COM. VANDERBILT. We saw it stated, some time since, that Com. Vanderbilt carried out some very fine Railroad schemes during the late gold excitement in New York. He had been compelled to "tie up" with the Lake Shore road a short time before, and during the excitement he labored to bring Lake Shore Stock down to a low figure. He succeeded in bringing it down, and then purchased a controling interest, which had the effect to release him from his contract with that road, and allow him to make other consolidations, more to his liking. His idea of a "through line" via. Plattsmouth and Burlington will yet prove a success.

RAILROADS IN THE SOUTHERN PART OF THE STATE.

The Nemaha Journal has the following in relation to Railroad matters in Richardson county:

Grading on the C. B. & Southwestern eron 'Rail Road is now in progress near Rule in this county. The first ten miles will be graded before winter, which will

bring it to Falls City.

Work on the Trunk road will soon commence. No county in the State possesses better Railroad prospects than possesses better Railroad prospects than Ashland.—A. W. Richards, C. S. Wortman and Israel Bateman.

Lincoln.—H. F. Davis and Max immigration is rapidly coming in. We hope the people of Tecumseh, will hear the scream of the Iron Horse, before twelve months shall roll around.

We "second the motion," and hope . the iron horse may be heard in many other localities in Nebraska.

PUTTING ON AIRS.

The Davenport Gazette, in copying the correspondence between J. M. Hedrick, Pres't. Iowa Press Association, and Superintendent C. G. Hammond, U. P. R. R, makes the following comments:

"If the above had shown the least regret that he could not make any excepfication of rates or otherwise, its coolness would not have been quite so perceptible. Its present formality and iciness, we presume, would hardly have been so stri-kingly exhibited if another road was in operation to the Pacific.'

To our brethren of the press in Iowa, cured the means of providing pure, soft, we would say, there is another road cold water for all. The discovery of its To our brethren of the press in Iowa, started west from the Missouri River, and will seen find its way far into the interior of Nebraska, on its way to the Pacific. Let it be supported by the Iowa press, as heartily as the U. P. R. R. has been supported, and it will be but a short long suffered from rheumatism, and had long suffered from rheumatism, and had long suffered by the latter. they have a monopoly. The B. & M. in water, and when compelled, after some Dean. Henry Clay was accordingly en-Nebraska is a corporation abundantly moments, to withdraw it, he was able to seenced in the banker's "fine linen," able to "much things" able to "push things."

STATE FAIR.

The State Journal of Lincoln, Ne-

"Next year Lincoln will be an excel-lent point at which to hold a fair.-Brownvile has the State Fair, but situated as she is at present, it cannot be expected that many entries will be made except from the South-east corner of the State. Lincoln will be of easy access by rail from Omaha. Plattsmouth, Nebraska City, Fremont, Columbus and interven-ing points, and the country round about. Let us prepare for the event early next

We regret to see the spirit evinced in the above. As to holding "a fair" at Lincoln, "next year," that is all right, and we hope the good peoplo of that county will do it. If Mr. Gere proposes to get up a Fair in opposition to the regular State Fair, we think it simply bad faith—coming from the wrong source.—
The friends at Lincoln desired the next Fair held there. That was right, hon-orable and proper. The Board unani-mously decided that it be held at Brownville. All true friends of the organization will acquiesce and bide their time.

Again: the assertion that "it cannot be expected that many entries will be made. except from the South-east corner of the State," is in bad taste, uncalled for, and is not true.

To those well acquainted in the State this will be understood, and the joke appreciated. Prof. Gere knows that Brownville, the point selected for the next State Fair, is in the midst of and surrounded by the most extensively developed counties agriculturally, in the State—with due respect to other counties and localities. He knows County Fairs were held this year, in no other counties in the State, except Richardson, Pawnee, Johnson, Otoc and Nemaha.— These counties, with Cass added-and her Fair going people have already promised to be on hand, as they always are nearer making a State Agricultural Fair, what it ought to be to-day,—or next year—than any other setion of the State.—Advertiser's Agricultural Column.

We fully concur in the ideas of Col. Furnas, author of the above, that Brown-ville is the best located town in the State pieces, each about three inches square, State Fair at Plattsmouth soon, and believe the day is not far distant when even Lincoln can be reached with ease from all parts of the State, as our rail road system is developed; but for the at which to hold an agricultural fair at road system is developed; but for the present, Brownville is the place, and Cass county endorses the selection.

Death of Col. Wm. Baumer.

he was subsequently chosen captain, and was incorporated as a portion of the First Nebraska Regiment. He served faithfully throughout the bloody and protracted struggle, and was subsequently promoted from the official position to that of Lieut. Colonol of his regiment.

