The Praying Mantis. insect," which belongs to the genus "orthoptera," including crickets, grasshoppers, locusts, etc. It is described as being very pugs nacious; so much so, that if two of the insect. be shut up together they immediately engage to the together they immediat be shut up together they immediately engage in a desperate combat. They do not cease until the stronger has eaten off the other's head. "And yet," says the writer of the arti-cle, "while its inoffensive orthopterous brethren have got but little credit for their virtues. and are generally reviled as nuisances, this atrocious little savage has had the fortune to acquire a peculiar reputation for wisdom and saintliness. For thousands of years, and in all parts of the world, it has borne this character. The cause has been that it habitually assumes an attitude that appears devotional, and it was supposed to spend a large portion of its life in prayer. Settled on the ground, t raises its head and thorax, clasps together the joints of its front legs and raises them as if in supplication, and remains in this posture for hours together. To our Illogical and superstitious forefathers what could the upraised and crossed arms indicate but an attitude of devotion? The name mantis (diviner) was given to this insect, it is said, by the Greeks, in accordance with the

ctc. With the French it is the Prega Dieu (that prays to God) Le Precheur (the preach-er); with the Germans it is Gottesanbetern believes that it performs its devotions,' Mr. Spicer, writing in Science Gossip, remarks: Nor was this feeling of veneration confined tells us ('Travels in Africa') that in the southern part of the same continent it is venerated by the Hottentots; and that, should one of these insects chance to settle on an individual he is looked upon in the light of a saint and as specially favored by heaven.

#### The Imagination and Death.

ENTWISTLE, the printer who was bitten by a dog in April last, died yesterday. Some believe he died of hydrophobia; still more believe that he died merely of Many of our readers will remember the passed him with the words: "Ah, Fritz, passed a bad night, eh?"

" No, sir. Never felt better." "I'm glad to hear it. Thought you looked pale. Your garden looks beauti-

ful. Fritz." 'Thank you, sir."

Comes along another student: good morning, Fritz.

"Good morning, sir." "System a little out of order?" " No. sir!"

"You look bad, heavy-eyed and pale." "Didn't know it, sir." "A mere spring debility, I suppose Good morning."

Fritz (solus)-I do feel a sort of queer-Comes along a Professor: "Well, Fritz, how are the violets?"

"Beautiful, sir, beautiful." "You don't look very beautiful. What's the matter with you? Let me see your tongue. Your forehead clammy, too. think you'd better go home to bed, Fritz. "I do feel queer, sir."

"I should think you would. Go to bed, Keep quiet for a few days" I believe I will, sir. "I see Dr. Broeck coming this wayask him. Good day, Fritz. I'm sorry to

see you in this state. "Good day, sir." Up comes the doctor.

Doctor, what's the matter with me?" "Springoliana, Fritz, evidently. Get to bed, my man. And here, send this to the dispensary, and take a tablespoonful hour. Don't eat till I see you again. I'll call after the lecture is over, however. Be very careful. I'll bring Dr. Wolff with me to see you. It's a curious case, very curious. Fritz went to bed. The doctors came.

The old cotton and tobacco plantations of the Southern States afford striking testimony of the folly of attempting to cultivate land without tak-

ing better measures for its recuperation than that of applying some slight stimu-

The plants restore to the soil in their decay a portion, at least, of the elements | Ague Tonic.-This invaluable and stand WHITE CUP CAKE.—One cup of fresh which have been taken from the soil by family medicine is now a household word and butter, two cups of white powdered successive cropping. In the Northern sugar, four cups of sifted flour, five eggs, States the red clover is considered the one cup sour cream or rich milk, soda to best of all plants for green manuring, but sweeten it, half a grated nutmeg, one teaspoonful cinnamon; bake in small tins.

Set of all plants to green all of the Hospitals in New Orleans.

