

THE GILLESPIE IMPROVEMENT.

Does Geo. L. Miller assert a known falsehood in regard to the evidence before the investigating committee, for the purpose of manufacturing public opinion against Gov. Butler and against the committee, or is some member of the committee so lost to all sense of honor and justice as to furnish the said Miller with the full text of the evidence taken where Dr. Miller got the Melville evidence? We do not ask these questions from idle curiosity, nor yet because the Omaha Herald simply publishes the news first, as it claims; but because the attention of Dr. Miller that he is acquainted with the evidence before the committee is a base slander upon the committee, and is equivalent to an accusation of treachery on the part of some member thereof. Will the committee charge itself from this base insinuation of the Omaha Herald?

Does not the "reserved rights" of the impeachment managers—produce their charges and specifications against Gov. Butler if these fail—smack the least of persecution? Does it not seem a slight tendency to convince the public mind that they know they have no evidence to sustain their impeachment, and that what they most expect and most desire is simply to harass Gov. Butler and make him appear before the public (and not before the Senate) as a bad man? We have thought, sometimes, when we looked over the ground and saw the class of men who were most bitter and loud in their denunciations of the committee, and that they might possibly swerve from their "exact justice" for the purpose of injuring a political enemy. Perhaps we are mistaken, but the political history of some of the men who are loudly crying "stop thief" is pretty well known in Nebraska.

ABOUT MRS.

Willies do not control the columns of the Omaha Herald, nor can Lincoln's friends intimidate it. Omaha Herald, March 2d, 1871.

In view of this thrust at Lincoln, by the Omaha paper, we make the following statement from a sworn statement of several members of the Legislature of the session of 1870, showing how Omaha's friends ran things at that time. Hon. W. F. Chapin was Speaker of the House at the time:

After inflammatory appeals from G. W. Frost and E. P. Child, of Omaha, and A. F. Harvey, of Nebraska City, respecting resolutions to the legally constituted authorities of the House, A. F. Harvey, of Otes, rose, and after a few preliminary remarks, moved that the name of Abbott be called for the Chair, calling upon those who favored the motion to say "aye." Many, but not all, of the opposition said "no." But without waiting for a division in order to get the true sense of the House might be known, the mob made a rush to the speaker's Chair. Thereupon the House adjourned until 10 o'clock on Monday, and descended from the Chair dejectedly, and walked from the room, followed by 16 members, leaving the hall in possession of the mob. The members were compelled to call on the Governor for protection against the Omaha mob before they dare attempt further legislation. If the mob of Omaha is not enough for our friends who still allow Lincoln's name to run his name, we might cite him to how Omaha's friends did as far back as 1858.

AND STILL HOW IS IT?

A few days since we asked how it was that Dr. Miller claimed to have a knowledge of the evidence before the Investigating Committee, while no other person in the State was allowed to know aught of that evidence, not even men who were charged with "high crimes and misdemeanors." In reply to our inquiry Dr. Miller vauntingly intimated that he has a "friend at court," that he has a secret means of ascertaining this evidence. Now, there are just exactly two hours to this dilemma, and no more; either Dr. Miller knows of no evidence to condemn Gov. Butler, as he claims he does, and he asserts a brazen falsehood for the purpose of doing Gov. Butler an injury, or else he must be furnished the evidence by some member of the committee, as no other person outside the committee was allowed to know aught of their proceedings, or of the testimony produced before them. Which horn does Dr. Miller choose? In justice to the committee we are compelled to believe the former, and in justice to Dr. Miller and out of respect to the profession which he follows, we are compelled to believe the latter. Now, we hope the Dr. will not annihilate us because we are "rural," but will condescend to remove this cloud which seems to hang over himself and his committee.

During Gen. Phil Sheridan's recent visit to Naples, a special examination was made for his benefit at Pompeii. Generals frequently receive ovations, but this is one of the rare occasions when they are honored by an excavation.

The Pella Blade says the man who didn't believe in advertising has gone in to partnership with the sheriff, and they are to have an auction.

OPINION OF THE SUPREME COURT JUDGES.

The House of Representatives asked the Judges of the Supreme Court for their opinion on the question of Governor Butler's suspension from office, and the following is their reply. Whether or not Judges Lake and Crouse acted wisely in giving an opinion without hearing argument and when no case was before them we leave each one to judge for himself.

To the Honorable the House of Representatives of the Legislature of the State of Nebraska.  
GENTLEMEN—In response to the resolution presented to the Supreme Court by your honorable body, in which you request the opinion of the Court upon the question, "Does the impeachment of a Governor constitute a crime?" we have to say:

First, That the question does not come to us in such a form as to enable us, as a Court, to give an authoritative decision thereon. But in view of the great importance of the question—namely, that of your honorable body, but to all branches of the Government—we feel it to be a duty to accede to your request, and extend the committee the aid of this informal opinion which we give.

