HO! FOR THE WEST!!
For the Herald.
Land of the rolling river;
Land of the Prairie dew;
Land of shower and sunshine,
The happy land and true.
Land of peace and plenty,
Land of grain and wine;
Land of the farm and orchard,
Land of the juncos vine.
Land of lands for a nation,
Silvian, brave, and true;
The land of the rainbow,
Her worth lies waiting you.
Ho, for the west 'tis the watchword,
Ho, for the west, Ho, Ho;
Too illustrious to be named,
Give answer back, Ho, Ho!

THE GRANGERS' YANKEE DOODLE.
Across the fields whose mighty yields
Have fed the hungry nations,
Are coming cries and sharp replies,
And thrashing exclamations.
CHORUS—Yankee Doodle shall free
The farmers from their danger;
No dandy life, as all can see,
But Yankee Doodle Granger.
We'll catch at last, and bind them fast,
These soulless corporations;
Nor let them break the bonds we make,
To sell their souls to Satan.

Current Comment.
The Ohio State Journal points out a fact worth all the speeches of the canvass:
In all the time that the Republican party has had the control of the State government of Ohio, collecting and disbursing millions on millions of money, the State has lost not one cent by the unfaithfulness or incapacity of its officers.
A person for the numerous stories about Wilkes Booth that have of late found their way into the "Independent" opposition papers is furnished by the Pittsburg (Pa.) Commercial.

The National Presence.
Of the thousands of persons who yearly visit the Capitol at Washington, but comparatively few stop to examine critically the frescoes in the corridors. They are so wrapped in eternal shadow one needs to remain a considerable time to accustom the eyes to the twilight effect. At first it is but a confused mass of half-illuminated color, gradually drawing upon the sense like a rainbow web. Look closely in kaleidoscopic changes, figures begin to stand out in portrait, landscape, beast, bird, flower, insect, and emblematic designs. Movement and voice given, and the Congressional Hall itself would be outdone in diversity of speech and motion. Every blossom and bird known in America is here faithfully and artistically depicted. Individual panels tell stories of morning and evening, the birds bathing at the fountain, the buds heavy with dew, and myriads of thinnest insects studding leaf and branch. There are but few who know by whom our national palace was decorated. They pass by, note the endless variety of design, the minute finish of the smallest worm upon the leaf, recognizing with delight a familiar landscape, a well known portrait, stand amazed before the tender grace of goddess and cherubs, never once asking who were the artists, or if asking, fail to elicit any satisfactory reply. They are the works of two young Germans. Seven long years they worked with straining eyes, burning in upon those walls their wonderful impressions, until the declining health of one and the falling eyesight of the other forced them to rest from their labors. One lies in his premature grave, the other, stone blind, waves baskets for a living in the city of Hamburg.

