> near Penn Yan, N. Y., was killed by his brother-in-law, George Pierce, on Thursday night of last week. Cole came home and knocked at the door for a joke. When asked "Who's there?" he answered. "Your money, or your life!" Not being admitted, he went to the rear of the house, and pulling off his boots he entrance through a window. Mr. Pierce, who sleeps down sairs, hearing him, cried out, "Don't cone into this house

the fissure to the drainage of the sur- ing. I could hardly see anybody because rounding country, it has been suggested of the fog. I ran then to the first cabin that the animals fell into it when they to get a life-preserver, but some of the went to drink and were washed in by men there said they were all gone. I floods. Prof. Dawkins thinks it may have lain in the path of the bison and into a boat, and the men in her drove me reindeer in their annual migrations, the out sgain. I got in again, but Mr. carnivorous animals being caught as they followed the herds to run down stragham, had a life-preserver on. He came glers. From an examination of the young to me, and at his request I helped him teeth of the bison and reindeer, he conin, but I jumped out myself, because we cluded that those animals passed the

crevice at different seasons of the year, some falling in on their northward trip, and some on the home journey. The fissure was open in the newest pliocene, but whether before or after the glacial

ers, cannot now be determined. It is strange that the Mosaic prescription for man's diet, chiefly taken from the tabernacle rites, have become, by common consent, the bill of fare of civnized society; with variations, of course. In the cities, especially, the main articles of food are those which the laws of Mo ses recommended. When in former days people dieted largely on pork, many people became hogs themselves, and many diseases still raging among mer have been conveyed int the human system by the consumption of pork, rabbits, hares and other animal food which the law forbids. Physiologists understand well enough the importance of diet, and vet none have gone to the trouble o giving the Mosaic dietary laws a thorough scientific examination. Here are the Jews, after 3,000 years, a healthy, intelligent, energetic, and fertile race. Much is said about their longevity, temcers cut one of the ropes, and our boat perance, charitable disposition, etc.; stil! to scientist has taken the trouble to fell into the water. At that time a big examine the food on which this race wave came up, filled the boat with water lived and thrived. The point is cerimmediately, and drove us right under tainly, scientifically, very important .the ship; but another succeeded and American Israelite.

and four children were burled at vere sailles the following Saturday. The determination of the U. P. R. R. to appeal from the decision of Judge Dillon in the terminus case, has been carried out. The company has filed its supersecteas bond and taken out a writ of error to the Supreme Court of the U.S. The case will probably be docketed by the middle of July, and be ready for a hearing before the Court in October or	550; in twenty years to \$149,631; thirty years to \$344,779, or \$17,239 each member of the association, \$ 476 for each couple. With such an ample and opportunity before th need working people be oppressed capital? By increasing their numb to hundreds, their capital will a amount to millions of dollars. This little story is from the P Tempe: The scene is in one of the or rooms of the Paisis de Justice. advocate who appears at the bar h pair of silky mustaches of most voking effect. "Maitre X," asys the siding judge, "I believe your atten has already been called to the fact the rules forbid the wearing of a m tache." "Monsieur le President," swers the other promptly, "I have m believed that the sward of justice w anount on many second of justice w anount of the president was unable many." The president was unable	heartrending screaming was the loud cracking of the ship as wave after wave broke upon her. The reports sounded like thunder. We continued by the ship till about 6 o'clock, when the foremast with the light fell, and then we could see nothing more of the vessel; but we could hear the water breaking over it, and the spray dashing over the sull, both the masts and the chimneys having disappeared. We then rowed away to keep off the breakers. The fog by this time had cleared somewhat. We kept rowing, but did not know which way we were going as we had no compass. We continued rowing till about 6 o'clock, when the fog began to clear, and then we heard a noise, and upon looking round I first naw a naked dead body floating, and directly afterward we naw two men floating. We then as noon	desk, stood a moment in his august he presence, and then, in a meek and co- plaintive tone of voice, she asked him to for the information as to whether Wash- ington crossed the Delaware on the ice to or on horseback when he left Trenton. We He raised his hand over her head and soothingly said: "Why, my dear little child," We'll have to end his sen- tence there, for the balance of the balance of the exclamation was a sort of half howl, half whoop, which we can neither write nor print. Just as he said "child," he low- tioner of the girl's head, and the whole surface of his extended palm felt the tickling and exhilarating of a couple of dozen of pin pointsSalar (Ore.) Statement. In the Chicago Tribune of the 20th of May is a lengthy article by "Dr. Syn- tax" about the affairs of B. F. Allen, portions of which are said to be extracts from the fallen banker's diary. True or 1	butcher knife, several the jugular vein. The young man exclusioned, "You have killed Edward Colel My poor wife and children!" and disk. Mr. Pierce is about 38 years of any, and one of the best citizens of Years county. Mr. Cole, his brother-in-law, was younger, also from an excellent family, and of the highest integray. He and his brother-in-law have always been warm intimate friends, and their families greatly attached to each other. The newspaper a the handmaid of civilization. No family can maintain its place in society without it. The man needs it for information about markets and politics; the mean needs it as a diversion from her basehold cares and family duties; the poung need it for both amusement and instruction. Thou- sands of families can take but a single newspaper; and the ses should be com- mended to their cansideration which	ing removed as it runs from the fasures in the rock, at the rate of some forty or fity tons a day. The sulphur proceeds from a mine in the interior of the moun- tain, which interior is in a molten state. The laborers, it appears, are often obliged to stop up the fissures from which the molten sulphur runs, so as to give it time to cool sufficiently to be removed, after which the fissures are again un- stopped. It seems that, on a recent oc- casion, on opening one of those fissures, no sulphur was found, and the idea en- tered the heads of the workmen to reopen the hole by blasting. They suc ceeded in re-establishing a communica- tion with the interior, but the pressure had become so strong during the ob- struction that the expansion of the gas produced a terrible explosion, involving a serious loss of life.	Debts of Cities. Debts of Cities. The Cincinnati Commercial gives the following interesting figures relating to municipal debts of the principal cities at the latest date published: Pop. in 1870.