Second, Section 58, Article 2 of our State Constitution confers upon the House of Representatives the sole power of impeachment, and the next section provides that the question may be impeached among which is the Governor.

Section 16 of the article entitled "Executive" provides in what contingencies the duties of the Governor shall devolve upon the Secretary of State. They are five in number, viz: 1st. His impeachment.

The youngest who edits the *Register* speaks right out "in meeting" and tells the old democratic fossils just what he thinks about them and their deceptive ways. Dr. Blue, Dr. Miller, and a few other Democratic doctors, attempted to overshadow the "youngster" and whip him in to do their bidding, but the "boy" has a mind of his own and tells them he does not "accept the situation" and the 13th amendment.

Among the charges against Governor Butler is one that he let the Asylum and University to irresponsible parties. Admit it to be a fact, and what is it? We know nothing of the Asylum, but the University is a first class building, and the State is yet indebted to the contractors in the sum of \$40,000 for it. They seem to have completed the building, and to be sufficiently "responsible" to carry \$40,000 of the States' indebtedness.

The offering of the resolution of impeachment against Auditor Gillespie has developed some new phases in the impeachment matter. Several of the most intense advocates of purity, honesty, and impeachment of Governor Butler, suddenly discovered that the simple "irregularity" of opening bids by Auditor Gillespie, in order that some one else might have an advantage, should not be considered of any importance. It develops the apparent fact that some of these fellows who open their mouth, so very wide to cry "stop thief," have a very great preference as to who the supposed thief is, and that it is not so much the crime they are after as the man.

Nothing wears like homeliness and plainness. The men in whom we see no change have characteristics that defy the ravages of time, and dash back its tide like so many ragged rocks. Indeed, there is this advantage in ugliness, that it needs with years; inasmuch as it has nothing to spoil, it takes courage. As Lady Charlotte Lindsay, witty and plain, put it, "My ugliness has lost its force—to be any older than he can help."

A Curious Fact in Nature.  
One of the strongest proofs of the frequent return of a man is an abridgement of the animal world is illustrated by the following facts: In the fish the average proportion of the brain to the spinal chord is only two to one. In the bird it is three to one. In the mammalia it is four to one. But in man it is twenty-three to one. No less remarkable is the fetal progress of the brain. It is not until a child is a year old that it reaches its full development. It is not until a man is a man of that of a reptile; then into that of a bird; then into that of a mammiferous quadruped, and finally it assumes the form of a human brain. Thus comprising in its fetal progress an epitome of zoological history, as if man was himself a compendium of all animated nature and of kin to every creature that lives.

A young poet in describing Heaven, says: "It is a world of bliss fenced in with pretty girls. Where is the man who won't repent now."

LETTER FROM LINCOLN.

LINCOLN, March 1, 1871.  
EDITOR HERALD:—The Legislature assembled yesterday at two o'clock p. m., and went to work in a manner that showed something had to be done.

Several bills of a local nature were considered and passed at once. The Committee on Judiciary, to whom was referred the special message of the Governor relative to the rendition of one John Lincoln, claimed to be a fugitive from justice from the State of Pennsylvania, made a very lengthy report, with a censuring the Governor for refusing to honor the requisition of the Governor of that State. On the adoption of the report, Mr. Myers, of Douglas, complimented the committee for the able report they had made, and, as usual, paid his respects to the Governor in a style that was anything but flattery. Myers is very bitter on the Executive, and throws in his remarks whenever an opportunity presents itself.

At 4 p. m. both houses met in joint session to hear the report of the Investigating Committee. As soon as everything was ready a special order was received from the Governor entering his protest against any such proceeding, alleging that he had been debarred from the meeting of the committee, and that the next session should be devoted to the consideration of the question—namely, that of your honorable body, but to all branches of the Government—we feel it to be a duty to accede to your request, and extend the committee the aid of this informal opinion which we give.

Section 16 of the article entitled "Executive" provides in what contingencies the duties of the Governor shall devolve upon the Secretary of State. They are five in number, viz: 1st. His impeachment.

The youngest who edits the *Register* speaks right out "in meeting" and tells the old democratic fossils just what he thinks about them and their deceptive ways. Dr. Blue, Dr. Miller, and a few other Democratic doctors, attempted to overshadow the "youngster" and whip him in to do their bidding, but the "boy" has a mind of his own and tells them he does not "accept the situation" and the 13th amendment.

