

RESOLUTIONS.

The Chairman of the Committee of Arrangements for the Reunion of the Soldiers in Nebraska, to be held on the 4th of July next, at Lincoln, handed us the following "Programme" of the ceremonies to be had on that occasion:

PROGRAMME.

Union Soldier's Reunion in Nebraska, LINCOLN, NEBRASKA, July 4th, 1870. Reception of Soldiers at Depot by State and City officials.

Excursion to Fort and March to Capital, commencing at 10 A. M. and arriving at Washington, D. C., on the 10th of July.

Reception of the President and Vice President of the United States, and the members of the Cabinet, at the depot.

Reception of the President and Vice President of the United States, and the members of the Cabinet, at the depot.

Reception of the President and Vice President of the United States, and the members of the Cabinet, at the depot.

Reception of the President and Vice President of the United States, and the members of the Cabinet, at the depot.

Reception of the President and Vice President of the United States, and the members of the Cabinet, at the depot.

Chinese Labor in New England.

The introduction into an Eastern factory, in the very heart of New England, of seventy-five Chinese laborers, takes the country somewhat by surprise.

The treatment New England will accord to these men will soon be known. It remains to be seen whether they are to be met by the same intense prejudice that dogs their footsteps in California and shuts them out from all social intercourse and privilege.

The steady and diligent Yankee will not hastily place himself in a hostile attitude before these strangers. But if he sees in the success of his first venture the prelude to a vast influx of cheap foreign labor, which is to cheapen that of the American workman, he will not be easily allayed.

There are two eventful periods in the life of a woman—one, when she wonders whom she will have, and the other when she wonders who will have her.

In Queen Victoria's crown there are 1,363 brilliant diamonds, 1,273 rose diamonds, and 147 table diamonds, 1 large ruby, 19 sapphires, 11 emeralds, 1 large sapphire and 277 pearls—a total of 2,186 precious stones.

Rhode Island has inaugurated the clam bake season of 1870. An ex-devil to a country printing office, questioned as to the duties of a "printer's devil," he replied: "To bring in clean water, to carry out dirty water, to steal wood, lice, and numerous other articles."

A Richmond paper, calling attention to some improved sotted pigs bred there, says: "Our main object is to encourage our own people in preference to all others."

The Postmaster General has arranged with the Cunard and Inman lines to convey mail hereafter four times weekly. The Boston Post believes that had Andrew Johnson left his post for touring excursions, he would have been arrested on the sole ground of the immorality of angling, and a special committee would have been raised to intercept the lines he dropped, to discover if there was trout in their eyes.

The railway companies of the country are reported to be watching with some interest the experiment of the employment of Chinese labor by the Union Pacific Railroad; and the success of that company will be the signal for the introduction of "John" to the employ of the railroads all over the country.

At a collection made at a charity fair held in —, a lady offered the plate to a rich man well known for his stinginess. "I have nothing," was his curt reply. "Then take something, sir," she answered, "you know I am begging for the poor."

C. A. Davis, Berkley, Mass., makes nest eggs from real ones as follows:—"A sufficiently large opening is made to allow the shell to be emptied of its contents. Plaster of Paris is then mixed with water to the consistency of cream, and the shell-filled with the mixture, which hardens in a short time. The result is a nest egg, perfect in shape and color, and still serviceable if the shell gets broken off."

The theory that the image of the last object looked upon is retained upon the retina of the eye of a dead animal has been recently tested in Germany. The eyes of thirty different animals killed for the purpose were subjected for examination, but in no case was there any evidence discovered to support the theory.

Red Cloud remarked to Secretary Cox: "I want to sit as I sit where the sun sets," but it is evident from the posture he immediately assumed that he wanted to sit where the hen sets.

There is a tide in the affairs of men which taken at the flood leads on to fortune. A Massachusetts man, who for some months took a patent medicine, has just in the nick of time turned undertaker.

A Chinaman and a Jew had occasion to dispute on some matter of trade. "I help you graciously," said the Jew, "I help you graciously," said the Jew, "I help you graciously," said the Jew.

The Ohio State Penitentiary has a prisoner called the "irrepressible horse-chief," who has spent seventeen years in prison. The only prisoner in the Nantucket jail notifies the authorities that if they don't fix up that jail so that the sheep can't get in to hock his horns, he will be blown if he will stay in there.

