About five years ago Mr. Thos. Thom as, of this county, picked a few kernels of wheat from some canary seed in Black & Butterrs store, and concluded to try the experiment of cultivating them. The first year the crop was destroyed by vermin, except a few stocks from which he obtained 90 grains; the product of these 90 grains, up to this year, is 42 bushels, notwithstanding the grasshoppers done serious damage to it during the past two years. Mr. Thomas thinks from what Sewing Machine, in our advertising colexperience he has had with this nea umns, kind of wheat (which, from the method of obtaining it he calls Canary Wheat) that it will yield about 50 bushels to the acre with a fair opportunity. It makes good flour, of a yellowish cast, raises well and makes as good biscuit as our best spring wheat flour. In order that the seed may be preserved, and oth ers may have a chance to try this wheat, Mr. Thomas proposes to dispose of a