Tonic is thus highly recommended by the leading medical men of the country, and is worthy of such indersement. Where this plant does not succeed, almost leading medical men of the country, and is worthy of such indersement. Where the place of summer worthy of such indersement. The plants to green all other Hospitals in New Orleans. CATSKILL APPLE PUDDING .- One pint fallowing, or permitting land to lie idle sweet milk, four eggs beaten to a froth, every alternate year, or even for a longone teaspoonful soda, a little sait, flour er time, as is frequently practiced where enough to make a stiff batter, four large it is very poor, some kind of crop should apples chopped; mix well, or, rather, stir; be raised for turning under. By adoptdage in deep lins; serve hot, with butter | ing such a system the land would be constatily improved; and very little, if any, special fertilizers would be required at any time. If the planters in the South: ern States would practice this very simple and efficient system of rotation, they shoe dealer should hear them: could soon save the money which at

present is paid for commercial fertilizers. Lime, plaster, asiles and salt may oc-casionally be necessary to furnish certain elements not obtained in the green crops sive, nor would they ever be required in large quantities. There is no land which has ever been cultivated that cannot be rapidly enriched in this manner, and at less expense than in applying manure direct, unless the latter is near at hand and abundant. The next most important source of ma-

near almost every pond and stream throughout the country. Many of those deposits are inexhaustible, and of incalculable value, although it appears that few farmers who own impoverished upland adjacent ever think of using this An American inventor has produced a material for manure. Cold, raw muck, pall to destroy the peculiar odor of fresh-drawn milk. It is a tin pail, the bottom previous preparation, seldom shows any of which is perforated with one or two beneficial effects the first season, simply rows of holes three-sixteenths of an inch | because it is not in a condition to be apin diameter. The pail is hung over the propriated by plants. But when comempty milk cans, and the milk poured in posted with barn-yard manure, ashes, through a strainer. The fluid starts lime, waste lye from a soap factory, in through the holes in streams, but before fact, with almost any substance which it falls a foot it is separated into drops, will promote fermentation and decompo and is thoroughly purified of all offensive oition, it soon assumes a condition which odors by the air, which is a good deoder- renders it available as food for plants Near any of our large cities there are PRECAUTIONS AGAINST TRICHINA.—The always more or less waste materials Medical Society of Kalamazoo urge: Eat | which are of great value for adding to forated with holes large enough for them no uncooked or half-cooked hog's flesh. the compost heap, and in the country to pass through. On the top of the paper leaves are spread, and the worms coming up through the holes to get the or pork, salt or fresh, smoked or uncite fermentation in the muck heap. Cotsmoked, is liable to contain this parasite, ton seed, or cotton seed meal, or even shelf cleaned out. The process also full of a life and activity that may work corn meal of the best quality may serves to separate the healthy from the unever a man can afford to pay sixty cooked, is as dangerous as any form of dollars per ton for any commercial ferto go through the holes, and can by this this meat. The heat that cooks meat utmeans be detected and rejected. After the worms have been fed eighteen or twenty days they will be the spring of these vermin, and no one need in the fall or winter as is usually practively days they will be supported by the spring of these vermin, and no one need in the fall or winter as is usually practively days they will be supported by the spring of these vermin, and no one need in the fall or winter as is usually practively days they will be supported by the spring of these vermin, and no one need in the fall or winter as is usually practively days they will be supported by the spring of these vermin, and no one need in the fall or winter as is usually practively days. tion, and this takes place more rapidly in hot than in cool weather. The ma terials used in the compost may be obtained when most convenient, but the principal chemical changes which, in a great measure, give to it its value take place during warm weather.

Of course there are hundreds of other sources of cheap and valuable fertilizers, but these we have named are, as it were, why they should not be drawn upon to an unlimited extent, and lands which are | tion any lady may secure by using HAGAN'S MAGNO now constantly growing poor be made to LIA BALM. produce double what they do at present, Jams .- " Molly," in Germantown Tele- and increase in fertility at the same time. graph, says: "It is not generally known If every farmer and planter would pay unfinished or the worm is dead; and by opening one or two cocoons you can tell opening one or two cocoons you can tell ming it well, without the sugar and withming it well. what is the matter. If silk is the object, out a cover to the preserving pan, is a soon find the products of their farms invery economical and excellent way- creasing and their debts decreasing-

#### Dogs and Their Cost.

THE St. Louis Globe has been making some calculations from recent statistics erence to the State of Missouri, as fol

"Our 400,000 dogs furnish one of the most important economic considerations now affecting the State. In the first place they militate against the mutton crop annually to the extent of at least \$5,000,000; secondly, they cost, at an average of 25 they can be replaced by means of glue and severance of friendship between the useful to a working housekeeper, or est their worthlessness would pay off the

### New United States Currency.

In future issues of greenbacks, by order of the Secretary of the Treasury, the words "United States legal-tender OUR farmers give far too little atten- note" and "Treasury note" are to be tion to the manufacture of home-made omitted, and the title changed to "United Sumner.-Peterson's Counterfeit Detector.
