## ERICAN New Stock and New Style of Business !

After careful calculation (notice figures) I concluded to adopt the strictly cash system, feeling convinced that it is the most satisfactory and profitable style of business in the end. For instance, \$2,000 turned every thirty days at 10 per cent, will be \$200; in twelve months \$2,400; in five years, \$12,000. The same turned every ninety days requires an increase o. profit to 20 per cent to produce the same result. Besides, there are always unavoidably and surely a large amount of accounts lost in the credit system, which reduces the large profit gained in good customers. All those, then, who intend to pay for their goods will see the benefit and profit of calling on me for the ir shoe wear. While extending my thanks to the numerous friends theowhom I have established so large a trade, a trade equal to the best in the State, I would respectfully invite all to continue dealing with me, as well as all others who will call to buy cheap.