Col. Raumer was a brave soldier company of recruits in this city, of which he was subsequently chosen captain, and go on till you come to at old log, pass by the log and go up a hill; then go down the hill and turn up a holler and go about a mile, and then,"—"And then if you ain't lost I'll be darned." Some of the directions left us in the same fix.—Chroner on it."—Opinion.

Stump and go on till you come to at old log, pass by the log and go up a hill; then go down the hill and turn up a holler and go about a mile, and then,"—"And then if you ain't lost I'll be darned." Some of the directions left us in the same fix.—Chroner on it."—Opinion.

Stump and go on till you come to at old log, pass by the log and go up a hill; then difference, and the meat 8 inches in thickness. That last is some squash," Mr. Ranney, but why didn't you bring it to the Fair? We had rather of the home missionary.—Lorenzo brine to make the way easy for the successful labors of the home missionary.—Lorenzo on it."—Opinion.

Experiment with the New Electro-Magnetic Train Brake, A party of gentlemen, among whom to write her Byron article

were several railroad men and members of the press, made a short excursion on his seat in the Senate in December. the C. B. & Q. railroad yesterday afternoon, to witness the trial of a new electro-magnetic train brake, the invention of Mr. Joseph Olmstead, an employe of the company. The brake has been in use on that road for about a year past, and its efficiency and economical advantages have been thoroughly tested to the satisfaction of the company. It was to bring the invention more prominently before the notice of the public and the railway companies that the excursion was organized yesterday.

The brake is of simple construction. -Three Daniels' batteries are placed under a wheel attached to a shaft. An ama-teur plate, which is kept in motion by the revolution of the wheels of the cars, s so attached that when the magnets are changed it causes them to adhere to the and nothing more. wheel, thus carrying around the shaft, which winds up the chain attached to the ordinary brake levers, and this, pressing against the wheels, stays the bar. The method of working the apparatus is exstay the car, the engineer pulls the bell rope, which is so arranged that it raises a key placed in the ceiling of the cars, and this closes the circuit making the shaft revolve. The advantages of the

man. The entire apparatus costs only \$50 for each car, while it does away entirely with the need of brakemen.

The experiments made yesterday afternoon were eminently satisfactory. On the first trial, the train, after running half a mile in forty-five seconds, was brought to a stop in twenty many descriptions.

Cory O'Lanus' has a joke about the velocipede. He thinks Mexicans ought to be the best riders, because the more revolutions you make the faster you go. brought to a stop in twenty seconds, within a space of 672 feet. A second field, Mass., has just given \$40,000 for the endowment of the Hebrew professor-Chicago Tribune.

invention will be obvious to any railroad

The Story Of A Shirt-Clay Dean's. We have all heard of the "song of the shirt," and most of us know it by heart; and more of us should pay heed to what it so nobly teaches. That was by Hood, and the best thing Thomas ever gave to the world. Now we have the story of a shirt, of entirely different the latter the "copy" cries like the and on a widely different subject. This devil. is by the editor of the Winterset Sun, is founded on facts, "is facts" and has to do with the sweet smelling Henry, whose last name is Clay Dean. It runs thus: "Years ago, wher Mr. Albert West was one of the leading Democrats of this county, Henry Clay Dean came to Winterset to make a Democratic speech.—
Mr. West who has an unfaltering averticles, and that was on his back. The oned to require a shirt long enough to fit "My God! I can open my hand, and have not done it before for ten years."

This marvelous healing caused great umph, bearing off a five dollar shirt belonging to Mr. West. That shirt was never heard from until the fall of 1868, excitement among the inhabitants, and when Dean again came to Winterset to rent flowing from the pipe became sufficiently magnetized, in five minutes, to lift a tenpenny nail, and retain the power as if imparted from a localstone

The property of the pipe became sufficiently desire to see folks look tidy, afternoon, and some three hours after, landed at Cazenovia, having traveled about one hundred miles.

The property of the pipe became sufficiently desire to see folks look tidy, afternoon, and some three hours after, landed at Cazenovia, having traveled about one hundred miles. the inside of a clean one, Dean acqui-esced in the theory of the change but lacked the clean garments necessary to angel stirred the waters.

We give an illustration in point: A few days since Messrs. Christian & Patterson, of this city, went to St. Louis to try the virtues of the waters, and were greatly benefitted. They state to us that last Saturday an old man came to St. Louis, who had been unable, from rheumatism, to walk for more than three years, hobbling about as best he could with crutches, his feet especially being in a terrible condition. On Sunday he took was carried out on a chip into the sunlight, there on one corner of its narrative, appeared the name.—Albert West.—Eleven years that shirt had abode upon the back of the orator.