Among the charges against Governor Butler is one that he let the Asylum and University to irresponsible parties. Admit it to be a fact, and what is it? We know nothing of the Asylum, but the University is a first class building, and the State is yet indebted to the contractors in the sum of \$40,000 for it. They seem to have completed the building, and to be sufficiently "responsible" to carry \$40,000 of the States' indebtedness.

ELECTRO-MOTIVE POWER.

Dawn of a New Economic Motor  
The Great Secret Probably Discovered.  
From the Telegraph Journal.

If we mistake not, we are in the dawn of a new and economical motive power. We are watching an immense expectation of its approach. Now, by the scientific exposition of the possibility of an infinitive development of magnetic power by an apparently inadequate initial force, as argued by Mr. Highton of England, and the apparent proof of it before our senses, seemingly verified by our experiments, we are strongly induced to believe that the dawn of a new power, capable of endless application at a minimum cost, and destitute of the usual element of danger. It occurs to us very strange that what is just being proposed as a possible status of affairs by a learned divine in England, should be the self-same theory which an American citizen has been privately and persistently developing in actual practice for years. To what it may give rise we have no prophet's ken to tell. If the premises demanded are proven to be correct, its application is infinite. We may yet see the Atlantic crossed by huge vessels, propelled without an engine, and a steam power the initiative of which the Captain may place beside his writing desk, and the littlest finger may stop. The beamless furnace, which is just being put out from the lower hills and walk the deck as clean as the passenger, and the blazing fires be put out. And it may be that in the mysterious workings of the Almighty, these elements of a new power, on every hand developing themselves as the life of the world, quickening its pulses from pole to pole, the cause of growth and the cardinal element of a power the limit of which is yet unknown, may be ordained to render to man, in the course of time, the most wonderful and beneficent boon that ever descended upon the human race.

OUR WYOMING LETTER.  
CATTLE RAISING, MINERALS, ETC. OF WYOMING.  
FORT D. A. RUSSELL, W. T.,  
March 3, 1871.

DEAR HERALD:—The resources of this Territory are being developed very rapidly. The numerous flocks of sheep and herds of cattle and stock, which are being raised, are doing well. The Territory is being developed very rapidly. The numerous flocks of sheep and herds of cattle and stock, which are being raised, are doing well.

STILL LATER.

Auditor Gillespie impeached.

LINCOLN, March 2.  
ED. HERALD:—Since I wrote you yesterday, the House has impeached John Gillespie for malfeasance in office. The resolution was adopted yesterday. The testimony was taken last night; reported on by the committee consisting of Gale, Dillon and Beal—report adopted this morning at 12 o'clock. The testimony referred to the letting out of the public printing of 1869; and showed that Gillespie, to whom was referred the proposals of various parties, opened the bid of Dr. Miller, and that the same was also a civil servant of the State should get retiring pensions, when through sickness or old age they become unfit to teach. Teachers are provided for in this way in most of the States. Your committee should not be behind in providing for the men who are endeavoring to make good citizens of the children that are to be the future Governors of the country. The social standing of the Irish National school teacher is higher than the public school teacher in this country. Not long since a deputation of Irish school teachers waited on Gladstone and his great speeches were ably advocated by the celebrated philanthropist, Ver. Foster. Gladstone promised to advocate their case before Parliament, and the probability is, that they will get higher pay and retiring pensions. Why not inaugurate a movement of this kind in America? Teachers' associations should be established in every convenient locality—this is the first step in the right direction.

A Curious Fact in Nature.  
One of the strongest proofs of the frequent return of a man is an abridgement of the animal world is illustrated by the following facts: In the fish the average proportion of the brain to the spinal chord is only two to one. In the bird it is three to one. In the mammalia it is four to one. But in man it is twenty-three to one. No less remarkable is the fetal progress of the brain. It is not until a child is a year old that it reaches its full development. It is not until a man is a man of that of a reptile; then into that of a bird; then into that of a mammiferous quadruped, and finally it assumes the form of a human brain. Thus comprising in its fetal progress an epitome of zoological history, as if man was himself a compendium of all animated nature and of kin to every creature that lives.

NEBRASKA GROWN  
FRUIT TREES!  
I hope to be able to spend a few days in Plattsmouth, Neb., and make a note of the movements that have been made in the few months since I was at home. Yours truly,  
A. WRIGHT,  
Post Chaplain, U. S. A.

WOODEN COFFINS  
Ready Made, and Sold Cheap for Cash.  
WITH many thanks for past patronage, invited to call and examine my large stock of Furniture and Coffins. JAMES VICK, Plattsmouth, Neb.
