassometimes it turned inward and distressed me at the stomach. Two years ago it broke out on my hear and avered my scale and ears with one sore, which was painful and loathsome beyond description. I bried many medicines and several physicians, but without much reflet from anything. In fact, the fisorder grow worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alterative (Sarsaparilla), for I knew from you reputation that anything you made must be good I sent to Chelmant and got it, and used it till it arred me. I took it, as you advise, in small doses of a tempoonful over a mouth, and used almost three bottles. New and healthy skin soon began to form under the scab, which after a while fell off. My skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I icel what I am stying when I tail you that I hold you to be one of the apostles of the age and remain over gratefully.

New Outhars, 25th Angust, 1859.

Dr. J. C. Aver: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Saraparilla. I have cured with it is recommended, and have found its effects truly wonderful in the cure of Fenereal and Mercurial Bissass. One of my patients had Sephilitic aleers in his throat, which were consuming his painte and the top of his mouth Your Saraparilla steadily taken cured him in five weeks. Another was attacked by secondary symptoms in his nose, and the alceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla. order would soon reach his brain and kill bim. But it yielded to my administration of your Sarsapacilla the ulcers heated, and he is well again, not of cours without some distinguisation to his face. A womat who had been tirrated for the same disorder by mereury was suffering from this poison in her hones. They had become so sensitive to the weather that or a damp day she suffered exeruciating pain in her points and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this freparation from your inhoratory must be a greatenedly; cortequently, these trally remarkable results with it have not surprised me. s a constitutional disease, a corruption of the slood, by which this fluid becomes viriated weak, and poor. Being in the circulation, it pervades the whole body, and may burst out a disease on any part of it. No organ is freshom its attacks, nor is there one which it may not destroy. The scrofulous taint is variously ansed by mercurial disease, low living, districted or unhealthy food, impure air, filling this habits, the depressing vices, and above all, by the venereal infection. What ever be its origin, it is hereditary in the contitution, descending "from parents to children into the third and fourth generation;" indeed into the third and fourth generation;" indeed t seems to be the rod of Him who says, ". vill visit the iniquities of the fathers upor

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, it he lungs, liver, and internal organs, is termed ubereles; in the glands, swellings; and or he surface, cruptions or sores. This foul cor-uption, which genders in the blood, depresses e energies of life, so that scrofulous constituions not only suffer from scrofulous complaints, but they have far less power to withtand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature re still rendered fatal by this taint in the vstem. Most of the consumption which deimates the human family has its origin directly a this scrofulous contamination; and many lestructive diseases of the liver, kidneys, brain and, indeed, of all the organs, arise from or re aggravated by the same cause.