WIVES' COLUMN.
A very adhesive cement, and one particularly useful for fastening the brass mountings on glass lamps, as it is unaffected by petroleum, may be prepared by boiling three parts of rosin with one part of caustic soda and five parts of water, thus making a kind of soap, which is mixed with one half its weight of plaster of Paris.
TO WASH CALICO.—Beef's gall, strained and kept in a bottle to put in the water for washing calico, will prevent fading, if no soap is used. The water in which bran has been boiled, when allowed to settle, is good also.—We are told on good authority that calico will not fade if put to soak 6000 minutes before washing in a pallful of water in which has been dissolved a teaspoonful of sugar of lead.
HOUSE CLEANING.
The delightful task of house cleaning has come round again, and we bid it welcome. To those of us who have been "through the mill" repeatedly it has no terrors, but we remember the time when it was more to be dreaded than the toothache; and out of compassion to young housekeepers we throw out a few hints. The place to begin house cleaning is in closets, drawers, and trunks. During the winter, unless one's whole house is warmed, these become disordered. All carpet rags and materials for quilts and comforts should be gathered together, and an inventory be made of all dry-goods in the house, so that the housekeeper will know exactly what she has on hand. All old shoes should be removed to an out-house to be planted out around trees and vines. This is better than throwing them away or burning them up. Then the curtains should be taken down, washed, ironed, and laid away until the windows are ready for them. The cleaning and scrubbing should begin at the top of the house and go down; at the front of the house and go back. One room at a time should be torn to pieces and put to rights. In this way the unutterable confusion often attending house cleaning can be very much diminished, and there will be one room where the tired housekeeper can sit down in peace. If whitewash is to be applied, let it be done after the carpets are taken up, and before the paint is cleaned. If painting is to be done, it should succeed the whitewashing and papering, with some other that. It is better to extend the "agonies" over two or three weeks and take it easy than to get it all over in one and nearly kill one's self, especially where hired help is not employed. In cleaning paint, whitening is better than soap, as it does not eat the hands, a window-brush is indispensable in cleaning sash and baseboards, and if one is near a pottery and can procure quart flour it will help in getting stains out. When the kitchen, wood-house, cellar, and out-houses have all been gone through and put to rights, the bedding may be washed. To be, with a washer and wringer, this is a very easy task; all we bargain for is flame-soap, abundance of soft water, and a clear, bright day. Flame-soap contains no resin, and leaves woolen goods as soft and fleecy as when they were new; resin hardens the fibres of wool. If the water is hard ten cents worth of borax will soften it. There are certain conveniences which materially lessen the drudgery of house-cleaning. A step-ladder makes less demand on the muscles than chairs and tables used as substitutes. A carpet-stretcher adds very much in getting down carpets. This is merely a steel comb (about twice as long and wide as the common dress-comb) set in a long handle. A wall-brush, which is a common brush with one end round, and the other set in a long handle, will make the tiresome stretching up of one's arms in cleansing ceilings unnecessary. Of course we will have mop and scrubber, and not get down on hands and knees to cleanse floors. Strict attention should be paid to sleep and diet during this fatiguing ceremonial. One needs nine hours of slumber, plenty of nutritious food, and ample time to eat it. Economy in any of the three will be "saving at the top and losing at the bung." Merriment and cheerfulness are wonderful auxiliaries in helping one to come out of the battle without a scar. Mark Twain on Putting-up Stoves, is recommended; also the works of poor dear Artemus Ward, whom we grieve for yet; Josh Billings' Almanac will be a hygienic diluting of the family-wield during this crisis. "Miracles Will Never Cease." During a meeting of the Concord Baptist Association at Oronton, Ky., last week, a certain preacher delivered a sermon that deeply touched a good old Democrat in the audience—and an Owen County Democrat, be it known is of the purest breed. On being told the preacher had been a Yankee General, he seemed wonder-struck. At the close of the sermon he approached the preacher, and taking him by the hand said: "They tell me you were a Yankee General in the Federal Army." "Yes," was the reply, "and I tried to do my duty." "A Yankee and converted?" "Yes." "And a member of the Baptist?" "Yes." "Well, well," said the "miracles will never cease."—Moon (Ga.) Telegraph.

PHYSICIANS.
R. B. LIVINGSTON, Physician and Surgeon.
Tenders his professional services to the citizens of Cass county, office on southeast corner of Oak and Sixth streets; office on Main Street, on door west of Lyman's Lumber Yard, Plattsmouth, Nebraska.
INSURANCE.
WHEELER & BENNETT—Real Estate and Life Insurance Agents, Notaries Public, Fire and Life Insurance, Plattsmouth, Neb.

BROOKS HOUSE.
JOHN FITZGERALD, Proprietor.
Main Street, between Fifth & Sixth.
MISCELLANEOUS.
Plattsmouth Mills.
C. HENSEL, Proprietor. Have recently been repaired and cleaned. Send for circular.
GREENHOUSE AND BEDDING PLANTS.
Time and money saved by ordering of me. I have the largest and best collection of Plants ever offered for sale in the West. Catalogues free. Sweet Potatoes, Cabbage, Tomato, and other plants for sale in the season.
Address W. J. HENSEL, Plattsmouth, Neb.
Agents Wanted.
FOR A BOOK NEEDED BY ALL FARMERS!
The best book published on the Horse and the Cow. Illustrations. Money made rapidly by agents selling this book. Send for circular.
FINE ART GALLERY.
Photographs, Ambrotypes and copies from old pictures, plain or engraved and warranted to give satisfaction.
NEW DRUG STORE.
POTTER & GAFFNEY.
L. GOLDING.
E. L. ELSTER, MERCHANT TAILOR.

