

FARM AND HOME.

Farm Notes.
Dear boys, I have something to tell you:
Come here, I want to talk to you.

The farmer should be an educated man. Formerly all necessary qualifications were physical development.

FARMERS must arrange so as to cultivate their farms without having their houses crowded with hired help.

Do ALL work as cheaply as possible this year, but do it thoroughly.

THE CHECK-REIN.—Why is it that so many of our farmers, and nearly all of our city carmen, insist upon using a tight rein on working horses?

ROCK.—Three cups of sweet milk, one cup of yeast, one cup of sugar, mix over night with flour enough to make a stiff batter.

TO DYK GREEN.—Boil the article first in alum-water for an hour, then for three hours in a preparation composed of four ounces of verdigris, two quarts of white wine vinegar, and four quarts of water.

HAIR OIL.—One pint of alcohol; two ounces of castor oil; a few drops of camphor. Shake well and cut the oil. This is said to be a splendid and nicely-perfumed hair oil.

FRENCH MUSTARD.—A fine French mustard, called moutard superbe, is thus made: Salt, one and one-half pounds; scraped horseradish, one pound; garlic, two cloves; boiling vinegar, two gallons; macerate in a covered vessel for twenty-four hours, strain, and add enough of musta to make a rather thin paste.

SOME egg-raisers claim that the best way for skimming milk is to give it to hens to drink; that it is worth twice as much for this purpose as for feeding hogs; and that by its use in winter, chickens will lay constantly. This must be their only drink; and let them have access to it at all times.

THE Coming Girl.
She will be of some use in the world, will cook her own food, will earn a living, and will not die an old maid.

PRESERVING POSTS.—Every farmer who has to fence his land knows too well how quickly posts planted in the earth become rotten, especially in a damp spot.

"Take linseed oil, boil it, and mix it with charcoal dust until the mixture has the consistency of an ordinary paint. Give to the post a single coat of this mixture or paint before planting them, and no farmer, even living to the age of the patriarch, will have to pull out any long enough to see the same posts rotten."

"Some years ago I discovered a way of rendering wood more durable in earth than iron itself," says the author of the communication.

FARMERS' FOOD.—In the last report of the Massachusetts Board of Health, Dr. J. F. A. Adams, of Pittsfield, one of the most accomplished physicians in the State, has presented a long and valuable report upon the health of farmers, in which he combines his own experience with that of the leading physicians in the State, to whom he sent circulars containing twenty questions, to which they responded.

Mr. Scroebury, a very high authority on this subject, declares that the common whole seldom exceeds seventy feet in length, and is much more frequently under sixty. Out of three hundred and twenty-two, only one which he measured was longer than the average of fifty-eight feet, and the largest of which he reported measured to be two and one-half feet long.

Hydrate of Calcium.
In an article reviewing the evidence which from time to time has been brought forward for and against the use of hydrate of calcium as a fertilizer, the editor of the Journal of Chemistry declares it as his opinion that it is a perfectly safe article for any intelligent physician to employ.

ENGLISH GIRLS.—Kate Field has an exalted opinion of American women, and places a corresponding low estimate on the English females. Kate is right, says the Brooklyn Argus.

There is too little variety in food. Meat is too expensive to be fried. Baked beans and salt-pork, although a healthy and nutritious diet, are too generally used, being indigestible for many persons.

Two little time is allotted for meals. Coffee and tea, especially the latter, are too freely used as beverages.

Water is used in excess. Dr. Peabody's remarks on this point are these: "The water which is usually used for drinking is usually very soft, and is not good for the stomach."

There is too little variety in food. Meat is too expensive to be fried. Baked beans and salt-pork, although a healthy and nutritious diet, are too generally used, being indigestible for many persons.

Two little time is allotted for meals. Coffee and tea, especially the latter, are too freely used as beverages.

Water is used in excess. Dr. Peabody's remarks on this point are these: "The water which is usually used for drinking is usually very soft, and is not good for the stomach."

Water is used in excess. Dr. Peabody's remarks on this point are these: "The water which is usually used for drinking is usually very soft, and is not good for the stomach."