"I can't speak in public; never done such a thing in all my life," said a chap the other night at a public meeting, who had been called upon to hold forth; "but if anybody in the crowd will speak for me, I'll hold his nugget for him."

The largest "nugget" ever found in Gipp's land, says the Times, was deposited in the Bank of Victoria, early in February. The nugget weighed 43 ozs, 3 dets., and was pure gold of good quality. The finder was a man named Thornton, who was on a "hitting" tour; and the locality of the find was Bink Bonny creek, near Maximilian creek, Freestone.

The discovery was quite accidental, as Thornton had no expectation of finding gold where the nugget turned up, and only struck his pick into the ground to ascertain the nature of the soil.

Orders have been received at the Springfield (Mass.) Armory for making 3,000 caliber rifles, which are designed for distribution to military schools throughout the country, under the conditions of a recent act of Congress.

A very good joke is told of a gentleman in Cambridge, Md., who is a very worthy citizen, who had a farm, and a distance out in the country, which he leased to a tenant, the landlord to grow two-fifths of the crops. When the crop was saved, the tenant saddled his horse and took the landlord's share to him tied up in a handkerchief, who, upon seeing the bundle, asked what was there. "Your share of wheat," said the tenant. "Landlord—My what? Tenant—Your share of the wheat. Landlord—Take it back to the world, in order to be sold; and if you have five grains, bring them in a wagon, but never come again on horseback."

There is not a single member of a single church, male or female, young or old, rich or poor, who should be engaged in personal efforts for the conversion of souls. Our army may as rationally leave the battle to be fought by the officers alone as the Church leave the conversion of the world to the ministers of the Gospel. Indeed, it is a fundamental error to consider it a mere non-terrestrial work.

The New York Express says: "The types are compelled to make many awkward mistakes, but none more awkward than that which made us say that Judge Logan had 'married her uncle,' when we had written 'sprained her ankle.' Fortunately it did not get out before the public."

The Loss of Life says: "More quarrels arise between brothers, between sisters, between hired girls, between school girls, between clerks in stores, between apprentices, between hired men, between farmers in general, are disposed to take advantage of the generosity of mankind, in general." "Sit down, sit down," whispered a colleague who sat near him; you are coming out at the same hole you went in at."

At the annual meeting of the State Dental Society in Boston on Thursday last, the following resolutions were adopted: "Resolved, that we will never have five grains, bring them in a wagon, but never come again on horseback."

Men, if they ain't too lazy, live sometimes till they are 80, and destroy the world in general, are disposed to take advantage of the generosity of mankind, in general. "Sit down, sit down," whispered a colleague who sat near him; you are coming out at the same hole you went in at."

This setting down and folding our arms and waiting for something to turn up, is just about as rich a speculation as going out in a 400 acre lot, setting down on a sharp stone with a nail between our knees, and waiting for a cow to back up and be milked.—Josh Billings.

The Loss of Life says: "More quarrels arise between brothers, between sisters, between hired girls, between school girls, between clerks in stores, between apprentices, between hired men, between farmers in general, are disposed to take advantage of the generosity of mankind, in general." "Sit down, sit down," whispered a colleague who sat near him; you are coming out at the same hole you went in at."

It is related that the Rev. Dr. Samuel West, of West Bedford, once reduced a refractory choir in the following way: "I having seen rumored that they would not sing a note on the next Sabbath, he commenced morning worship by giving out the hymn, 'Come ye that love the Lord.' After a few minutes, he looked up very emphatically at the choir, and said: 'You will begin at the second verse: "Let these refuse to sing, "Who ever know our God."

An old bachelor says that we are safe from ever having a woman for President, because not one of the sex would ever confess to being over thirty five, which is the age prescribed by the Constitution as the youngest point at which any man is eligible to that office.

Never hold anybody by the button by the hand, in order to be heard; if it, it people are not willing to hear you, you had better hold your tongue than they.

An "Elegant gold mousetrap" set of false teeth "by the prize in a raffle at a ladies' fair in Toledo.

