Syphilis and Mercurial Disease.

New Onleans, 25th August, 1859.

Dr. J. C. Aver: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla. I have cored with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Veneral and Mercurial Disease. One of my patients had Syphilitic ulcers in his threat, which were consuming his paints and the top of his mouth Your Sarsaparilla steadily taken cared him in five weeks. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparillas the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by maccury was suffering from this poson in her bones. They had become so sensitive to the weather that or a damp day the suffered exeruciating pain in her joints and hones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which your agent gave me, that this Preparation from your inborntory must be a greatement; consequently, these truly remarkable results with it have not surprised me.

Schirrus, Cancer Famors, Enlargement Elecration, Caries and Exfoliation of the Bones. A great variety of cases have been reported to u where cures of these formidable complaints have resulted from the use of this remedy, but our spac-here will not admit them. Some of them may b-found in our American Almanac, which the agent below named are pleased to furnish gratis to all whe eall for them.

Dyspepsia, Bleart Disease, Fits, Epilepsy Melancholy, Neuralgia. Scrofula, or King's Evil

s a constitutional disease, a corruption of the veak, and poor. Being in the circulation, i pervades the whole body, and may burst ou i disease on any part of it. No organ is fre rom its attacks, nor is there one which it may not destroy. The scrofulous taint is variously aused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and above all, by the venereal infection. What ver be its origin, it is hereditary in the contitution, descending "from parents to children into the third and fourth generation;" indeed t seems to be the rod of Him who says, " vill visit the iniquities of the fathers upor heir children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, ir he lungs, liver, and internal organs, is termet ubereles; in the glands, swellings; and or he surface, cruptions or sores. This foul cor-uption, which genders in the blood, depresses he chergies of life, so that scrofulous constituions not only suffer from scrofulous complaints, but they have far less power to withtand the attacks of other diseases; consequently vast numbers perish by disorder which, although not scrofulous in their nature re still rendered fatal by this taint in th ystem. Most of the consumption which demates the human family has its origin directly n this scrofulous contamination; and many lestructive diseases of the liver, kidneys, brain and, indeed, of all the organs, arise from or re aggravated by the same cause.

One quarter of all our people are scrofulous heir persons are invaded by this lurking inetion, and their health is undermined by it o cleanse it from the system we must renovate he blood by an alterative medicine, and in-igorate it by healthy food and exercise, such a medicine we supply in

Compound Extract of Sarsaparilla. he most effectual remedy which the medica kill of our times can devise for this everywhere prevailing and fatal malady. It is com-ined from the most active remedials that have een discovered for the expurgation of this foul isorder from the blood, and the rescue of the vstem from its destructive consequences. Ience it should be employed for the cure of ot only Scrofula, but also those other affecions which arise from it, such as Energys and Skin Diseases, St. Anthony's Fran tose, or Envirences, Pimples, Pustules, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER nd SALT RHEUM, SCALD HEAD, RINGWORM, theumatism, Syphilitic and Mercurial Disases, Dropsy, Dyspersia, Debility, and, ideed, all Complaints arising from Vitia-ED OR IMPURE BLOOD. The popular belief a "impurity of the blood" is founded in truth, or scrofula is a degeneration of the blood. The articular purpose and virtue of this Sarsapa-illa is to purify and regenerate this vital fluid, sithout which sound health is impossible in ontaminated constitutions.

ntermittent Fever, or Fever and Ague, temittent Fever, Chill Fever, Dumbigue, Periodical Headache, or Bilious leadache, and Bilious Fevers, indeed or the whole class of diseases originating in biliary derangement, caused by he Malaria of Miasmatic Countries.

We are enabled here to offer the community : emedy which, while it cures the above complaints with certainty, is still perfectly harmless in any mantity. Such a remedy is invaluable in districts uantity. Such a remedy is invaluable in districts there these afflicting disorders prevail. This 'Cure' expels the miasmatic poison of Fever ND AGUE from the system, and prevents the declopment of the disease, if taken on the first approach of its premaintery symptoms. It is not only he best remedy ever yet discovered for this class of complaints, but also the cheapest. The large uantity we supply for a dollar brings it within the each of every body; and in bilious districts, where 'Ever and Ague prevails, every body should ave it and use it freely both for cure and protection. Agreat superiority of this remedy over any ther ever discovered for the speedy and certain are of Intermittents is that it contains no Quinies of mineral, consequently it produces no quinism of their injurious effects whatever upon the constituther injurious effects whatever upon the constitu-ion. Those cured by it are left as healthy as i

ion. Those cured by it are left as healthy as it hey had never had the disease.

Fever and Ague is not alone the consequence of he missmatic poison. A great variety of disorders arise from its irritation, among which are Veuralgia, Rheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palintation, Painful Affection of the Spleen, Hysterics, Pain in the Boveets, Colic, Paralysis and Devangement of the Stomach, all of which, where riginating in this cause, put on the intermitten upp, or become periodical. This "Cure" expels he poison from the blood, and consequently cure hem all alike. It is an invaluable protection to maigrants and persons travelling or temporarily manigrants and persons travelling or temporarily esiding in the malarious districts. If taken occaonally or daily while exposed to the infection hat will be excreted from the system, and cannot commulate in sufficient quantity to ripen into discusse. Hence it is even more valuable for protection than cure, and few will ever suffer from Internitents if they avail themselves of the protection his remedy affords.
