THE SABBATH BELLS. THE old man sits in his easy chair,

And his ear has caught the ringing Of many a church-bell far and near, Their own sweet music singing.
And his head sinks low on his aged breast.
While his thoughts far back are reaching
To the Sabbath morns of his boylsh days.
And a mother's sacred teaching.

A few years later, and lo! the bells A merrier strain were pealing.

And heavenward bore the marriage vows
Which his manhood's joys were scaling

But the old man's eyes were dimming now,
As memory holds before him
The sad, sad picture of later years,
When the tide of grief rolled o'er him.

When the bells were tolling for loved ones gone!
For the wife, for the sons and daughters,
Who, one by one, from his home went out,
And down into death's dark waters.
But the aged heart has still one joy
Which his old life daily blesses,
And his eyes grow bright and his pulses warm
'Neath a grandchild's sweet caresses. But the old man wakes from his reverie,

And his dear old face is smiling, While the child with her serious eyes reads on, The Sabbath hours beguiling.
Ah. bells, once more ye will ring for him,
When the heavenly hand shall sever
The cord of life, and his freed soul flies he cord of life, and his irec.

To dwell with his own forever.

---THE FAIRY OF THE CASTLE.

A HUNGARIAN STORY. I HAD fulfilled my youthful dream, and

become possessed of an old castle and large estate in Hungary. It was at some distance from Pesth, and I had not visited the property previous to purchasing, for the lawyer's representations convinced me that it was a bargain, even with the incumbrances, which consisted of an adopted daughter springing to the roof timbers, the two great rooms, 450x90 with dense black smoke and flame. Which consisted of an adopted daughter and some favorite servants of the late Count. These were all, however, provided with annuities by his will, so that it only remained to endure their presence in the castle, and if they should prove to be serviceable I should already be provided with servants accustomed to their routine of duties.

From the lawyer's manner on discovering that I myself intended to reside in the castle I concluded that it bore the reputation of being haunted, and rather reveled in the anticipation of bringing to

light the secret terrors of the place. I wrote to the steward to send a carriage to meet me at the nearest station. This I found in waiting, with a prim coachman in deep mourning, which I at

The use or control said troops for such purposes, the windows at the south gable end, nearly which resulted in his confiding to me sixty feet from the ground, but dared not that he was mourning for his sin in having murdered his younger brother. I and all clinging to it would come down in a bewilderment both as to his actions and

my duty in the case. Some time before we reached the castle we saw the porter posted on a large stone, in military attitude, and shouldering a long stick as if it were a rifle. As we approached, he shrieked in a fearful tone, Present arms!" and began to imitate the sounds of the drum and trumpet. while with his stick he went through the eight movements of the Austrian parade regulations, after which he jumped down from the stone, mounted the stick as if it were a horse, and galloped before the three, and wounded-several fatally-between carriage like an outrider, all the time shouting, "A master is a master even in When we reached the gate the The Black Hills-Denial of the Gold porter dismounted and stood like a post, saluting me as I sprang from the wagon,

While assisting me off with my overcoat Louis informed me that the three servants brought under his observation during the I had previously encountered were all mad. By the time he had shown me to the steward's apartments it was sufficiently apparent that he himself was at least equally so, though his was perhaps a less disagreeable monomania. The prospect was not cheering. It was thankful to find the steward, at least, a rational man. He was remarkably well informed with regard to his duties, although his appearance would rather have indicated a public officer than a farm steward. After a long conversation, during which he insubstantially the same views as Grant formed me that the adopted daughter was also insane, I asked him for a pen and ink, in order to write to the lawyer from whom I had made the purchase. He politely showed me his writing-desk,

and then brought me a lamp similar to the Davy-lamp used by miners. I wrote somewhat sharply to the lawyer, winding up by saying that the only redeeming feature in this bedlam was the finding of a remarkably sensible and

well-educated steward. Having finished, I asked the steward for a light and sealing-wax. He begged me to use wafers, and upon my still preferring wax insisted that I should not seal it in his room. He begged to be pardoned, and turned pale as he said: "I peculiar malady. The air in my lungs changes quickly to hydrogen, so that the room in which I am gradually becomes filled with hydrogen gas, and if any one should enter with a light the gaseous vapors would explode and would set the ouse on fire.

I fell back in my chair. Good heavens! this man was the most insane of all. I was here with six mad people, and was myself the seventh; for I had bought this endid company.