Churches.
BAPTIST—On the corner of Main and Ninth.
CHRISTIAN—Service in Congregational Church at 11 a. m. and 7:30 p. m.
METHODIST EPISCOPAL—West side of 4th Street, south of Main.
PRESBYTERIAN—North side of Main Street, between 4th and 5th.
Lodges.
I. O. O. F.—Regular meetings of Platt Lodge No. 1, 1st St.
K. G. L.—Regular meetings of the 2d and 4th Lodges of each month.

THE PANIC STRICKEN PEOPLE OF MEMPHIS FLEEING.
EVERY TRAIN OF CARS AND EVERY BOAT LEAVING CROWDED.
Thirty to Forty Deaths a Day at Shreveport.
The Fever Reported to be Raging in New Orleans.
Special Dispatch to the St. Louis Globe.

YELLOW FEVER.
The Yellow Fever panic has been as high as ever to-day. The early morning trains went full of fleeing citizens, and at noon the rush was greater than ever. The Louisville train took out six coaches full and two cars of baggage, leaving one hundred or more that they didn't have cars for, and on the Charleston the scene at the depot at noon was of no little confusion. Seven coaches filled went out. There must be a number leaving by boat also, and in fact, nearly all who can leave are either gone or getting ready to go, and will leave during the next two days.

BACK SALARY.
There is no difference of opinion as to the character of that legislation, by which Congressmen not only increased their future compensation one-half, but also provided for back pay at the same rate. Both the Democratic and Republican platforms condemn this action in unmistakable terms. There is but one sentiment regarding it among the people. A repeal of the law is demanded. Now, my friends, it is sometimes fair to hold that party responsible for legislation which has a majority in the legislative body. Sometimes this is unfair, as I will endeavor to show. Suppose there were two hundred members of Congress, one hundred and one Republicans and ninety-nine Democrats, and two Republicans voted with the ninety-nine Democrats to secure the passage of a bill, would the Republican party then be responsible for the passage of the bill? Yes, they had in the case supposed a majority of the members. Let us now consider for a moment the vote by which the back salary measure became a law.

RESPONSIBILITY FOR BACK SALARY.
In the Senate it was as follows:
Republican Senators against the bill, 23
Democratic Senators against the bill, 13
Democratic Senators for the bill, 26
Democratic Senators against the bill, 6
Democratic out-going Senators for the bill, 2
Southern Democrats for the bill, 19
Southern Democrats against the bill, 19
Northern Democrats against the bill, 24
In the House of Representatives as follows:
Republican Representatives for the bill, 52
Democratic Representatives for the bill, 29
Outgoing Senators and Senators for the bill, 29
Outgoing Senators and Senators for the bill, 29
Democratic Representatives against the bill, 20
Outgoing members, D. and R. for the bill, 35
Northern Democrats for the bill, 19
Northern Democrats against the bill, 19
Republican Members and Senators against the bill, 73
Democratic Members and Senators for the bill, 63
Democratic Senators and Senators against the bill, 29
Outgoing Senators and Senators for the bill, 29
Southern Senators and Members for the bill, 29
It will be noticed that a large proportion of the affirmative vote came from the South, and that the percentage of Democrats was very much larger than that of Republicans. Of the Ohio delegation three out of six Democrats in the House were in favor of the bill, while only three out of thirteen Republicans voted for it, and one of these vigorously opposed it till the last moment, and only voted for it then to save the appropriation bill, to which it was attached, and for which he was responsible. Not a single Democratic member of the Ohio delegation covered his back pay into the Treasury, while a very considerable number of the Republican members have already done so.

