## SCARCITY OF MONEY.

There is no doubt but the present situation of all kinds of business and industry is fearfully depressed, and it is difficult to say what mode to apply to their expenses. Winter is coming when children are liable to Croup, Whooping Cough, etc. Congas and Colds will prevail everywhere, and Consumption with other Throat and Lung diseases will carry off many. These diseases should not be neglected. Doctor Bills are expensive, and we advise our people to use BOSSIER'S GERMAN SYRUP. It is never better to buy medicine than when you are ill. **St2**

## WHAT WILL BE OUR FUTURE.

Those who have lived this year and ten can scarcely realize the rapid changes that time and our education and intelligent work-selves have made within three-quarters of a century. Our modes of communication, the telegraph and railway, are the revolutionaries and civilizers of the world. Time is distance, and space annihilated by those twin coo-las, and nowhere, on the broad face of the globe, are the events of the day more rapidly and completely visible as on this Continent and within the limits of the United States.

Our Centennial furnishes unmistakable proof of our progress, and is the admitted Huge Event of the Age, and to see it our readers must take a flying trip over the Great Ft. Wayne & Penn. Railway, which is the only direct line to the Exposition and Eastern cities. During the trip they will discover the completeness of the railroad and the convenience with the public that the Ft. Wayne & Pennsylvania has virtually attained a degree of perfection, beyond which it is thought impossible for man, money, brains, enlarged views or a compass of thought to pass. With a solid road bed of broken stone, the heaviest continuous steel rails ever tested, double and triple tracks, machinery constructed for strength and speed, the strongest iron and granite bridges, cars combining the most approved models and having ample room for passengers, reared in the company's service, telegraph and signal corps, black stations, and all the mechanical triumphs for security, convenience and rapid movement of passengers that reflecting rail-way experts and discerning geniuses may devise, are brought into requisition. Can the future do better? For information address C. M. Clark, General Ticket Office, 63 Clark street, Chicago, Ill.
