A GENERAL order has been issued by Gen. Sheridan in relation to the policy of the Government in reference to the Black Hills region. The order covers a recent letter from the Department of the Interior to the Secre tary of War, in which it is stated that a empetent geologist will be sent to explore hat region, and if it be found that the precious metals exist in large quantities efforts will be made to extinguish the Indian title guaranteed by the treaty of 1868. What Gen. Sheridan Knows of the Black Hills. HEADQUARTERS MILITARY DIVISION OF THE MISSOURI, CHICAGO, March 25, 1875. Gen. W. T. SHERMAN, Headquarters of the Army.

General—In reply to your question: "Wha lo you know of the Black Hills?" I respect ally submit the following remarks:

My first knowledge of the Black Hills was lerived from interviews with the late Father le Smet, a noted Catholic missionary, whom I met many years ago on the Columbia River, in Oregon, from whom I heard the Indian romance of a mountain of gold in the Black Hills, and his explanation of that extraordimary and delusive story.

To Indians, frontiersmen and explorers the

Black Hills country is much more extensive han that particular locality brought to the The Uruguayan Chambers have passed a decree suspending payment of interest on the public debt and providing for its redemption black, scrubby character of the timber which

excitement about the "mountain of gold" again subsided. It so happened, however, that the Black Hills country was embraced in my military com-mand, and two years ago it became apparent to me that a military post in the Black Hills of the Shyenne would soon become necessary for the proper protection of the settlements in Nebraska from the raids of Sioux warriors, who always before they commence depredating the frontier secure a safe place for their families and villages in the locality mentioned. Believing that these Indians would never make war on our settlements as long as we could threaten their families and villages in this remote locality, abounding in game and all that goes to make Indian life comfortable, and with this purely military object in view, the order was given for the Custer reconnois-

The discovery of particles of gold by alluvial washing near Harney's Peak, on the eastern slope of the Black Hills of the Shyenne, followed, and brought to the surface the Father de Smet story for the third time.

The Black Hills of the Shyenne, described by Gen. Custer, are situated between the north and south forks of that river, one of

which is known as the Belle Fourche, the other the South Fork; and although I have the utmost confidence in the statement of Gen. Custer and Gen. Forsythe, of my staff, that gold was found near Harney's Peak, I may safely say there has not been any fair test yet made to determine its existence in

There is not a Territory in the West where gold does not exist, but in many of them the quantity is limited to the "color," which is as much as has yet been obtained near Harney's Peak. The geological specimens brought back by the Custer expedition are not favorable indications of the existence of gold in any great quantity. Still it may be gold in any great quantity. Still it may be there; but as the treaty of 1869, duly ratified, virtually deeds this portion of the Black Hills to the Sioux Indians, there is no alternative but to keep out trespassers.

But to go back to the Father de Smet information, there is not much doubt of the cor-rectness of his statement that gold exists in large quantities in the Black Hills, but much further west than the Black Hills of the Shy-

enne. I have seen nuggets from the Big Horn and Tongue Rivers, and many specimens from near Fort Stambaugh, in the Upper Wind River country, where mining has failed for want of water for alluvial washing and from hostilities of the Indians; and I have good reason to believe—in fact, it is could exist in the quite certain—that gold exists in the Owl Creek Mountains, in the Lower Wind River and in the headwaters of the Powder River and the Rosebud, all these localities being under the general meeting in the Black Hills, and outside of the Sherman, Augur and Terry treaty of 1869, except so far as he privilege to hunt game. It has been my intention to communicate much information this coming summer to the Government on the above-described country; and as the Indians have no absolute right to the soil there

may be but little difficulty in extinguishing their hunting privileges. A. Forsyth and Col. Grant, of my staff, up the Yellowstone to the mouth of the Big give the lowest tide of water, having already secured a steamboat to make this explora-tion. If Gen. Forsyth is successful I will send Gen. Custer, with a command from Fort Lincoln, across the mouth of Powder River, that city. For the expression of anti-thence up the south bank of the Yellowstone, crossing Powder River, Tongue River, Rosebud, and on to the mouth of the Big

This country is as yet entirely unexplored and the expedition may develop a very valu able auriferous section and make the Father de Smet story to some extent true, but I am of the belief that the mountain of mica has not changed to gold. I will also send an expedition down Wind River, through the Owl Creek Mountains, from Fort Stambaugh, via Fort Brown, to the mouth of the Big Horn, and will bring it back

eauty fully equal to those described so graphically by Gen. Custer as existing in the Black Hills of the Shyenne.