Curious Guns.
The Baltimore American, speaking of a collection of guns in a store in that city, says: "Two of these are unique affairs, brought home by one of our worthy citizens, Mr. T. H. Oliver, who has spent twelve years traveling in all parts of Europe, Asia and Africa. They are of great length, and of the most antique construction. One of them has a barrel five feet long, made of the finest steel, curiosity carved and inlaid with gold and platinum. The ingling is elaborately and beautifully done. The stock of this gun is of ebony, inlaid with silver, pearl and ivory. The front-lock of antique pattern, with springs and works all outside the plate, is finely inlaid with platinum. The barrel and stock are bound together by six solid, elaborately wrought silver bands, and all the mountings are of silver or gold. To the stock is affixed a butt-plate of ivory very handsomely inlaid. The bore of the gun is five-eighths of an inch. On its side is an elegantly written Arabic inscription, that nobody has yet been able to decipher. The gun was made in Morocco, where there are twenty-five gun-makers, who, with the crude implements, turn out guns that have great reputation in all Northern Africa. Such a gun as this one brought home by Mr. Oliver, as a curiosity, could not be had in this country for less than \$1,000. The other of the two guns that he brought home was made in Algiers, has a similar immensely long barrel, a flint lock inlaid with platinum, and ivory and steel but plate, a stock inlaid with silver and ebony. This gun is not so fine as the other, but is very curious."

Blacksmith Shop.
CHAS. N. TIFFANY,
MT. PLEASANT, NEB.
Begs leave to inform the farmers of Cass County that he keeps a good No. 1 BLACKSMITH SHOP one mile north of Mt. Pleasant. All kinds of Iron work attended to. Wagons repaired, Farm Implements carefully mended. Lowest prices, and all work done on short notice. Give me a trial.
C. N. TIFFANY.

REPUBLICAN SENTIMENT.
The Laborers among the confusion rubbish, myriad imperfections and errors, are rearing their structure in spite of all opposition—our eyes behold the rising walls of the edifice. There was a time when the debris and scaffolding, a state of confusion and disorder, presenting an awkward and ugly appearance, inspiring a strong faith, a hopeful and vivid imagination. Stern and exhaustive labor, to the final consummation of the work.
The history of the United States for eighteen or twenty years in its highest rank, and importance reveals a historic movement of a moral and a political nature. We rejoice in our country, in its power and freedom, when we contemplate that a system despotic and tyrannous in its nature, was overshadowing half of our domain and demanding its further extension and protection under the law and flag of our country. An aroused public conscience demanded the prohibition of any further extension of this tyranny into territory that was free, by the election of Abraham Lincoln. In the

MEMPHIS, Sept. 15.
The total number of deaths to-day was thirteen, of whom nine died of yellow fever. To-night it is quite cool, and some of the leading physicians think the scourge will disappear altogether in a few days.
Private advices from New Orleans to-night state that the fever is known to be raging there to a great extent.
Advices from Shreveport report thirty or forty deaths daily, and that with a population now of not over 4,000, the same author says that the disease also rages in the country for a distance of twenty miles around Shreveport, and is sweeping away negroes by hundreds.

DEMOCRATIC TESTIMONY.
Judge Van Trump, as you all know, an able and conspicuous Democratic member of Congress from Ohio, in a letter to his constituents, explaining his action on the salary bill, says: "I had voted steadily and uniformly against the measure without hesitation or shadow of turning, although a majority of my party voted the other way."
"and yet, as applied to the salary question alone, I do not speak of it as party capital. As a party question it remains at rest; a majority of the Democrats, if the Southern members can be classed as strict Democrats, voted for it. Without their aid, coupled with the Northern Democrats, who united with them, it could not have been carried."—Republican.

To the stock is affixed a butt-plate of ivory very handsomely inlaid. The bore of the gun is five-eighths of an inch. On its side is an elegantly written Arabic inscription, that nobody has yet been able to decipher. The gun was made in Morocco, where there are twenty-five gun-makers, who, with the crude implements, turn out guns that have great reputation in all Northern Africa. Such a gun as this one brought home by Mr. Oliver, as a curiosity, could not be had in this country for less than \$1,000. The other of the two guns that he brought home was made in Algiers, has a similar immensely long barrel, a flint lock inlaid with platinum, and ivory and steel but plate, a stock inlaid with silver and ebony. This gun is not so fine as the other, but is very curious."

