In a statement made to his congregation on the evening of the 12th, the Rev. Dr. Storrs, of the Church of the Pilgrims, Brooklyn, gave his reasons for resigning the Presidency of the American Congregational Union. He condemned the rules laid down by the late Advisory Council for the admission of members, and the guidance of Congregational Churches, and spoke disparagingly of many of the other acts of such council. He also thought the request of Andover Church to Plymouth Church perfectly proper, and that the council had no more right to deal with the matter than it had to conduct the trial of Gen. Balbock. At a business meeting of Dr. Storrs' church, on the evening of the 13th, resolutions were adopted by a large majority, repudiating the action of the Advisory Council, re-nouncing fellowship with churches which adhere to the findings, and demanding a thorough investigation of the Beecher scandal.

What the Microscope Reveals. LEWENBOECK tells us of an insect seen with the microscope, of which twenty-seven millions would only equal a mile. Insects of various kinds may be seen in the cavities of a grain of sand.

Mold is a forest of beautiful trees, with the stems like a fish, a single grain of sand would cover 150 of these scales, and yet a scale covers five hundred pores. Through these narrow openings the perspiration forces itself like water in a sieve.

Each drop of stagnant water contains a world of living creatures, swimming with as much liberty as whales in the sea. Each leaf has a colony of insects grazing on it, like cows on a meadow.

Boston's favorite frolic, the Rev. Mr. Winslow, has no small views. One of his last remarks before embarking for foreign parts reveals the genius of his character. "I was never born," he said, "for a retail business."

MONDAY, March 13.—Mr. Morton's bill to provide for and regulate the counting of votes for President and Vice-President, was taken up and debated in the Senate. Among the bills introduced in the House on Monday, were a bill for a more certain resumption of specie payments on Jan. 1, 1876.

A good deal of excitement and curiosity has recently been caused in Bath County, Ky., by the fall from the sky of a considerable quantity of what had the appearance of being fish, in pieces ranging from about the size of peas to that of a human finger. Specimens were submitted to a scientist of Louisville, who concluded that they were probably the dried spawn of Batrachian reptiles, doubtless that of the frog. He thinks they had been transported from ponds and swamps by currents of wind, and had ultimately fallen on the spot where they were found.

THE organization of the French Senate was effected on the 14th, by the election of Duke D'Audiffert Pasquier as President, and two Vice-Presidents from the Left and two from the Right. The Chamber of Deputies elected Grey as President, and three Vice-Presidents from the Left.

A MASS Greenback Convention was held at Syracuse, N. Y., on the 15th. Richard Schell was elected permanent President. The resolutions adopted declare opposition to any repudiation of the Nation's obligations, but assert that the act of Congress of March, 1869, promising to pay the debt, is unconstitutional, and that the contract whereby said bonds were issued, and said law passed by fraud; that the effort now making by the Secretary of the Treasury to pay fractional currency in silver should be immediately prohibited, as silver is worth less than currency; that legal-tenders are a standard of value, while gold coins are not;