The British public are beginning to give up all hopes that the famous African explorer, Dr. Livingstone, is among the living. It is a long time since any tidings have been heard of him, and these have been quite vague and uncertain. One detained by long sickness, or as a prisoner to some savage tribe, he is probably dead. A British relief expedition has been started from Zanzibar to make a search for him, and him, living or dead. This search will also settle the important question of Livingstone's last letter thought he had solved—the point of the highest sources of the river Nile. The return of the expedition will be waited for with great interest.

A book of two parts, entitled "The Way to Glory and the Road to Destruction," is shortly to be published. The first part is descriptive of a visit to New York, and the second, a trip to Chicago.

We recently heard a strong-minded lady on the question of suffrage being granted to woman throughout the United States in less than three years. Wonder what the prospects of the inhabitants of the other place are.

While a lot of workmen were excavating a foundation for a Exchange depot in Savannah, last Saturday, they came across a lot of bones, two one dollar silver pieces, and five Spani h quarters, bearing date from 1754 to 1776.

Girls would do well when they are married to turn up all their old love letters, a gentleman found a letter addressed to his wife, by some former admirer, after he had been married to her two years, and was so provoked at the tone of the letter that he immediately made application to a divorce, and was obliged to extend the desired gratuity; to one of the officers of the road suggesting, as the interview closed, that assassination was a new ground for claiming the honor of a railroad pass.

Chamber's Journal gives this illustration of the power of the colored rubber to deaden sound: "We once visited a factory where one fifty or fifty copper smiths were at work in a shop above on heads; but what was remarkable, scarcely a sound of their noisy hammers could be heard. On going up stairs we saw the explanation. Each leg of every bench rested on a cushion made of India rubber cuttings. This completely deadened the sound."

There are illegitimate callings. That of a gambler is no better than that of the "gentleman of the road." The gambler is, under the most favorable circumstances, a very vicious and dishonest character. No business man possessed of capital, would be willing to go surety for him, for any considerable sum, or length of time. A calling, in order to be legitimate, must be useful to society. And of such, there are enough to give profitable employment to every idler in Christendom. True labor builds up and enriches communities and nations. Idleness and illegitimate vocations impoverish and degrade.

There are says: "It is a curious fact that if a man is lost in the woods, and continues walking, he will in a few days round in a circle, so tautly veering to the left hand. It is because the right side of every human being (except in the case of left-handed people) is more developed than the left. Consequently the muscles on that side are stronger, and tend gradually to throw the body round, unless the aim is directed to some particular point."

Rev. Mr. Denorest is under trial by the General Synod of the Reformed Church, at Newark, N. J., on a charge of "preaching, dry and uninteresting sermons."

The only prisoner in the Nantucket jail notifies the authorities that if they don't fix up that jail so that the sheep can't get in to hock his horns, he will be blown if he will stay in there.

The discovery was quite accidental, as Thornton had no expectation of finding gold where the nugget turned up, and only struck his pick into the ground to ascertain the nature of the soil.

The London Jewish Chronicle urges the concurrence of the Jews in the registry of the Bible.

Dr. Cummings' favorite description of the Pope is "that respectable but deluded old gentleman."

The lands adjoining the Suez Canal have been sold by the Viceroy of Egypt, to the extent of a value of 24,000,000 sterling, the proceeds to be divided between the Viceroy and the canal company.

In Idaho refinement is so little known that young ladies clean their teeth with corn-cobs.

Twenty one thousand emigrants, mostly from the month of May, for America, and nine tenths thereof going to the port of New York.

Loe made by the artificial process in San Antonio, Texas, sells at two cents a pound, and to stockholders at a cent and a half.

An Irishman, eating his first green corn, handed the cob to the waiter, and asked, "Will ye please put some more bane on me stick."

The Queen of Prussia had the other day a stroke of apoplexy. Her physicians have informed her that her days are numbered.

There are 150 assistant marshals employed in the census of New York city.

The Yale "soph's" lately stole all the freshmen's new "stovepipe" hats.

Two young ladies belonging to influential families in Hartford, are under surgical treatment for cramped and distorted feet, caused by wearing the prevailing style of high heeled shoes.

The guide at Niagra Falls says that women show more nerve and firmness than men in visiting the "Cave of the Wounds."