Blacksmith Shop.
CHAS. N. TIFFANY,
MT. PLEASANT, NEB.
Begs leave to inform the farmers of Cass County that he keeps a good No. 1 BLACKSMITH SHOP one mile north of Mt. Pleasant. All kinds of Iron work attended to. Wagons repaired, Farm Implements carefully mended. Lowest prices, and all work done on short notice. Give me a trial.
C. N. TIFFANY.

For Sale by J. H. BUTTRY,
Plattsmouth, Neb.

REPUBLICAN SENTIMENT.
The Laborers among the confusion rubbish, myriad imperfections and errors, are rearing their structure in spite of all opposition—our eyes behold the rising walls of the edifice. There was a time when the debris and scaffolding, a state of confusion and disorder, presenting an awkward and ugly appearance, inspiring a strong faith, a hopeful and vivid imagination. Stern and exhaustive labor, to the final consummation of the work.
The history of the United States for eighteen or twenty years in its highest rank, and importance reveals a historic movement of a moral and a political nature. We rejoice in our country, in its power and freedom, when we contemplate that a system despotic and tyrannous in its nature, was overshadowing half of our domain and demanding its further extension and protection under the law and flag of our country. An aroused public conscience demanded the prohibition of any further extension of this tyranny into territory that was free, by the election of Abraham Lincoln. In the

MEMPHIS, Sept. 15.
The total number of deaths to-day was thirteen, of whom nine died of yellow fever. To-night it is quite cool, and some of the leading physicians think the scourge will disappear altogether in a few days.
Private advices from New Orleans to-night state that the fever is known to be raging there to a great extent.
Advices from Shreveport report thirty or forty deaths daily, and that with a population now of not over 4,000, the same author says that the disease also rages in the country for a distance of twenty miles around Shreveport, and is sweeping away negroes by hundreds.

DEMOCRATIC TESTIMONY.
Judge Van Trump, as you all know, an able and conspicuous Democratic member of Congress from Ohio, in a letter to his constituents, explaining his action on the salary bill, says: "I had voted steadily and uniformly against the measure without hesitation or shadow of turning, although a majority of my party voted the other way."
"and yet, as applied to the salary question alone, I do not speak of it as party capital. As a party question it remains at rest; a majority of the Democrats, if the Southern members can be classed as strict Democrats, voted for it. Without their aid, coupled with the Northern Democrats, who united with them, it could not have been carried."—Republican.

Thirty to Forty Deaths a Day at Shreveport.
The Fever Reported to be Raging in New Orleans.
Special Dispatch to the St. Louis Globe.

Curious Guns.
The Baltimore American, speaking of a collection of guns in a store in that city, says: "Two of these are unique affairs, brought home by one of our worthy citizens, Mr. T. H. Oliver, who has spent twelve years traveling in all parts of Europe, Asia and Africa. They are of great length, and of the most antique construction. One of them has a barrel five feet long, made of the finest steel, curiosity carved and inlaid with gold and platinum. The ingling is elaborately and beautifully done. The stock of this gun is of ebony, inlaid with silver, pearl and ivory. The front-lock of antique pattern, with springs and works all outside the plate, is finely inlaid with platinum. The barrel and stock are bound together by six solid, elaborately wrought silver bands, and all the mountings are of silver or gold. To the stock is affixed a butt-plate of ivory very handsomely inlaid. The bore of the gun is five-eighths of an inch. On its side is an elegantly written Arabic inscription, that nobody has yet been able to decipher. The gun was made in Morocco, where there are twenty-five gun-makers, who, with the crude implements, turn out guns that have great reputation in all Northern Africa. Such a gun as this one brought home by Mr. Oliver, as a curiosity, could not be had in this country for less than \$1,000. The other of the two guns that he brought home was made in Algiers, has a similar immensely long barrel, a flint lock inlaid with platinum, and ivory and steel but plate, a stock inlaid with silver and ebony. This gun is not so fine as the other, but is very curious."
