Maj. North, commander of the Pawnee Scouts, is in the city. His command is at Kearney. It is expected they will move upon the Powder river expedition about the first of May.

The opinion that this year will see the cholera spread all over the country, seems to be gaining ground among the medical profession. Our exchanges from all parts give accounts of means to be used to prevent its ravages and arrest the fearful mortality which has hitherto attended its existence in this country. Whatever differences there may be in theories as to its cause, treatment, etc., all unite that cleanliness is one of the best preventives, and urge upon communities to exercise the greatest energy and care to have everything in the line of health deposited in such manner that it may do no injury. Would it not be well for our citizens to make provision against its coming, by thoroughly cleaning the streets, alleys, out-houses, etc., of all kinds of matter calculated to produce disease. In case the cholera should break out we would be prepared, and if not, cleanliness is not very likely to injure any one.

From Friday's Daily.