At this point Dr. Lawrence tells the story in a few words: "As a general rule, farmers sleep in the poorest rooms in their houses, which are very small and poorly ventilated. They are an abomination."—Exchange.

CHAMPAGNE HAM.—Boil the ham very tender, skin and cover with brown sugar, moistened with champagne. Repeat three times and brown in an oven. Slice cold.

A NICE DRESSER.—Grate into a dish a layer of cocoanut, then place a layer of quartered oranges and sprinkle them with sugar. Continue alternating until the dish is full, with a grating of cocoanut on top.

THE Country Gentleman recommends linned oil meal for horses that are never allowed to run out to grass, being slightly aperient. A handful in each feed, morning and evening, is about the quantity normally fed.

ROCK.—Three cups of sweet milk, one cup of yeast, one cup of sugar, mix over night with flour enough to make a stiff batter.

TO DYK GREEN.—Boil the article first in alum-water for an hour, then for three hours in a preparation composed of four ounces of verdigris, two quarts of white wine vinegar, and four quarts of water.

Young Dunning's Escape From the Mill River Turmoil.
(From the Springfield (Mass.) Republican.)
The marvelous escape of young Dunning at Leeds has already been referred to, but his story is so interesting that it is worth giving in detail.

He found that his father, wife and three children had all left his house. He shouted to them to run for their lives, at the same time pointing to them what direction to take.

He found that his father, wife and three children had all left his house. He shouted to them to run for their lives, at the same time pointing to them what direction to take.

He found that his father, wife and three children had all left his house. He shouted to them to run for their lives, at the same time pointing to them what direction to take.

THE GRAND PACIFIC HOTEL.
Opposite the Government Square and the new Federal Building, in, without doubt, the most perfect hotel structure in the world, and the largest edifice representing private enterprise in the United States.

It is situated on the corner of Jackson, LaSalle, Quincy and Clark Streets, leaving the street at the corner of the building on the 24th day of June, 1874, and has proved to be the most complete and successful of all the enterprises of the traveling community.

The magnificence of the exterior, its great interior rotunda, superb public apartments, the unequalled suites of private rooms on its miles of corridors and the system and detail of its management, have not only won the pride and admiration of our citizens and guests, but furnish the key to the success of the GRAND PACIFIC, which from the outset has never been equaled by any previous or contemporary enterprise.

Central to all the great railway depots, the guests the past eleven months, many of them our patrons since the opening of the former Sherman House, July 8, 1861.

Chicago, May 1, 1874.

Are You Getting North?
If you are, you want a copy of "The Northwest Illustrated." It will not cost you anything. Send to W. H. Stennett, General Passenger Agent Chicago and Northwestern Railway, Chicago, for a copy.

THE GREAT MEDICAL REFORMATION.—The Satanic Theory that preparations which inflame the brain are, in any sense of the word, remedies, has been overthrown, and can never be re-established.

THE SNOW-FLOWER.
A very remarkable account is admitted into the pages of a so-called snow-flower, said to have been discovered by Count Anthoskoff in 1863, in the northernmost portion of Siberia.

Count Anthoskoff collected some of these seeds and hastened with them to St. Petersburg, where they were planted in a pot of snow, where they remained for some time; but on the 1st of January, 1864, the snow-flower burst through its icy envelope, and displayed its beauties before the eyes of the imperial court.

ANILINE COLORS.—Prof. Kopp, who had recently made a careful study of the aniline colors at the Vienna Exposition, says that the manufacture of these pigments from coal tar products is making most remarkable progress.

THIRTY YEARS' EXPERIENCE OF AN OLD NURSE.
MR. WELLS'S SOOTHING SYRUP IS THE BEST REMEDY FOR ALL THE AFFECTIONS OF INFANTS AND CHILDREN IN THE UNITED STATES.

HOUSEHOLD Why will you suffer?
To all persons suffering from Rheumatism, Neuralgia, Cramps in the limbs or stomach, Biliousness, Pain in the back, Headache, etc., we would say that the best remedy is that which we have just discovered.
