PLASTIC SLATE,
FOR
ROOFING
AND OTHER PURPOSES.
The process of reconstructing Slate Stone from a
disintegrated state was
PATENTED FEB. 21st, 1895.
It is a combination of
Pulverized Slate and
Viscous Matter,
(the latter possessing qualities of geological and
chemical affinity for the former,) and is a de-
velopment of one of the simplest but un-
derstandable tendencies of nature.
AS A ROOFING MATERIAL
IT STANDS UNRIVALLED.
A material which adapts itself to every shape and slope.
Non-combustible, impervious, non-expansive
and non-contracting.
Frosts does not Crack nor Heat
Dissolve it.
The only Roofing Material ever discovered that will
resist the action of the elements as long as
the structure it protects. Being sus-
ceptible of little if any wear
from exposure and
PERFECTLY FIRE-PROOF,
It is unequalled as a covering for railroad, and farm
buildings for sale by
